IBM Power 750 and 760 Technical Overview and Introduction

Scott Vetter,James Cruickshank,Sorin Hanganu,Volker Haug,Stephen Lutz,John T Schmidt,Marco Vallone,IBM Redbooks,2013-06-24 This IBM® Redpaper™ publication is a comprehensive guide covering the IBM Power 750 and Power 760 servers supporting IBM AIX®, IBM i, and Linux operating systems. The goal of this paper is to introduce the major innovative Power 750 and Power 760 offerings and their prominent functions: The IBM POWER7+™ processor is available at frequencies of 3.1 GHz, 3.4 GHz, 3.5 GHz, and 4.0 GHz. The larger IBM POWER7+ Level 3 cache provides greater bandwidth, capacity, and reliability. The newly introduced POWER7+ dual chip module (DCM). New 10GBase-T options for the Integrated Multifunction Card that provides two USB ports, one serial port, and four Ethernet connectors for a processor enclosure and does not require a PCI slot. New IBM PowerVM® V2.2.2 features, such as 20 LPARs per core. The improved IBM Active Memory™ Expansion technology provides more usable memory than is physically installed in the system. Professionals who want to acquire a better understanding of IBM Power Systems™ products should read this paper. This Redpaper expands the current set of IBM Power Systems documentation by providing a desktop reference that offers a detailed technical description of the 750 and 760 systems. This paper does not replace the latest marketing materials and configuration tools. It is intended as an additional source of information that, together with existing sources, may be used to enhance your knowledge of IBM

server solutions. For additional reading: A Technote is available that explains the performance architecture of this server. It is of interest to those migrating workloads from existing Power 750 servers. It can be found at: Architecture of the IBM POWER7+ Technology-Based IBM Power 750 and IBM Power 760 Technote

Imperialism and Popular Culture John M. MacKenzie,2017-03-01
Popular culture is invariably a vehicle for the dominant ideas of its age. Never was this more true than in the late-19th and early 20th

centuries, when it reflected the nationalist and imperialist ideologies current throughout Europe. This text examines the various media through which nationalist ideas were conveyed in late-Victorian and Edwardian times - in the theatre, ethnic shows, juvenile literature, education and the iconography of popular art. Several chapters look beyond World War I, when the most popular media, cinema and broadcasting, continued to convey an essentially late-19th-century world view, while government agencies like the Empire Marketing Board sought to convince the public of the economic value of empire. Youth organizations, which had propagated imperialist and militarist attitudes before the war, struggled to adapt to the new internationalist climate.
