Kenneth E. Ingram

New Hampshire: A History Elting E. Morison, Elizabeth Forbes Morison, 1976-08-17 On New Hampshire's thin, cold soil, strewn with rocks, generations of resourceful, tough, independent men and women created a landscape of meadows and pastures, of stone walls and weathered barns and clapboard houses, that has affected the American imagination. This is the story of a historically small and relatively poor state, which seems in our own time increasingly attractive to those who seek what the authors call a simple kind of life lost elsewhere. Posing questions about land use and balanced growth that are important to all Americans, the Morisons' account of New Hampshire and its fluctuating fortunes will fascinate both residents and those who only visit or dream of doing so.

The work explains why spatial thinking matters as it helps readers to integrate a variety of methods to describe and analyze spatial/temporal events and phenomena in disparate environmental contexts. It weaves together maps, GIS, timelines, and storytelling as important strategies in examining concepts and procedures in analyzing real-world data and relationships. The work thus adds significant value to qualitative and quantitative research in environmental (and related) sciences. Features Written by internationally renowned experts known for taking complex ideas and finding accessible ways to more broadly understand and communicate them. Includes real-world studies explaining the merging of disparate data in a sensible manner, understandable across several disciplines. Unique approach to spatial thinking involving animated maps, 3D maps, GEOMATs, and story maps to integrate maps, archives, and timelines—first across a single environmental example and then through varied examples. Merges spatial and temporal views on a broad range of environmental issues from traditional environmental topics to more unusual ones involving urban studies, medicine, municipal/governmental application, and citizen-scientist topics. Left Bank of the Hudson David J. Goodwin, 2017-10-03 In the late 1980s, a handful of artists priced out of Manhattan and desperately needing affordable studio space discovered 111 1st Street, a former P. Lorillard Tobacco Company warehouse. Over the next two decades, an eclectic collection of painters, sculptors, musicians, photographers, filmmakers, and writers dreamt and toiled within the building's labyrinthine halls. The local arts scene flourished, igniting hope that Jersey City would emerge as the next grassroots center of the art world. However, a rising real estate market coupled with a provincial political establishment threatened the community at 111 1st Street. The artists found themselves entangled in a long, complicated, and vicious fight for their place in the building and for the physical survival of 111 1st Street itself, a site that held so much potential, so much promise for Jersey City. Left Bank of the Hudson offers a window into the demographic, political, and socio-economic changes experienced by Jersey City during the last thirty years. Documenting the narrative of 111 1st Street as an act of cultural preservation, author David J. Goodwin's well-researched and significant contribution addresses the question of the role of artists in economically improving cities. As a Jersey

City resident, Goodwin applies his knowledge of the city's rich history of political malfeasance and corruption, including how auspicious plans for a waterfront arts enclave were repeatedly bungled by a provincial-minded city administration. In writing this story, Goodwin interviewed thirteen artists and residents, two businesses, three government officials, and five non-profits, civic organizations, and community activists. The book chronologically explores the history and business of the P. Lorillard Tobacco Company, its evolution into a bustling arts community, the battle to preserve the warehouse as a historic structure, and the lessons to be drawn from the loss and ultimate demolition of the building in 2007, as well as the present state of the neighborhood. Setting the facts straight for future generations, Left Bank of the Hudson provides an illustrative lesson to government officials, scholars, students, activists, and everyday citizens attempting to navigate the "rediscovery" of American cities.

The Chinese Impact upon English Renaissance Literature Mingjun Lu, 2016-03-09 The Chinese Impact upon English Renaissance Literature examines how English writers responded to the cultural shock caused by the first substantial encounter between China and Western Europe. Author Mingjun Lu explores how Donne and Milton came to be aware of England's participation in 'the race for the Far East' launched by Spain and Portugal, and how this new global awareness shaped their conceptions of cultural pluralism. Drawing on globalization theory, a framework that proves useful to help us rethink the literary world of Renaissance England in terms of global maritime networks, Lu proposes the concept of 'liberal cosmopolitanism' to study early modern English engagement with the other. The advanced culture of the Chinese, Lu argues, inculcated in Donne and Milton a respect for difference and a cosmopolitan curiosity that ultimately led both authors to reflect in profound and previously unexamined ways upon their Eurocentric and monotheistic assumptions. The liberal cosmopolitan model not only opens Renaissance literary texts to globalization theory but also initiates a new way of thinking about the early modern encounter with the other beyond the conventional colonial/postcolonial, nationalist, and Orientalist frameworks. By pushing East-West contact back to the period in 1570s-1670s, Lu's work uncovers some hitherto unrecognized Chinese elements in Western culture and their shaping influence upon English literary imagination.
