Themes in Greek Linguistics Irene Philippaki-Warbuton,Katerina Nicolaidis,Maria Sifianou,1994-11-17 This volume brings together 65 papers which were presented at this Conference, the aim of which was to provide a forum for the exchange of ideas between scholars with expertise in various aspects of the Greek language. For this reason the volume contains the majority of the contributions. It should provide the linguistic community with a comprehensive work presenting the state-of-the-art in Greek Linguistics and covering a wide multidisciplinary spectrum of current research. The papers are organised into six sections. Section I contains the papers of the four invited speakers. George Babiniotis discusses the contribution of linguistic theory to the teaching of Greek, Dimitra Theophanopoulou-Kontou and Angeliki Malikouti-Drachman each present an overview of the relevance of, respectively, syntactic and phonological theories to Greek, and Brian D. Joseph explores a specific theoretical issue, the pro-drop parameter. Section II brings together papers on syntax, semantics and pragmatics which examine theoretical and descriptive issues within current models such as Principles & Parameters, HPSG, Relevance Theory and others. Section III covers phonology and phonetics and also presents research on theoretical issues such as government phonology, the phonology-morphology interface, as well as descriptive issues including the instrumental investigation of selected phonetic phenomena. Section IV covers discourse and style and deals with spoken and written discourse including miscommunication, metaphor and issues on politeness. Section V

on variations and extensions consists of papers on Ancient and Modern Greek dialects such as Macedonian, Cypriot, and Pontic, as well as issues on social and geographical varieties, diglossia and language acquisition. Section VI presents papers relating to the use of computers for the analysis, translation and teaching of Greek. Finally, an index of authors, languages and main key words completes the volume.

Make 'Em Laugh Steve Allen, 2013-05-24 The success of Steve Allen's *How To Be Funny* led first to the republication of that book, and now occasioned a companion volume, *Make 'Em Laugh*. This new how-to book about the art of comedy includes an even richer assortment of examples of the author's unique humor. In *Make 'Em Laugh*, Allen laces his formal instruction with hilarious ad-libs, written jokes, TV comedy sketches, satires, song parodies, humorous essays, amusing autobiographical reminiscences, one-act plays, witty speeches, and stand-up monologues from his comedy concerts. Noel Coward called Steve Allen the most talented man in America, and he is probably the most borrowed-from comedian of all time. The perceptive reader will recognize many of the comic ideas that Allen originated during the Golden Age of television comedy - ideas that are still influential in the 1990's. If there were a college course in creating and performing comedy, *Make 'Em Laugh* would be the ideal textbook.

Principles and Themes in Yoga Therapy James Foulkes, 2017-07-21 Yoga has become increasingly popular in mainstream culture, with varied interpretations of how it should be taught and practiced, and increased awareness of its beneficial effects as a healing modality. As a result, yoga therapy has emerged as an effective alternative approach to health and wellness. Explaining the principles and underpinning ideas presented by the yoga therapy movement, James Foulkes identifies the methods leading to the most effective practice. Applying a principles-based approach, he explores the concept of delivering yoga therapeutically and discusses more complete ways of thinking about anatomy and the wholeness of the human being,

using theories, illustrations, and case studies. Yoga therapy practitioners will learn to improve their work and more effectively support their clients.

Unreality and Time Robert S. Brumbaugh, 1984-06-30 This book recognizes and questions a key assumption about time which is shared by common sense and philosophy—the assumption that time, like a single substance or a homogeneous quality, is subject to the law of contradiction. This leads to the logical conclusion that among different and mutually exclusive accounts of time, whether in science, practical action, or fine art, only one can be the “right” one. Four such accounts are shown here to be internally consistent though mutually incompatible, suggesting that the initial assumption is mistaken, and that in some way each alternative concept of time must be incomplete. Brumbaugh suggests that we must choose the one appropriate to a particular purpose: artistic creation, technological efficiency, discovery of mathematical laws of nature, or work with biological and social phenomena. The selection should allow coherence between that aspect of reality which the selected time concept emphasizes, and the aspect of reality most relevant to a successful execution of our purpose.
