A Ficto-Historical Theory of the London Underground Marko Jobst,2017-10-25 This book offers a vision of the London Underground written in the form of a ficto-historical narrative, which combines history and fiction in the creation of a set of theoretical propositions for London's subterranean transportation network. Its amateur-scholar protagonist takes the reader on a labyrinthine journey into the world of research, with sources personified and their works appropriated and subverted. The book offers a model for practising writing and research in the context of architectural history and theory.

Geodesy for Planet Earth Steve Kenyon,Maria Christina Pacino,Urs Marti,2012-03-08 These proceedings include the written version of 130 papers presented at the International Association of Geodesy IAG2009 Geodesy for Planet Earth Scientific Assembly. It was held 31 August to 4 September 2009 in Buenos Aires, Argentina. The theme Geodesy for Planet Earth was selected to follow the International Year of Planet Earth 2007-2009 goals of utilizing the knowledge of the world's geoscientists to improve society for current and future generations. The International Year started in January 2007 and ran thru 2009 which coincided with the IAG2009 Scientific Assembly, one of the largest and most significant meetings of the Geodesy community held every 4 years. The IAG2009 Scientific Assembly was organized into eight Sessions. Four of the Sessions of IAG2009 were based on the IAG Structure (i.e. one per Commission) and covered Reference Frames, Gravity Field, Earth Rotation and Geodynamics, and Positioning and Applications. Since IAG2009 was taking place in the great Argentine city of Buenos Aires, a Session was devoted to the Geodesy of Latin America. A Session dedicated to the IAG's Global Geodetic Observing System (GGOS), the primary observing system focused on the multidisciplinary research being done in Geodesy that contributes to important societal issues such as monitoring global climate change and the environment. A Session on the IAG Services was also part of the Assembly detailing the important role they play in providing geodetic data, products, and analysis to the scientific community. A final Session devoted to the organizations ION, FIG, and ISPRS and their significant work in navigation and earth observation that complements the IAG.

Decisions and Orders of the National Labor Relations Board United States. National Labor Relations Board,2009

20% Chance of Rain Richard B. Jones,2011-11-01 There are plenty of books on specialized risk topics but few that deal with the broad diversity and daily applicability of this subject. Risk applications require a robust knowledge of many attributes of this seemingly simple subject. This book teaches the reader through examples and case studies the fundamental (and subtle) aspects of risk – regardless of the specific situation. The text allows the reader to understand the concept of risk analysis while not getting too involved in the mathematics; in this method the reader can apply these techniques across a wide range of situations. The second edition includes new examples from NASA and several other industries as well as new case studies from legal databases. The many real-life discussion topics enable the reader to form an understanding of the concepts of risk and risk management and apply them to day-to-day issues.

Decisions and Orders of the National Labor Relations Board, Volume 357, June 29, 2011 Through January 3, 2012 National Labor Relations Board,2016-02-15 Each volume of this series contains all the important Decisions and Orders issued by the National Labor Relations Board during a specified time period. The entries for each case list the decision, order, statement of the case, findings of fact, conclusions of law, and remedy.

Python in Neuroscience Eilif Muller,James A. Bednar,Markus Diesmann,Marc-Oliver Gewaltig,Michael Hines,Andrew P. Davison,2015-07-23 Python is rapidly becoming the de facto standard language for systems integration. Python has a large user and developer-base external to the neuroscience community, and a vast module library that facilitates rapid and maintainable development of complex and intricate systems. In this Research Topic, we highlight recent efforts to develop Python modules for the domain of neuroscience software and neuroinformatics: – simulators and simulator interfaces – data collection and analysis – sharing, re-use, storage and databasing of models and data – stimulus generation – parameter search and optimization – visualization – VLSI hardware interfacing. Moreover, we seek to provide a representative overview of existing mature Python modules for neuroscience and neuroinformatics, to demonstrate a critical mass and show that Python is an appropriate choice of interpreter interface for future neuroscience software development.
