The Poulterers' Case (1611) , Every student of criminal law knows for a fact that the Poulterers' Case (1611) launched modern criminal conspiracy. This decision laid the first stone of the principle that an agreement to commit a crime is also a crime. However, besides what the law reports say, little is known about the facts of the case. This edition of the testimonies collected by the Star Chamber intends to fill this gap. Additionally, an introductory study will discuss how these facts shed new light on the reasons that were mustered in support of the decision. It will also argue that modern conspiracy was not a creation of the courts but rather of the nineteenth-century scholars who turned the Poulterers' Case into a landmark case. Todo estudiante angloamericano de derecho penal sabe que el Poulterers's Case (1611) dio el primer paso hacia el delito moderno de conspiración

en Inglaterra. Esta decisión puso la primera piedra del principio según el cual con el acuerdo para cometer un delito se comete ya un delito. Sin embargo, aparte de lo que dicen los law reports, poco se sabe de los hechos del caso. Esta edición de los testimonios recogidos por la Star Chamber pretende colmar esta laguna. Además, un estudio introductorio analizará cómo estos hechos arrojan luz sobre las razones que se esgrimieron en apoyo de la decisión. También se argumentará que la conspiración moderna no fue una creación de los tribunales, sino de los juristas del siglo XIX que convirtieron el Poulterers' Case en un hito jurisprudencial.

The Byzantine Economy Angeliki E. Laiou, Cécile

Morrisson, 2007-09-20 This is a concise survey of the economy of the Byzantine Empire from the fourth century AD to the fall of Constantinople in 1453. Organised chronologically, the book addresses key themes such as demography, agriculture, manufacturing and the urban economy, trade, monetary developments, and the role of the state and ideology. It provides a comprehensive overview of the economy with an emphasis on the economic actions of the state and the productive role of the city and non-economic actors, such as landlords, artisans and money-changers. The final chapter compares the Byzantine economy with the economies of western Europe and concludes that the Byzantine economy was one of the most successful examples of a mixed economy in the pre-industrial world. This is the only concise general history of the Byzantine economy and will be essential reading for students of economic history, Byzantine history and medieval history more generally.

Byzantium Between the Ottomans and the Latins Nevra

Necipoğlu, Nevra Necipoglu, 2009-03-19 This book examines Byzantine political attitudes towards the Ottomans and western Europeans during the critical last century of Byzantium. It explores the political orientations of aristocrats, merchants, the

urban populace, peasants, and members of ecclesiastical and monastic circles in three major areas of the Byzantine Empire in their social and economic context.

New Orleans '96 Fodor's,1995

The Law of Criminal Conspiracy Peter Gillies,1990 This second edition covers the changes to the law of criminal conspiracy in the Commonwealth, Victoria, Western Australia, the Northern Territory and the Australian Capital Territory up to 1990. These changes were not in practice significant - the crime survives in its fundamentals in all jurisdictions. They have been dealt with in this second edition along with the many decisions on the topic which have been reported since 1981.

Criminal Law William Wilson,2008 This new edition gives substantial and clear coverage of both criminal law doctrine and the theory behind it, striking a pleasing balance between the two. It is designed to be approachable and clear but with sufficient depth of analysis and discussion to ensure its suitability for both undergraduate and CPE/GDL courses.

Studies in the Byzantine Monetary Economy C.300-1450

Michael F. Hendy,2008-10-30 This is a major study of the Byzantine coinage set in the wider context of finance, administration and economy. The book consists of four main sections, on economy and society, on finance, and on the circulation and production of coinage, and has made an unrivalled contribution in the field of late classical, Byzantine and medieval economic history.

The Black Death in Egypt and England Stuart J.

Borsch,2009-09-15 Throughout the fourteenth century AD/eighth century H, waves of plague swept out of Central Asia and decimated populations from China to Iceland. So devastating was the Black Death across the Old World that some historians have compared its effects to those of a nuclear holocaust. As countries began to recover from the plague during the following century, sharp contrasts arose between the East, where societies slumped

into long-term economic and social decline, and the West, where technological and social innovation set the stage for Europe's dominance into the twentieth century. Why were there such opposite outcomes from the same catastrophic event? In contrast to previous studies that have looked to differences between Islam and Christianity for the solution to the puzzle, this pioneering work proposes that a country's system of landholding primarily determined how successfully it recovered from the calamity of the Black Death. Stuart Borsch compares the specific cases of Egypt and England, countries whose economies were based in agriculture and whose pre-plague levels of total and agrarian gross domestic product were roughly equivalent. Undertaking a thorough analysis of medieval economic data, he cogently explains why Egypt's centralized and urban landholding system was unable to adapt to massive depopulation, while England's localized and rural landholding system had fully recovered by the year 1500.

