Enterprise Java with UML C. T. Arrington, 2002-03-14 How to use UML to model Enterprise JavaBeans, Swing components, CORBA, and other popular technologies Enterprise Java with UML is the first comprehensive guide on using UML (Unified Modeling Language) to model Java applications. Written by three well-known members of the UML and Java community, the book presents strategies for developing enterprise systems using Java and related technologies -- XML, Servlets, Enterprise JavaBeans, Swing Components, CORBA, RMI, and others. The authors explain how UML is used as a modeling tool for object-oriented computer systems in the real world, break down common situations that development teams encounter, and discuss the tradeoffs of using different technologies in different combinations. They also explore different products, looking closely at their strengths and weaknesses. Four in-depth studies complete the presentation, showing readers how to make the right decision for their project through examples of both successes and failures.

Innovations in Database Design, Web Applications, and Information Systems Management Siau, Keng, 2012-09-30 New techniques and tools for database and database technologies are continuously being introduced. These technologies are the heart of many business information systems and can benefit from theories, models, and research results from other disciplines. Innovations in Database Design, Web Applications, and Information Systems Management presents ideal research in the areas of database theory, systems design, ontologies, and many more. Including examples of the convergence of ideas from various disciplines aimed at improving and developing the theory of information technology and management of information resources, this book is useful for researchers and practitioners in the IT field.

Adnan's Story Rabia Chaudry, 2016-08-09 After more than twenty years in prison, Adnan Syed's murder conviction was overturned, and he was finally set free. Rabia Chaudry's New York Times bestseller and award-winner Adnan's Story reveals how the case was mishandled and became the subject of Sarah Koenig's Peabody Award-winning podcast Serial. In early 2000, Adnan Syed was convicted and sentenced to life plus thirty years for the murder of his ex-girlfriend Hae Min Lee, a high school senior in Baltimore, Maryland. Syed has maintained his innocence, and Rabia Chaudry, a family friend, has always believed him. By 2013, after almost all appeals had been exhausted, Rabia contacted Sarah Koenig, a producer at This American Life, in hopes of finding a journalist who could shed light on Adnan's story. In 2014, Koenig's investigation turned into Serial, a Peabody Award-winning podcast with more than 500 million international listeners. But Serial did not tell the whole story. In this compelling narrative, Rabia Chaudry presents key evidence that she maintains dismantles the State's case: a potential new suspect, forensics indicating Hae was killed and kept somewhere for almost half a day, and documentation withheld by the State that destroys the cell phone evidence—among many other points—and she shows how fans of Serial joined a crowd-sourced investigation into a case riddled with errors and strange twists. Featuring information about Adnan's life in prison, and weaving in his personal reflections with never-before-seen letters, Rabia's account is "a true story about real people. Adnan's Story adds context and humanizes it in a way that could change how you think about the case and about Serial itself" (Los Angeles Times). "Chaudry's clear, vivid and highly readable account of the case will bring the story to life for readers unfamiliar with the podcast, and even the most devoted Serial fans will find fresh insight and a vast amount of new material. Chaudry's legal training serves her well as she marshals her defense, but so too does the Pakistani heritage and Muslim faith she shares with Syed." —Washington Post

[Dead Simple Python](#) Jason C McDonald,2022-11-22 The complete core language for existing programmers. Dead Simple Python is a thorough

introduction to every feature of the Python language for programmers who are impatient to write production code. Instead of revisiting elementary computer science topics, you'll dive deep into idiomatic Python patterns so you can write professional Python programs in no time. After speeding through Python's basic syntax and setting up a complete programming environment, you'll learn to work with Python's dynamic data typing, its support for both functional and object-oriented programming techniques, special features like generator expressions, and advanced topics like concurrency. You'll also learn how to package, distribute, debug, and test your Python project. Master how to: Make Python's dynamic typing work for you to produce cleaner, more adaptive code. Harness advanced iteration techniques to structure and process your data. Design classes and functions that work without unwanted surprises or arbitrary constraints. Use multiple inheritance and introspection to write classes that work intuitively. Improve your code's responsiveness and performance with asynchrony, concurrency, and parallelism. Structure your Python project for production-grade testing and distribution The most pedantically pythonic primer ever printed, Dead Simple Python will take you from working with the absolute basics to coding applications worthy of publication.

[The Mysterious Case](#) Enzo Silvestri,2017-10-17 The Time Card series follows the adventures and fortunes of three friends - Blue, Jesse, and Ellie - as they use the contents of their newly found case to travel to diverse and exotic places. Their middle school studies come alive as they interact with historical figures of their country and the world, while at the same time struggling to not change the time-line or upset the course of history. Trying to hide the case from present day bullies, the friends try to stay one step ahead of their arch enemies Ryan Johnson and Jake Barker, not to mention sinister otherworld forces who are determined to find the time card. In the first book of the series, The Mysterious Case, Blue, Jesse, and Ellie find something strange while fishing. Nothing ever happens in St Andrews, a sleepy little town in North Carolina. Nothing that is, until the appearance of a small tightly sealed metal case. The three middle school friends, 13 year-olds Australian-born Blue, his neighbor Jesse, and Jesse's sister Ellie live in these backwoods. One day they stumble upon the metal case in a creek while they are fishing. What's inside it? How can they open it since it has no catches or hinges? There's something in it, as they can feel the contents rolling around inside. The three friends lose badly as they resist bullies on the bus, but somehow they turn it all around. Join the kids as they explore new worlds, battle bullies, deal with family issues, and ultimately try to save the world. The Time Card is aimed at young readers as short stories that can be read in a single sitting. As English teachers, we are always on the lookout for stories that our students (middle/high school) are interested in reading. We've found that most young readers (heck, even many adults!) who are reluctant to read balk at long stories. We really wanted to offer them short, engaging fiction stories, so we created The Time Card series. Anyone will enjoy the stories while learning about history, dealing with social situations, and improving vocabulary and reading skills.
