Fortune Makers Michael Useem, Harbir Singh, Liang Neng, Peter Cappelli, 2017-03-14 Fortune Makers analyzes and brings to light the distinctive practices of business leaders who are the future of the Chinese economy. These leaders oversee not the old state-owned enterprises, but private companies that have had to invent their way forward out of the wreckage of an economy in tatters following the Cultural Revolution. Outside of brand names such as Alibaba and Lenovo, little is known, even by the Chinese themselves, about the people present at the creation of these innovative businesses. Fortune Makers provides sharp insights into their unique styles--a distinctive blend of the entrepreneur, the street fighter, and practices developed by the Communist Party--and their distinctive ways of leading and managing their organizations that are unlike anything the West is familiar with. When Peter Drucker published Concept of the Corporation in 1946, he revealed what made large American corporations tick. Similarly, when Japanese companies emerged as a global force in the 1980s, insightful analysts explained the practices that brought Japan's economy out of the ashes--and what managers elsewhere could learn to compete with them. Now, based on unprecedented access, Fortune Makers allows business leaders in the United States and the rest of the West to understand the essential character and style of Chinese corporate life and its dominant players, whose businesses are the foundation of the domestic Chinese market and are now making their mark globally.

Every Officer is a Leader Terry Anderson, 1999-09-28 Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety, authored by leadership expert Terry Anderson and several well known leaders in the law enforcement and criminal justice profession, responds to the need for a comprehensive leadership development model for the education and training of police, justice and public safety supervisors, managers and front line officers. He examines how leadership development has a profound impact on the morale and performance of individual officers, teams, and organizations, illustrating in depth and detail how police and other justice and public safety leaders (in corrections, fire, customs, immigration, security, courts, etc.) can implement the Transforming Leadership process, skills, and principles. The recent focus (during the past 10 years) on community policing initiatives has made competency based leadership skills training essential for front line officers. The author's innovative contribution is a focus on the necessity to build a leadership organization before - and to an extent, while - you move ahead into building a learning organization that is responsive to community and internal organizational needs. The personal, team, and organization development skills discussed in this book are necessary pre-requisites to successful implementation of any neighborhood or community policing initiatives. Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety provides a model for integrating other models into a holistic leadership development framework. It furnishes a map for developing critical leadership skills with self-assessment, includes the developmental aspects of leadership expert Terry Anderson's previous book on Transforming Leadership, and applies them to law enforcement and criminal justice. Anderson and his contributing authors add clarity, perspective, and examples to show how individual leaders can develop themselves, and one another, into high-

performance team leaders and officers who motivate others to respond to issues that affect the morale, health, and safety of the communities in which they serve. This new focus adds a perspective on security issues that affect police, justice and public safety organizations.

Internal Brand Management in an International Context Christina Ravens, 2013-10-29 Employees with a sound knowledge of and strong commitments to a brand are likely to display behaviors that conform to a brand's identity, so called brand citizenship behavior. Organizations have access to various internal branding instruments that support commitment structures but multinational corporations are challenged by a diverse workforce environment. The study analyzes the relevance of these instruments across a German, Chinese and North American sample. This research further analyzes the impact of an individual's cultural values on brand commitment which is an antecedent to brand citizenship behavior.

The Management Myth: Why the Experts Keep Getting it Wrong Matthew Stewart, 2009-08-10 A devastating bombardment of managerial thinking and the profession of management consulting...A serious and valuable polemic. —Wall Street Journal Fresh from Oxford with a degree in philosophy and no particular interest in business, Matthew Stewart might not have seemed a likely candidate to become a

consultant. But soon he was telling veteran managers how to run their companies. In narrating his own ill-fated (and often hilarious) odyssey at a top-tier firm, Stewart turns the consultant's merciless, penetrating eye on the management industry itself. *The Management Myth* offers an insightful romp through the entire history of thinking about management, a withering critique of pseudoscience in management theory, and a clear explanation of why the MBA usually amounts to so much BS—leading us through the wilderness of American business thought.