Crisis of Feudalism G. Bois, 2009-02-12 Guy Bois' study of late medieval Normandy is a work of many dimensions. It should be of particular interest to English readers because of the close historical associations of England with Normandy and because of the natural resemblances between these two countries, separated only by the English Channel. This study does not, however, cover the period of close political association but that of invasion and warfare, of destruction and pillage. Although Guy Bois' book follows through the movements of population, prices, rents and wages over two and a half centuries, it does not consist simply of the delineation of trends. The realities of the land and its occupants are fitted into this broader scheme, their economic and social activities are described as well as the impact on them of the military campaigns. All this is based on a meticulous analysis of every type of documentation available, ranging from tax returns to ecclesiastical surveys, from chronicles to rentals.

The Cambridge History of the Byzantine Empire c.500-1492

Jonathan Shepard, 2019-06-30 Byzantium lasted a thousand years, ruled to the end by self-styled 'emperors of the Romans'. It underwent kaleidoscopic territorial and structural changes, yet recovered repeatedly from disaster: even after the near-impregnable Constantinople fell in 1204, variant forms of the empire reconstituted themselves. The Cambridge History of the Byzantine Empire c.500-1492 tells the story, tracing political and military events, religious controversies and economic change. It offers clear, authoritative chapters on the main events and periods, with more detailed chapters on outlying regions and neighbouring societies and powers of Byzantium. With aids such as maps, a glossary, an alternative place-name table and references to English translations of sources, it will be valuable as an introduction. However, it also offers stimulating new approaches and important findings, making it essential reading for postgraduates and for specialists. The revised paperback edition contains a new preface by the editor and will offer an invaluable companion to survey courses in Byzantine history.

Peasant Society in the Late Byzantine Empire Angeliki E. Laiou-Thomadakis, 2019-03-12 This book applies scientific demographic methods to the study of Byzantine peasantry in a period of feudalization. The author shows that the number of peasants declined in the fourteenth and fifteenth centuries for reasons that had less to do with catastrophes than with internal social developments. Her book makes the first thorough analysis of this rural society, and one that draws on all available sources. It focuses on village structure and family or kinship groups as well as social and demographic trends. Angeliki Laiou-Thomadakis is Professor of History at Rutgers University and the author of *Constantinople and the Latins* (Harvard) Originally published in 1977. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of

these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

An Island for Itself Stephan R. Epstein, 2003-11-13 Late medieval Sicily is shown to have been neither underdeveloped nor dependent on foreign trade.

A Byzantine Government in Exile Michael Angold, 1975 A Byzantine Government in Exile Government and Society under the Laskarids of Nicaea (1204-1261)

Modelling the Middle Ages John Hatcher, Mark Bailey, 2001 Most of what has been written on the economy of the middle ages is deeply influenced by abstract concepts and theories. The most powerful and popular of these guiding beliefs are derived from intellectual foundations laid down in the eighteenth and nineteenth centuries by Adam Smith, Johan von Thunen, Thomas Malthus, David Ricardo, and Karl Marx. In the hands of twentieth-century historians and social scientists these venerable ideas have been moulded into three grand explanatory ideas which continue to dominate interpretations of economic development. These trumpet in turn the claims of 'commercialization', 'population and resources', or 'class power and property relations' as the prime movers of historical change. In this highly original book John Hatcher and Mark Bailey examine the structure and test the validity of these conflicting models from a variety of perspectives. In the course of their investigations they provide not only detailed reconstructions of the economic history of England in the middle ages and sustained critical commentaries on the work of leading historians, but also discussions of the philosophy and methods of history and the social sciences. The result is a short and readily intelligible introduction to medieval economic history, an up-to-date critique of established models, and a succinct treatise on historiographical method.

The Making of Polities John Watts, 2009-05-07 This major survey of political life in late medieval Europe provides a framework for understanding the developments that shaped this turbulent period. Rather than emphasising crisis, decline, disorder or the birth of the modern state, this account centres on the mixed results of political and governmental growth across the continent. The age of the Hundred Years War, schism and revolt was also a time of rapid growth in jurisdiction, taxation and representation, of spreading literacy and evolving political technique. This mixture of state formation and political convulsion lay at the heart of the 'making of polities'. Offering a full introduction to political events and processes from the fourteenth century to the sixteenth, this book combines a broad, comparative account with discussion of individual regions and states, including eastern and northern Europe alongside the more familiar west and south.

Byzantium, Faith, and Power (1261-1557) Metropolitan Museum of Art (New York, N.Y.), 2006 This volume publishes twelve papers that were delivered at an academic symposium held at The Metropolitan Museum of Art, New York, on April 16-18, 2004, in conjunction with the exhibition, *Byzantium: Faith and Power (1261-1557)* (held at The Metropolitan Museum of Art from March 23 to July 5, 2004).

The Byzantine Aristocracy M Angold, 1984

The Cambridge Economic History of Modern Europe: 1700-1870 S. N. Broadberry, Kevin H. O'Rourke, 2010 Setting European economic development within a unified, comparative and genuinely pan-European framework, this textbook surveys the transition to modern economic growth since 1700. Leading authors cover the major themes of modern economic history and compare economic development across countries in a clear and comprehensible way--Provided by publisher.
