Make Money Trading Jean Folger, Lee

Leibfarth, 2007 Want to be your own boss? Live independently? Take a more active role in managing your money? That's what a trading business can mean for you -- money, independence, and complete control over your finances. But without the proper education, about 90% of people will fail. That's why this book is essential to your trading success. Jean Folger and Lee Leibfarth present an organized, top to bottom look at what it means to start, run, and ultimately succeed at the business of trading. As active traders with over 15 years of teaching and coaching experience, Jean and Lee wrote this book specifically to give you unlimited access to all the tools and skills necessary to becoming a profitable, self-sufficient trader. Inside this book, you'll find information that will turn you from a spectator to a full-time pro

Creativity Models for Innovation in Management and Engineering Machado, Carolina, Davim, J.

Paulo, 2022-05-20 In today's competitive environments, only the most creative and innovative organizations are able to survive. These dynamic organizations continuously establish and develop strategies that leverage their creativity and their innovative abilities to attain long-term success and maintain their competitive edge. Further study on the uses and benefits of creative management in the business sector is required to ensure businesses not only survive but expand and flourish. Creativity Models for Innovation in Management and Engineering introduces innovative research on creativity and

innovation in the management and engineering fields and considers the importance of having resilient and inventive leaders in the competitive business world. Covering a wide range of topics such as business performance, knowledge management, entrepreneurship, and agribusiness, this reference work is ideal for engineers, managers, business owners, policymakers, academicians, researchers, practitioners, scholars, researchers, instructors, and students.

Managing Cultural Festivals Elisa

Salvador, Jesper Strandgaard Pedersen, 2022-02-13

This book aims at renewing the attention on a niche field, Cultural Festivals, so important for valorizing cultural traditions and local heritage visibility as well as social well-being. Following the disruptive consequences of the COVID-19 pandemic, this fragile sector deserves more attention from public authorities and stakeholders at national and European levels with a suitable and dedicated plan of recovery and valorization. This book provides a comparative analysis of Cultural Festivals in Europe, taking insights from an international range of high-level scholarly contributors. Individual chapters highlight and analyse challenges around the organisation, management and economics of Cultural Festivals. As a whole, the book provides a comprehensive overview of scholarly research in this area, setting the scene for the future research agenda. Matters related to educational programs and new audience development, as well as challenges related to digitalization, are also included. The book employs a tradition versus innovation lens to

help readers account for the consequences of the digital revolution, new audience development and an educational agenda. The result is a book which will be valuable reading for researchers, academics and students in the fields of event and cultural management and beyond. Chapters 4 and 9 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com. They have been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Investors Chronicle, 2007

Representation Theory and Complex Geometry Neil Chriss, Victor Ginzburg, 2009-12-24 The book is largely self-contained...There is a nice introduction to symplectic geometry and a charming exposition of equivariant K-theory. Both are enlivened by examples related to groups...An attractive feature is the attempt to convey some informal 'wisdom' rather than only the precise definitions. As a number of results [are] due to the authors, one finds some of the original excitement. This is the only available introduction to geometric representation theory...it has already proved successful in introducing a new generation to the subject. (Bulletin of the AMS)

Topics in Cohomological Studies of Algebraic Varieties Piotr Pragacz, 2006-03-30 The articles in this volume study various cohomological aspects of algebraic varieties: - characteristic classes of singular varieties; - geometry of flag varieties; - cohomological computations for homogeneous spaces; - K-theory of algebraic varieties; - quantum cohomology and Gromov-Witten theory. The main purpose is to give comprehensive introductions to the above topics through a series of friendly texts starting from a very elementary level and ending with the discussion of current research. In the articles, the reader will find classical results and methods as well as new ones. Numerous examples will help to understand the mysteries of the cohomological theories presented. The book will be a useful guide to research in the above-mentioned areas. It is addressed to researchers and graduate students in algebraic geometry, algebraic topology, and singularity theory, as well as to mathematicians interested in homogeneous varieties and symmetric functions. Most of the material exposed in the volume has not appeared in books before. How to Avoid Scams Tony Levene, 2008-07 Fraud is now commonplace with over 50% of the UK population targeted by criminals every year. Despite this alarming frequency, victims get minimal support from the authorities and often no recompense from insurers. How to Avoid Scams analyses common cases of fraud and rip-offs to alert readers to how they

are perpetrated, what to look out for, and what to do when you spot a scam.

The Zulu Principle Jim Slater, 2010 Jim Slater's classic text made available once more Jim Slater makes available to the investor - whether the owner of only a few shares or an experienced investment manager with a large portfolio - the secrets of his success. Central to his strategy is The Zulu Principle, the benefits of homing in on a relatively narrow area. Deftly blending anecdote and analysis, Jim Slater gives valuable selective criteria for buying dynamic growth shares, turnarounds, cyclicals, shells and leading shares. He also covers many other vitally relevant aspects of investment such as creative accounting, portfolio management, overseas markets and the investor's relationship with his or her broker. From The Zulu Principle you will learn exactly when to buy shares and, even more important, when to sell - in essence, how to make 'extraordinary profits from ordinary shares'.

