Reversing the Cult of Speed in Higher Education Jonathan Chambers, Stephannie S. Gearhart, 2018-10-26 A collection of essays written by arts and humanities scholars across disciplines, this book argues that higher education has been compromised by its uncritical acceptance of our culture's standards of productivity, busyness, and speed. Inspired by the Slow Movement, contributors explain how and why university culture has come to value productivity over contemplation and rapidity over slowness. Chapter authors argue that the arts and humanities offer a cogent critique of fast culture in higher education, and reframe the discussion of the value of their fields by emphasizing the dialectic between speed and slowness.

**Nursing Management of Pediatric Disaster** Catherine J. Goodhue, Nancy Blake, 2020-05-13 This textbook describes what nurses need to know about pediatric disaster nursing, including public policy, and addresses preparedness for all types of disasters (natural and man-made) and strategies for hospital, school and community preparedness. The book opens with a brief history of disaster nursing and explains the key differences between pediatric and adult disaster nursing. Recent years have been marked by numerous man-made and natural disasters, which have led nurses to seek new resources to be better prepared, in their role as nurses, for all types of disasters. Responding to this lack of resources, the book focuses on the unique needs of babies and children. It is the first and only textbook on pediatric disaster preparedness to include both the physical and psychological effects of disaster. Key aspects covered include: the psychosocial differences in and how to approach children; family reunification; medications, supplies and equipment; and decontamination. Given its breadth of coverage, the book is well suited as a textbook for nursing classes, while also offering a valuable resource for nurses working in the field.
