Building Cocoa Applications Simson Garfinkel, Michael K. Mahoney, 2002 Applications developers will find step-by-step instruction for using Cocoa to build a series of graphics applications for Mac OS X in this tutorial featuring extended examples written in Objective-C. Following material on Cocoa, the Aqua interface, and Interface builder, the bulk of the book provides instructions for building a four-function calculator, a multiple-document, multiprocess application, and a multithreaded, mouse-tracking application. Familiarity with programming in general and with the ANSI C language is assumed. Annotation copyrighted by Book News, Inc., Portland, OR.

Mac OS X Programming Dan Parks Sydow, 2002 Mac OS X Programming Techniques provides the reader with definitions, details, and explanations of the various components that make up this new operating system. Understanding the operating system helps the reader use the programming tools and the Carbon application programming interface (API)--both of which are covered extensively in this book. Much of the original programming API (now referred to as the Classic API) is still usable. But it's been revamped and renamed--it's now the Carbon API. This modified set of functions includes plenty of new routines that make a Mac programmer's work easier and more powerful--provided that the programmer knows how to make use of the new code. The reader learns about the all new Carbon Event Manager, as well as the changes and enhancements that have been made to existing managers (such as the Window Manager and the Menu Manager). Readers new to Mac programming will appreciate the journey that takes them from the start of a new Macintosh project to the final building of a standalone Mac OS X application. Readers experienced in programming the Mac will find this same material of great interest--and these readers will benefit from the lengthy section on porting existing Mac OS 8 and 9 applications to Mac OS X. Finally, readers will appreciate the Carbon API reference section that provides information and example code for dozens of the most commonly used Carbon routines. All the code developed in the book will be available on www.newriders.com.

Music Lessons Bob Wiseman, 2020-07-06 Bob Wiseman believes most things in life are universal, or, as his friend Joe once said, everything is everything. Bearing in mind this fortune cookie advice, Wiseman writes about finding the link between music and daily tasks, like teaching a five-year-old "Twinkle, Twinkle" and doing the dishes each night. Bob writes daily, the way someone else might practice scales; although his sense of the instrument and the musician has changed over the years, Bob adheres to doing exercises that have wider connections than whether the strings are in tune. Each entry is unique and compellingly written, but the themes throughout — on improvisational music, life lessons, and conflict — are ubiquitous.

The Film Editing Room Handbook Norman Hollyn, 2009-12-15 The assistant film editor has many more responsibilities than simply helping to edit the picture. He or she must work with all the numerous members of the filmmaking team, juggle the demands of copious amounts of footage from various sources, keep notes during the shoot's dailies screenings, process sound, oversee the creation of optical effects and integrate them in the editor's workflow, and many more detail-oriented, simultaneous tasks that require skills on a technical and organizational level. Widely regarded as THE guide for helping you get through it all, Norman Hollyn, editing whiz and longtime instructor, is the ultimate master at making the process fun while making you a pro. In this fourth edition, he continues in the celebrated style of his previous editions with a hands-on approach, assuming the role of an assistant editor to describe the myriad workflows involved. Not only will you learn everything you need to know about how the editing process works, but you'll gain the wisdom that normally only comes with on-the-job experience, putting you way ahead in your career and making you a better, more efficient editor. In *The Film Editing Room Handbook*, you'll learn: Everything the assistant editor needs to know on the job—from pre-production to the shoot, to editing and adding visual effects and sound, to the mix and color finishing. How to work in a variety of scenarios, whether it is a feature, television, commercial, musical, or web-based project. Best practices for organizing and optimizing your systems and files, useful to editors working on any nonlinear editing platform. How to find a job in this competitive market and put together an attractive résumé that proves you've got the skills to succeed. Praise for *The Film Editing Room Handbook*, Fourth Edition *The Film Editing Room Handbook* systematically explains everything you need to know about the editing process, exactly as it exists in the making of major motion pictures. Complicated technical concepts are made totally clear and easily understandable in this absolutely essential book for all assistant editors, indie filmmakers, and those who aspire to break into the industry." - Mark Goldblatt, A.C.E., editor of *The Terminator*, *Starship Troopers*, and *True Lies* " This is a wonderful book that explains the complexities of the editing room assistant's job with clarity and wit." - Alan Heim, A.C.E, Oscar-winning editor and former president of American Cinema Editors " The Assistant Editor is the unsung hero of the editing room, tip-toeing around land mines to keep everything running smoothly in a job where all the important rules are unwritten. Until now. Norman Hollyn does an excellent job explaining the process of editing, the role of the assistant editor, and clearly labeling where all the booby traps are buried." - Larry Jordan, producer, director, editor, and Apple-certified trainer " This book is an excellent introduction to editing in the real world. Norman Hollyn not only tells you what is necessary, he tells you what is efficient. He knows how important that can be because he's been there." - Burton J. Sears, film instructor at Savannah College of Art and Design, editor of *Virtuosity*, *Jacob's Ladder*, and *Henry and June*
