Writing with Intent Margaret Atwood, 2009-04-21 From one of the world's most passionately engaged and acclaimed literary citizens comes *Writing with Intent*, the largest collection to date of Margaret Atwood's nonfiction, ranging from 1983 to 2005. Composed of autobiographical essays, cultural commentary, book reviews, and introductory pieces to great works of literature, this is the award-winning author's first book-length nonfiction publication in twenty years. Arranged chronologically, these writings display the development of Atwood's worldview as the world around her changes. Included are the Booker Prize -- winning author's reviews of books by John Updike, Italo Calvino, Toni Morrison, and others, as well as essays in which she remembers herself reading Virginia Woolf's *To the Lighthouse* at age nineteen, and discusses the influence of George Orwell's 1984 on the writing of *The Handmaid's Tale*. Atwood's New York Times Book Review piece that helped make Orhan Pamuk's *Snow* a bestseller can be found here, as well as a look back on a family trip to Afghanistan just before the Soviet invasion, and her Letter to America, written after September 11, 2001. The St. Martin's Guide to Writing Rise B. Axelrod,Charles R. Cooper,2010-01-26 This textbook provides instruction in college level rhetoric and writing. It offers readings, a research manual, a handbook and supports a range of approaches to teaching and learning, including collaboration, visual rhetoric, personal writing, writing about literature, writing in the community and the workplace, field research, portfolios, oral presentations, essay exams, and ESL. It contains step-by-step guides to writing specific kinds of essays -- remembering events, writing profiles, explaining a concept, finding common ground, arguing a position, proposing a solution, justifying an evaluation, speculating about

causes, and interpreting stories. Because so much college writing requires strong argumentation skills, four of the assignment chapters focus on argumentative writing, and a separate strategies chapter covers theses, reasons and support, counterarguments, and logical fallacies. Three full chapters on research give students useful strategies not only for conducting field, library, and Internet research, but also for evaluating sources; deciding whether to quote, paraphrase, or summarize; avoiding plagiarism; and documenting sources. The authors have included 39 readings by well-known authors and various fresh voices, including 12 students, providing well-written examples of the different types of essays and papers that students might be asked to complete.
