📖 **Attention Hijacked** Erica B. Marcus,2022-05-03 Technology surrounds us every day: a phone alarm wakes us up, an electronic calendar tracks assignment deadlines, GPS directs us to the new dentist’s office, social media keeps us connected to friends and family, and streaming platforms make sure we’re never without something new to binge-watch. Our devices and apps can make life much more convenient and entertaining. But for years, scientists have warned that too much screen time may have negative effects on our health. With portable devices and remote learning, it is even more difficult to put down electronics. Being intentional about how and when to unplug can help teens and young adults to protect their physical and mental wellbeing in a world where screens and technology are increasingly becoming necessities rather than just conveniences. Attention Hijacked offers a roadmap for those deciding how they want to deal with technology, exploring the ways technology affects the individual, dispelling common misinformation, and using this knowledge to make personalized decisions. Page Plus links in the book lead to mindfulness and meditation audio clips. Using mindfulness techniques, this book gives readers the power to take charge of their technology use.

📖 **Adaptive Mobile Computing** Mauro Migliardi,Alessio Merlo,Sherenaz Al-HajBaddar,2017-08-14 Adaptive Mobile Computing: Advances in Processing Mobile Data Sets explores the latest advancements in producing, processing and securing mobile data sets. The book provides the elements needed to deepen understanding of this trend which, over the last decade, has seen exponential growth in the number and capabilities of mobile devices. The pervasiveness, sensing capabilities and computational power of mobile devices have turned them into a fundamental instrument in everyday life for a large part of the human population. This fact makes mobile devices an incredibly rich source of data about the dynamics of human behavior, a pervasive wireless sensors network with substantial computational power and an extremely appealing target for a new generation of threats. Offers a coherent and realistic image of today’s architectures, techniques, protocols, components, orchestration, choreography and development related to mobile computing Explains state-of-the-art technological solutions for the main issues hindering the development of next-generation pervasive systems including: supporting components for collecting data intelligently, handling resource and data management, accounting for fault tolerance, security, monitoring and control, addressing the relation with the Internet of Things and Big Data and depicting applications for pervasive context-aware processing Presents the benefits of mobile computing and the development process of scientific and commercial applications and platforms to support them Familiarizes readers with the concepts and technologies that are successfully used in the implementation of pervasive/ubiquitous systems

📖 **Materials for Advanced Power Engineering** 1994 D. Coutsouradis,1994 The role of energy in the modern world goes beyond mere technology and economics to influence welfare, the environment, the quality of life and, in broad terms, civilization itself. Since the Industrial Revolution, energy conservation technology has been at the forefront of the innovation required to satisfy the needs of mankind and, more than any other, this technology has always depended on the performance of the materials used.

📖 **168 Hours** Laura Vanderkam,2011-05-31 It’s an unquestioned truth of modern life: we are starved for time. We tell ourselves we’d like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren’t enough hours to do it all. Or if we don’t make excuses, we make sacrifices- taking time out from other things in order to fit it all in. There has to be a better way...and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there’s time for the important stuff. When plans go wrong and they run out of time, only their lesser priorities suffer. Vanderkam shows that with a little examination and prioritizing, you’ll find it is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter.

📖 **Out of Place** Tim Doud,Zoë Charlton,2021-10-29 Broad in scope, Out of Place: Artists, Pedagogy, and Purpose presents an overview of the different paths taken by artists and artist collectives as they navigate their way from formative experiences into pedagogy. Focusing on the realms in- and outside the academy (the places and persons involved in post-secondary education) and the multiple forms and functions of pedagogy (practices of learning and instruction), the contributions in this volume engage individual and collective artistic practices as they adapt to meet the factors and historical conditions of the people and communities they serve through solidarity, equity, and creativity. With this critically, historicist approach in mind, the contributions in Out of Place historicize, study, critique, revise, reframe, and question the academy, its operations and exclusions. The extensive range of contributions, emphasizing community-oriented projects both inside and outside the United States, is grouped into three overarching categories: artists who work in academic institutions but whose social and pedagogical engagement extends beyond the walls of the academy; artists who engage in pedagogical initiatives or forms of institutional critique that were established outside of an art school or university setting; and artist-scholars who are doing transformative and inter/transdisciplinary work within their respective institutions. Collectives and projects represented in Out of Place comprise Art Practical, Axis Lab, BFAMFAPhD, Beta-Local, Black Lunch Table Project, The Black School, The Center for Undisciplined Research, Devening Projects, ds4si, Elsewhere, Ghana ThinkTank, Gudskul, The Icebox Project Space, Las Hermanas Iglesias, The Laundromat Project, Occupy Museums, Peebls, PlantBot Genetics, Queer Conversations on Culture and the Arts, Related Tactics, Side by Side, ‘sindikit, Sustainable Native Communities Collaborative, and Tiger Strikes Asteriod.