Run_frictionless: How to Free a Founder from a Sale Role Anthony Coundouris,2019-01-17
run frictionless helps founders scale out of a sales role, using a decision-making framework called the 4Qs.The mistake founders and high performing salespeople make is trying to scale up the business by replacing themselves with another human being. Simply, there isn't another human like you looking for a job. Those who are good at selling are busy doing their own startup, not working for you. Scale up a business and free the founder of sales role There are a few things you can try to free a founder from a sales role. One. Don't worry, keep growing. Two. Stop growing the business. Or three, hire a replacement. These are not effective! Over time they will fail you.run frictionless presents an alternative - an option nobody is talking about. Scaling the business with a sales system.A sales system spells out the formula required to make a customer, in a clearly understood sequence. It is similar to a sales funnel or sales process, only more comprehensive. It will tell you the precise number of interactions required to make a customer. If you serve small businesses, this could be 15 interactions. If you serve enterprise forms it could number 25 or more interactions. Predict sales. Distill a sale process to a handful of

customer interactions you can teach the whole organization. Win a customer, and know why you won that customer. Get more leads. The book offers several pre-designed customer flows to improve sales you can use right away. Imagine how much business you're turning away, simply because you're not starting conversations with customers the way they want. Better decision-making. If you are going to free the founder, staff have to learn to think like the founder. Make everyone accountable with an easy-to-use framework called the 4Qs. Sell 24/7. Automation moves the customers through a sales system even when the salesforce or founder is not at their desk. Scaling up the startup with a sales system A sales system is key to scaling up a startup. If staff follow the formula, you can predict the odds of creating a customer. Imagine a sales system as a series of dials. Turn the dials and you make an improvement. It is not uncommon to improve sales by 25 percent just by turning a dial. You didn't re-engineer the business or substitute staff. Building lasting sales teams Another benefit of a sales system is it augments your workforce. The best people are working on the highest value tasks, and other tasks can be carried out by less experienced folk. The intellectual property of how a customer is made is in the sales system. Each salesperson needs only understand the part of the system where they contribute. Design your own sales system run frictionless will teach you how to design a sales system, using a framework called the 4Qs. It doesn't matter if you are a fintech startup or a traditional medical practice operating for five

years. The 4Qs will take what you know intuitively and organize this knowledge into four powerful quadrants, making it easy to run frictionless.

COVID-19: Systemic Risk and Resilience Igor Linkov, Jesse M. Keenan, Benjamin D.

Trump, 2021-04-30 This book aims to provide a collection of early ideas regarding the results of applying risk and resilience tools and strategies to COVID-19. Each chapter provides a distinct contribution to the new and rapidly growing literature on the developing COVID-19 pandemic from the vantage points of fields ranging from civil and environmental engineering to public policy, from urban planning to economics, and from public health to systems theory. Contributing chapters to the book are both scholars and active practitioners, who are bridging their applied work with critical scholarly interpretation and reflection. The book's primary purpose is to empower stakeholders and decision-makers with the most recent research in order that they can better understand the systemic and sweeping nature of the COVID-19 pandemic, as well as which strategies could be implemented to maximize socioeconomic and public health recovery and adaptation over the long-term.

Pacific Crossing Guide Michael Briant, 2018-05-31 The Pacific Crossing Guide is intended to provide and overview of almost a years cruising between the Panama Canal and New Zealand or Australia. You have to fit the cruise into this time scale in order to avoid the various hurricane seasons in the South Pacific. The route outlined is the 'trade winds route' followed by the majority of

cruising boats on a circumnavigation, and although there are always off the beaten track islands and countries to visit until you get to the Cook Islands, there are relatively few alternatives. The Panama Canal is the Gateway to the Pacific so is covered in detail but probably the official 'dope' sheet is worth skipping until you actually drop the hook in Colon.

No! Never! Libby Hathorn, Lisa Hathorn-Jarman, 2022-05-17 Georgie is a sweet little girl who always makes her parents happy ... until she discovers one powerful phrase: No! Never! It suddenly becomes her answer to every request, from tidying up her toys to going to bed. Her parents are at their wits end, but what happens when they decide to try saying No! Never! themselves?

Louis Wain's Cats Chris Beetles, 2021-11-04 'Louis Wain invented a cat style, a cat society, a whole cat world'. Broadcast in 1925 by H.G. Wells, these words characteristically foretold the future of the Wain cat which has, once more, become the century's most recognisable image in cat art. During their heyday, in the time before the First World War, Louis Wain's cats, dressed as humans, portrayed that stylish Edwardian world having fun: at restaurants and tea parties, going to the Race and the Seaside, celebrating at Christmas and Birthdays, and disporting themselves with exuberant games of tennis, bowls, cricket and football. This is a titillating world of cats at play, uninhibited and slightly dangerous, with most group activities likely to turn into mishap, mayhem and catastrophe. This is Wain's world, funny, edgy and animated: a whole cat world. The

first comprehensive exhibition of Wain's work was held at the Victoria and Albert Museum in London in 1972 and, since then, Louis Wain has steadily become more fashionable, and collected worldwide. This biography contains 300 plates of richness and variety, all of which are reproduced faithfully from the original artwork. This book is jointly published by Chris Beetles Ltd and Canongate Books.

Determinants of Remittances: Recent Evidence Using Data on Internal Migrants in Vietnam Thai Hung Pham, Barry Reilly, Yoko Niimi, 2008 Abstract: This paper examines the determinants of remittance behavior for Vietnam using data from the 2004 Vietnam Migration Survey on internal migrants. It considers how, among other things, the vulnerability of a migrant's life at the destination, their link to relatives back home, and the time spent at the destination affect remittances. The paper finds that migrants act as risk-averse economic agents and send remittances back to the household of origin as part of an insurance exercise in the face of economic uncertainty. Remittances are also found to be driven by a migrant's labor market earnings level. The paper highlights the important role of remittances in providing an effective means of risk-coping and mutual support within the family.
