Horse Racing Betting Secret System M C Horrocks, Introduction I must thank you for buying my book and appreciate any comments on the system. I have inserted my email address at the end of the book. Plus feel free to email me if you have any questions or need any help. This horse racing system took me approximately 12 months to computer model and test primarily around UK handicap horse races. This would have not been possible without my 10 years database of horse form and my I.T. computer skills. Handicap horse racing fascinates me I find it a great puzzle to solve and love form variables like weight, official rating and many more. This horse racing system has four simple steps that find winners daily and I have outlined tips to get more profit. I like using this system for betting singles and doubles which are lethal and produce massive profits! In the book I have covered a horse race in extensive detail so that you understand the system and how to apply the horse racing system to each race quickly and thus finding winners easily.

In this entertaining but substantive volume, two distinguished economists, who happen to be horseracing buffs, outline a tested strategy for placing bets that will increase the reader's chances of a happy outcome at the track. The authors are the first to point out that getting rich at the racetrack is unlikely. They do maintain, however, that with attention to their systematic approach, the racing fan can achieve the best possible chance at winning. In the process, the reader learns some of the most important measurement techniques in the social sciences, as well as the basic methods of market analysis.

The 10-second Customer Journey provides the playbook for growing and retaining customers in a landscape transformed by digital. Todd Unger, CXO of the American Medical Association, provides a step-by-step guide based on three decades of consumer marketing, advertising, digital product and digital marketing and commerce experience.
