*Handbook of Peer-to-Peer Networking* Xuemin Shen, Heather Yu, John Buford, Mursalin Akon, 2010-03-03 Peer-to-peer networking is a disruptive technology for large scale distributed applications that has recently gained wide interest due to the successes of peer-to-peer (P2P) content sharing, media streaming, and telephony applications. There are a large range of other applications under development or being proposed. The underlying architectures share features such as decentralization, sharing of end system resources, autonomy, virtualization, and self-organization. These features constitute the P2P paradigm. This handbook broadly addresses a large cross-section of current research and state-of-the-art reports on the nature of this paradigm from a large number of experts in the field. Several trends in information and network technology such as increased performance and deployment of broadband networking, wireless networking, and mobile devices are synergistic with and reinforcing the capabilities of the P2P paradigm. There is general expectation in the technical community that P2P networking will continue to be an important tool for networked applications and impact the evolution of the Internet. A large amount of research activity has resulted in a relatively short time, and a growing community of researchers has developed. The Handbook of Peer-to-Peer Networking is dedicated to discussions on P2P networks and their applications. This is a comprehensive book on P2P computing.

**Top 10 Habits That Will Change Your Life and Make You Successful** Tom Norman, 2017-01-24 Top 10 Habits That Will Change Your Life And Make You Successful Today only, get Top 10 Habits That Will Change Your Life And Make You Successful. Read on your PC, Mac, smart phone, tablet or Kindle device. This book contains proven steps and strategies on how you can be successful by building good habits essential to success. Successful people seem to be in complete control of their

lives. Do you know how they manage to keep focused? They seem to have plenty of things most people don't. If you really think about it and take the time to examine the lives of Sir Richard Branson, for instance, there is no huge secret to success. Successful people succeed because of good habits. Instead of simply knowing what to do, they do it. The question now is do you want to have a taste of sweet success? It all starts by reading this book. Here Is A Preview Of What You'll Learn... Always set effective goals Be SMART Write them down Manage your time Come up with a plan Finish what you start You must invest in yourself Have a balanced life Be positive Begin before you feel ready Much, much more! Always set effective goals Hugely successful people recognize the importance of effective goal setting. Goals are important because they help provide direction to your actions and decisions. Goals can help keep your efforts focused. You have to understand that goals are not simply defined as the things you want or expect to have or happen in your life. There is a huge difference between wants and goals. Determining what you want is essential in goal setting, but it is much more than defining your desires. Goal setting is a process. It involves looking at the big picture and at the same time, defining the specifics. You must carefully consider the things you really want. You must think about the things that mean a lot to you. You must realize that you need to put in effort to achieve these goals. In which case, it is crucial that the goals you set matter a lot to you. You tend to work harder for the things that you value most. Highly successful people have mastered goal setting. If you want a taste of success, you must also learn how to set goals effectively. Choose goals that give you motivation. As mentioned previously, it is important that you set your mind not only to the things that you simply want. Rather, your goals must be truly and personally important to you. There must be value in attaining them. That much must be clear to you. When you value your goals, the goals become an extra source of motivation for you to

work that much harder into achieving them. On the other hand, when you have little interest in a goal you set, you also have little interest in whether you succeed or fail in achieving the goal. It becomes much more difficult for you to realize those goals if they mean little or are personally irrelevant. You can ask any successful people you know and they can attest to the fact that the secret to achieving goals is motivation. Only those goals that are truly relevant to you can give you enough motivation. The Semantic Web – ISWC 2005 Yolanda Gil, 2005-11-04 This book constitutes the refereed proceedings of the 4th International Semantic Web Conference, ISWC 2005, held in Galway, Ireland, in November 2005. The 54 revised full academic papers and 17 revised industrial papers presented together with abstracts of 3 invited talks were carefully reviewed and selected from a total of 217 submitted papers to the academic track and 30 to the industrial track. The research papers address all current issues in the field of the semantic Web, ranging from theoretical aspects to various applications. The industrial track contains papers on applications in particular industrial sectors, new technology for building applications, and methodological and feasibility aspects of building industrial applications that incorporate semantic Web technology. Short descriptions of the top five winning applications submitted to the Semantic Web Challenge competition conclude the volume.
