**Achtung-Panzer!** Heinz Guderian, 1995 This is one of the most significant

military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Moon-face and Other Stories** Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways - robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903),

which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

**Ada 95** David A. Wheeler, 2012-12-06 Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader

has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.

**The Common Body** Paula Josa-Jones, 2017 In this fascinating book, dancer, choreographer, and visual artist Paula Josa-Jones combines her two greatest passions--movement and horses--in order to help us develop somatic awareness: Consciousness of breath, integrated and coherent motion, and development of movements and touch into sensitive channels of communication. Through stories

and exercises, Josa-Jones demonstrates how connecting with the horse can develop this awareness. The body and mind of the horse and the human, she writes, are connected at the deepest levels--anatomically, energetically, psychically, spiritually, and emotionally. And because horses are authentic beings--their inside feelings and intentions match the outside expression and behavior--our interactions with them can help us become more aware of our inner emotional landscape and its relationship to what we are expressing outwardly. Horses offer us the opportunity to become more trustworthy and more comfortable in our own skin. By listening inwardly, feeling the connections between our mind states and our expression, we become more attuned to the currents passing among us, more able to blend, empathize, and act with balance, sensitivity, and kindness.