📖 **Time Management Ninja** Craig Jarrow,2019-09-15 “This book will help you own your calendar, block time for what matters most and reclaim your life.” —Paula Rizzo, author of Listful Living: A List-Making Journey to a Less Stressed You You want more time to spend with family, to achieve big goals, and to simply enjoy life. Yet, there seem to be more and more things competing for your time, and more distractions interrupting your day. Craig Jarrow has spent many years testing time management tactics, tools, and systems and written hundreds of articles on productivity, goals, and organization, through it all he’s learned a simple truth: time management should be easy, not complicated and unwieldy. And it shouldn’t take up more of your precious time than it gives back! Time Management Ninja offers 21 rules that will show you an easier and more effective way to take control of your time and manage your busy life. Follow these simple principles and get more done with less effort. It’s no-stress, uncomplicated time management that works. “Read this book, apply its rules, and you’ll find freedom.” —Hyrum Smith, bestselling author of Purposeful Retirement

📖 **US Army Psychiatry in the Vietnam War** Norman M. Camp,2014 NOTE: NO FURTHER DISCOUNT FOR THIS PRODUCT -- OVERSTOCK SALE - SIGNIFICANTLY REDUCED LIST PRICE This book tells the mostly forgotten story of the accelerating mental health problems that arose among the troops sent to fight in South Vietnam, especially the morale, discipline, and heroin crisis that ultimately characterized the second half of the war. This situation was unprecedented in U.S. military history and dangerous, and reflected the fact that during the war America underwent its most divisive period since the Civil War and, as a result, the war became bitterly controversial. The author is a career Army psychiatrist who led a psychiatric unit in Vietnam. In the years following his return, he was dismayed to discover that the Army had conducted no formal review of this alarming situation, including from the standpoint of military psychiatry, and had lost or destroyed all of the pertinent clinical records. In addition to permitting a study of the psychological wounds and their treatment in Vietnam, these records would have been priceless in the treatment of the legions of veterans who presented serious adjustment problems and post-traumatic stress disorder. As a consequence, Dr Camp has been relentless in combing the professional, civilian, and surviving military literature--including unpublished documents--to construct a compelling narrative documenting the successes and failures of Army psychiatry and the Army leadership in Vietnam in responding to these psychiatric and behavioral challenges. The result is a book that is both scholarly and intensely personal, includes vivid case material and anecdotes from colleagues who also served there, and is replete with illustrations and correspondence. It presents the story of Vietnam in a fresh manner--through the psychiatrist’s eyes, and

SENSIBILITIES.

📖 **SUMMER BALL** Mike Lupica, 2007-05-15 The sequel to the #1 New York Times bestseller Travel Team! When you're the smallest kid playing a big man's game, the challenges never stop—especially when your name is Danny Walker. Leading your travel team to the national championship may seem like a dream come true, but for Danny, being at the top just means the competition tries that much harder to knock him off. Now Danny's leaving Middletown for the summer and heading to Right Way basketball camp, where he's out of his element and maybe out of his league. The country's best ballers are in attendance, and Danny will need to raise his game if he wants to match up. But it won't be easy. Old rivals and new battles leave Danny wondering if he really has what it takes to stand tall. “Lupica is at his best when he puts the reader right in the center of the action on the court. His game descriptions are fast, accurate, and exciting. Young sports-fiction fans will eat this up.” –Booklist “Sports fans will relish the on-court action, expertly rendered in Lupica's taut prose. This worthy sequel to Travel Team should earn a wide audience.” –School Library Journal “Lupica knows his basketball and knows how to spin a page-turner of a story. Those who enjoyed the first installment of Danny's story will be thrilled to read a sequel, and even those middle school readers who are not huge sports fans will want to cheer for Danny Walker, who proves that determination can be a whole lot bigger than height.” –VOYA

📖 **BIOLOGY AND CONSERVATION OF RIDLEY SEA TURTLES** Pamela T. Plotkin, 2007-03 Here Plotkin and her colleagues reveal the nature of these species and the steps needed to make sure they remain a permanent part of the marine environment.

📖 **NOTES ON “CAMP”** Susan Sontag, 2019-06-14 From one of the greatest prose stylists of any generation, the essay that inspired the theme of the 2019 Met Gala, Camp: Notes on Fashion Many things in the world have not been named; and many things, even if they have been named, have never been described. One of these is the sensibility—unmistakably modern, a variant of sophistication but hardly identical with it—that goes by the cult name of “Camp.” So begins Susan Sontag's seminal essay “Notes on ‘Camp.’” Originally published in 1964 and included in her landmark debut essay collection Against Interpretation, Sontag's notes set out to define something that even the most well-informed could describe only as “I know it when I see it.” At once grounded in a sweeping history (Louis XIV was pure Camp) and entirely provisional, Camp delights in low and high culture alike. Tiffany lamps, the androgynous beauty of Greta Garbo, King Kong (1933), and Mozart all embody the Camp sensibility for Sontag—an almost ineffable blend of artifice, extravagance, playfulness, and a deadly seriousness. At the time Sontag published her essay, Camp, as a subversion of sexual norms, had also become a private code of signification for queer communities. In nearly every genre and form—from visual art, design, and fashion to writing, music, and film—Camp continues to be redefined today, as seen in the 2019 Met Gala that took Sontag's essay as the basis for its theme. “Style is everything,” Sontag tells us, and as Time magazine points out, “‘Notes on ‘Camp’” launched a new way of thinking,” paving the way for a whole new style of cultural criticism, and describing what is, in many ways, the defining sensibility of our culture today.
