Word Morphology and Written Language Acquisition: Insights from Typical and Atypical Development in Different Orthographies Lynne G. Duncan, Daniela Traficante, Maximiliano A.

Wilson, 2019-06-05 This Research Topic explores the processing of morphemes, the smallest units of language that bear meaning and that combine to form more complex words. The articles gathered under this Research Topic investigate typical and atypical morphological processing by children and adolescents in ten different languages. These articles provide cross-linguistic and cross-script evidence of the early sensitivity of children to the morphemic structure of words, irrespective of whether they are struggling readers or typically developing. All in all, the collection allows for a better understanding of how morphological processing skills develop, providing valuable clues as to how this competence can be used as a tool to improve literacy acquisition in struggling readers.

DOM Scripting Jeremy Keith, Jeffrey Sambells, 2011-08-07 With this second edition of the popular DOM Scripting: Web Design with JavaScript and the Document Object Model comes a modern revision to update best practices and guidelines. It includes full coverage of HTML5 in a new, dedicated chapter, and details on JavaScript libraries and how they can help your scripting. The book provides everything you'll need to start using JavaScript and the Document Object Model to enhance your web pages with client-side dynamic effects and user-controlled animation. It shows how JavaScript, HTML5, and Cascading Style Sheets (CSS) work together to create usable, standards-compliant web designs. We'll also cover cross-browser compatibility with DOM scripts and how to make sure they degrade gracefully when JavaScript isn't available. DOM Scripting: Web Design with JavaScript and the Document Object Model focuses on JavaScript for adding dynamic effects and manipulating page structure on the fly using the Document Object Model. You'll start with a crash course in JavaScript and the DOM, then move on to several real-world examples that you'll build from scratch, including dynamic image galleries and dynamic menus. You'll also learn how to manipulate web page styles using the CSS DOM, and create markup on the fly. If you want to create websites that are beautiful, dynamic, accessible, and standards-compliant, this is the book for you!

The D Programming Language Andrei Alexandrescu, 2010-06-02 D is a programming language built to help programmers address the challenges of modern software development. It does so by fostering modules interconnected through precise interfaces, a federation of tightly integrated programming paradigms, language-enforced thread isolation, modular type safety, an efficient memory model, and more. The D Programming Language is an authoritative and comprehensive introduction to D. Reflecting the author's signature style, the writing is casual and conversational, but never at the expense of focus and precision. It covers all aspects of the language (such as expressions, statements, types, functions, contracts, and modules), but it is much more than an enumeration of features. Inside the book you will find In-depth explanations, with idiomatic examples, for all language features How feature groups support major programming paradigms Rationale and best-use advice for each major feature Discussion of cross-cutting issues, such as error handling, contract programming, and concurrency Tables, figures, and "cheat sheets" that serve as a handy quick reference for day-to-day problem solving with D Written for the working programmer, The D Programming Language not only introduces the D language—it presents a compendium of good practices and idioms to help both your coding with D and your coding in general.

Morph Mastery: A Morphological Intervention for Reading, Spelling and Vocabulary Louise

Selby,2021-07-29 *Morph Mastery* is an accessible, practical guide designed to support learners with specific learning difficulties (SpLD) who are struggling with spelling, reading and vocabulary. It is an effective, research-based and fun solution for when phonics-based teaching has run its course. Understanding the morphological regularities in English helps to support both spelling and reading comprehension, yet there are few practical interventions that take a morphological approach. *Morph Mastery* combines this exciting new approach with tried-and-tested teaching methods that work. The activities in this book follow three engaging ninja-like characters, Prefa, Root and Sufa, who represent the three core components of morphology (prefixes, root words and suffixes) and use their sceptres to craft words. Key features include: • Exciting and engaging activities and games, designed to be used by individuals or small groups • Detailed, curriculum-linked assessments, enabling specific target setting • Photocopiable and downloadable activity sheets and resources Written in a user-friendly tone, for teaching assistants, teachers and other professionals with little or no specialist knowledge, this book is a must for any school with struggling readers and writers aged 9–13.

