Robot Building for Beginners, Third Edition David Cook,2015-09-02 I wrote this book because I love building robots. I want you to love building robots, too. It took me a while to learn about many of the tools and parts in amateur robotics. Perhaps by writing about my experiences, I can give you a head start.--David Cook Robot Building for Beginners, Third Edition provides basic, practical knowledge on getting started in amateur robotics. There is a mix of content: from serious reference tables and descriptions to personal stories and humorous bits. The robot described and built in this book is battery powered and about the size of a lunch box. It is autonomous; that is, it isn't remote controlled. The book is broken up into small chapters, suitable for bedtime (or bathroom) reading. The characteristics and purposes of each major component (resistor, transistor, wire, and motor) are described, followed by a hands-on experiment to demonstrate. Not only does this help the reader to understand a particular piece, but it also prepares them with processes to learn new parts on their own. An appendix offers an introduction to 3D printing and parts of the robot can, as an alternative, be printed using a 3D printer. The master project of the book is a simple, entertaining, line-following robot.

Exploring Physical Science in the Laboratory John T. Salinas ,2019-02-01 This full-color manual is designed to satisfy the content needs of either a one- or two-semester introduction to physical science course populated by nonmajors. It provides students with the opportunity to explore and make sense of the world around them, to develop their skills and knowledge, and to learn to think like scientists. The material is written in an accessible way, providing clearly written procedures, a wide variety of exercises from which instructors can choose, and real-world examples that keep the content engaging. Exploring Physical Science in the Laboratory guides students through the mysteries of the observable world and helps them develop a clear understanding of challenging concepts.
