Beyond the Information Commons Charles Forrest, Martin Halbert, 2020-08-22 In the closing decades of the twentieth century, academic libraries responded to rapid changes in their environment by acquiring and making accessible a host of new information resources, developing innovative new services and collaborative partnerships, and building new kinds of technology-equipped spaces to support changing user behaviors and emerging patterns of learning. The "Information Commons" or "InfoCommons" blossomed in a relatively short amount of time in libraries across North America, and around the world, particularly in Europe and the British Commonwealth. This book is more than a second edition of the 2009 book *A Field Guide to the Information Commons* which documented the emergence of a range of facilities and service programs that called themselves "Information Commons." This new book updates this review of current practice in the Information Commons and other new kinds of facilities inspired by the same needs and intents, but goes beyond that by describing the continued evolution. This new book is an attempt to answer the question: "What might be the next emerging concept for a technology-enabled, user-responsive, mission-driven form of the academic library?" Like its predecessor, *Beyond the Information Commons* is structured in two parts. First, a brief series of essays explore the Information Commons from historical, organizational, technological, and architectural perspectives. The second part is a field guide composed of more than two dozen representative entries describing various Information Commons using a consistent format that provides both perspective on issues and useful details about actual implementations. Each of these includes photos and other graphics.

Going Digital in Student Leadership Josie Ahlquist, Lisa Endersby, 2017-03-03 Educators, do you want to be better prepared for the unique opportunities and challenges inherent in

this digital age? This volume covers topics such as: How technology has impacted leadership development, both in traditional leadership development models and by advancements in digital tools, platforms, and devices The intersections of student leadership development, leadership identity, and social media A model for exploring and teaching digital citizenship across P-20 curriculums Preparing practitioners to support and educate students in the complex spaces of activism in the digital age The influence of technology and digital tools in defining and developing relevant skills in student leaders An expanded mindset for career and professional development in the digital workplace. Lean Digital Thinking V. Srinivasa Rao, 2021-10-18 The effective digitalization of business can make you a business leader; however, if not executed accurately, it can destroy your business too. Around 70 per cent of digital transformation projects have been failing. Even successful digitalization projects have become white elephants or expensive during the operations phase. Lean Digital Thinking introduces the '12-12-5 model'-12 lean digital thinking principles, 12 digital business building blocks and 5 lean digitalization phases-a brilliant guide that will enable business executives to become digital business champions. Leading digital expert, author VSR, as he is popularly known, introduces the world's first lean digital thinking philosophy with 12 principles to acquire a new digital mindset and throws in critical questions: Why digitalize? Where to digitalize? What to digitalize? And how at all to digitalize? He provides lean digital methods, templates and frameworks for digitalizing 12 business building blocks at an optimal cost. Further, new business models, products, services, processes, digital workplaces and operating models, driven by digital technologies, have been discussed with insights on how to leverage digitalization to get ready for the new normal that has emerged with the COVID-19 pandemic. An effective practitioner's guide, this is a must-read for business and technology executives and anyone wishing to master the art of digital business.

Web-based Support Systems JingTao Yao, 2010 The emerging interdisciplinary study of Web-based support systems focuses on the theories, technologies and tools for the design and implementation of Web-based systems that support various human activities. This book presents the state-of-the-art in Web-based support systems (WSS). The research on WSS is multidisciplinary and focuses on supporting various human activities in different domains/fields based on computer science, information technology, and Web technology. The main goal is to take the opportunities of the Web, to meet the challenges of the Web, to extend the human physical limitations of information processing, and to keep up with the advance of technology advances. This book discusses the four types of existing research: WSS for specific domains, Web-based applications, techniques related to WSS and design, and development of WSS. This comprehensive, wide-ranging text will provide an invaluable insight into the state of the art in WSS for researchers and graduate students.

Libraries, Digital Information, and COVID David Baker, Lucy Ellis, 2021-07-02 COVID-19 is profoundly affecting the ways in which we live, learn, plan, and develop. What does COVID-19 mean for the future of digital information use and delivery, and for more traditional forms of library provision? *Libraries, Digital Information, and COVID* gives immediate and long-term solutions for librarians responding to the challenge of COVID-19. The book helps library leaders prepare for a post-COVID-19 world, giving guidance on developing sustainable solutions. The need for sustainable digital access has now become acute, and while offering a physical space will remain important, current events are likely to trigger a shift toward off-site working and study, making online access to information more crucial. Libraries have already been providing access to digital information as a premium

service. New forms and use of materials all serve to eliminate the need for direct contact in a physical space. Such spaces will come to be predicated on evolving systems of digital information, as critical needs are met by remote delivery of goods and services. Intensified financial pressure will also shape the future, with a reassessment of information and its commercial value. In response, there will be a massification of provision through increased cooperation and collaboration. These significant transitions are driving professionals to rethink and question their identities, values, and purpose. This book responds to these issues by examining the practicalities of running a library during and after the pandemic, answering questions such as: What do we know so far? How are institutions coping? Where are providers placing themselves on the digital/print and the remote/face-to-face continuums? This edited volume gives analysis and examples from around the globe on how libraries are managing to deliver access and services during COVID-19. This practical and thoughtful book provides a framework within which library directors and their staff can plan sustainable services and collections for an uncertain future. Focuses on the immediate practicalities of service provision under COVID-19 Considers longer-term strategic responses to emerging challenges Identifies key concerns and problems for librarians and library leaders Analyzes approaches to COVID-19 planning Presents and examines exemplars of best practice from around the world Offers practical models and a useful framework for the future

Lessons from Problem-based Learning Henk van Berkel, Albert Scherpbier, Harry Hillen, Cees van der Vleuten, 2010-08-12 Problem-based learning (PBL) has excited interest among educators around the world for several decades. Among the most notable applications of PBL is the approach taken at the Faculty of Health, Medicine and Life sciences (FHML) at Maastricht University, the Netherlands. Starting in 1974 as a medical school, the faculty embarked on the innovative pathway of problem-based learning, trying to establish a medical training program which applied recent insights of education

which would be better adapted to the needs of the modern physician. The medical school, currently part of the FHML, can be considered as an 'established' school, where original innovations and educational changes have become part of a routine. The first book to bring this wealth of information together, *Lessons from Problem-based Learning* documents those findings and shares the experiences of those involved, to encourage further debate and refinement of problem-based learning in specific applications elsewhere and in general educational discussion and thought. Each chapter provides a description of why and what has been done in the Maastricht program, followed by reflection on the benefits and issues that have arisen for these developments. The final section of the book examines the application of PBL in the future, and how it is likely to develop further.

Making Thinking Visible Ron Ritchhart, Mark Church, Karin Morrison, 2011-03-25 A proven program for enhancing students' thinking and comprehension abilities Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions, while at the same time deepening their understanding of the topics they study. Rather than a set of fixed lessons, Visible Thinking is a varied collection of practices, including thinking routines?small sets of questions or a short sequence of steps?as well as the documentation of student thinking. Using this process thinking becomes visible as the students' different viewpoints are expressed, documented, discussed and reflected upon. Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes easy-to-implement classroom strategies The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms.