Java: The Good Parts Jim Waldo,2010-04-29 What if you could condense Java down to its very best features and build better applications with that simpler version? In this book, veteran Sun Labs engineer Jim Waldo reveals which parts of Java are most useful, and why those features make Java among the best programming languages available. Every language eventually builds up crud, Java included. The core language has become increasingly large and complex, and the libraries associated with it have grown even more. Learn how to take advantage of Java's best features by working with an example application throughout the book. You may not like some of the features Jim Waldo considers good, but they'll actually help you write better code. Learn how the type system and packages help you build large-scale software Use exceptions to make code more reliable and easier to maintain Manage memory automatically with garbage collection Discover how the JVM provides portability, security, and nearly bug-free code Use Javadoc to embed documentation within the code Take advantage of reusable data structures in the collections library Use Java RMI to move code and data in a distributed network Learn how Java concurrency constructs let you exploit multicore processors

Imitation and Social Learning in Robots, Humans and Animals Chrystopher L. Nehaniv,Kerstin Dautenhahn,2007-03-29 Mechanisms of imitation and social matching play a fundamental role in development, communication, interaction, learning and culture. Their investigation in different agents (animals, humans and robots) has significantly influenced our understanding of the nature and origins of social intelligence. Whilst such issues have traditionally been studied in areas such as psychology, biology and ethnology, it has become increasingly recognised that a 'constructive approach' towards imitation and social learning via the synthesis of artificial agents can provide important insights into mechanisms and create artefacts that can be instructed and taught by imitation, demonstration, and social interaction rather than by explicit programming. This book studies increasingly sophisticated models and mechanisms of social matching behaviour and marks an important step towards the development of an interdisciplinary research field, consolidating and providing a valuable reference for the increasing number of researchers in the field of imitation and social learning in robots, humans and animals.

RoboCup 2002: Robot Soccer World Cup VI Gal A. Kaminka,Pedro U. Lima,Raul Rojas,2003-11-11 RoboCup 2002, the 6th Robot World Cup Soccer and Rescue Competitions and Conference, took place during June 19–25, 2002, at the Fukuoka Dome (main venue) in Fukuoka, Japan. It was, by far, the RoboCup event with the largest number of registered participants (1004 persons, distributed in 188 teams from 29

countries) and visitors (around 120,000 persons). As was done in its previous editions since 1997, the event included several robotic competitions and an international symposium. The papers and posters presented at the symposium constitute the main part of this book. League reports in the ?nal section describe significant advances in each league and the results. The symposium organizers received 76 submissions, among which 17 papers (22%) were accepted for oral presentation at the symposium (?rst section of the book), and 21 papers (29%) were accepted as posters (second section of the book). Most papers were evaluated by three reviewers each, chosen from the members of the International Program Committee (IPC). The IPC consisted of a balanced combination of regular RoboCup participants and researchers from outside this community. The reviewers worked hard to guarantee a fair review process – the result of their work was a high-quality symposium with very interesting presentations.

Universal Access and Assistive Technology Simeon Keates, Patrick Langdon, P. John Clarkson, Peter Robinson, 2013-06-29 The first Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT) was held at Trinity Hall, Cambridge, in March 2002. It was inspired by the earlier, highly successful Cambridge Workshops on Rehabilitation Robotics organised by the late Robin Jackson. Robin was the founder of Rehabilitation Research at Cambridge which now continues in the Engineering Design Centre within the Department of Engineering, led by John Clarkson and Simeon Keates, and in the Rainbow Group within the Computer Laboratory led by Peter Robinson. CWUAAT represents the first in a new series of workshops that we are aiming to hold every two years which, reflecting the spirit of recent moves to extend the rights for universal accessibility, will encourage discussion of a broad range of interests. There will be a general focus on product/solution development. Hence it is intended that the principal requirements for the successful design of assistive technology shall be addressed, where these range from the identification and capture of the needs of the users, through to the development and evaluation of truly usable and accessible systems for users with special needs. The best submissions received for the first CWUAAT are contained in this book, where the contributors are all leading researchers in the fields of Universal Access and Assistive Technology and represent a large part of the international research community. They include, though not exclusively, computer scientists, designers, engineers, industrial representatives, ergonomists and sociologists.
