Scalable Network Monitoring in High Speed Networks Baek-Young Choi, Zhi-Li Zhang, David Hung-Chang Du, 2011-06-14 Network monitoring serves as the basis for a wide scope of network, engineering and management operations. Precise network monitoring involves inspecting every packet traversing in a network. However, this is not feasible with future high-speed networks, due to significant overheads of processing, storing, and transferring measured data. Network Monitoring in High Speed Networks presents accurate measurement schemes from both traffic and performance perspectives, and introduces adaptive sampling techniques for various granularities of traffic measurement. The techniques allow monitoring systems to control the accuracy of estimations, and adapt sampling probability dynamically according to traffic conditions. The issues surrounding network delays for practical

performance monitoring are discussed in the second part of this book. Case studies based on real operational network traces are provided throughout this book. Network Monitoring in High Speed Networks is designed as a secondary text or reference book for advanced-level students and researchers concentrating on computer science and electrical engineering. Professionals working within the networking industry will also find this book useful.

Autonomic Networking-on-Chip Phan Cong-Vinh, 2018-09-03 Despite the growing mainstream importance and unique advantages of autonomic networking-on-chip (ANoC) technology, *Autonomic Networking-On-Chip: Bio-Inspired Specification, Development, and Verification* is among the first books to evaluate research results on formalizing this emerging NoC paradigm, which was inspired by the human nervous system. *The FIRST Book to Assess Research Results, Opportunities, & Trends in BioChipNets* The third book in the *Embedded Multi-Core Systems* series from CRC Press, this is an advanced technical guide and reference composed of contributions from prominent researchers in industry and academia around the world. A response to the critical need for a global information exchange and dialogue, it is written for engineers, scientists, practitioners, and other researchers who have a basic understanding of NoC and are now ready to learn how to specify, develop, and verify ANoC using rigorous approaches. *Offers Expert Insights Into Technical Topics Including: Bio-inspired NoC How to map applications onto ANoC ANoC for FPGAs and structured ASICs Methods to apply formal methods in ANoC development Ways to*

formalize languages that enable ANoC Methods to validate and verify techniques for ANoC Use of self- processes in ANoC (self-organization, configuration, healing, optimization, protection, etc.) Use of calculi for reasoning about context awareness and programming models in ANoC With illustrative figures to simplify contents and enhance understanding, this resource contains original, peer-reviewed chapters reporting on new developments and opportunities, emerging trends, and open research problems of interest to both the autonomic computing and network-on-chip communities. Coverage includes state-of-the-art ANoC architectures, protocols, technologies, and applications. This volume thoroughly explores the theory behind ANoC to illustrate strategies that enable readers to use formal ANoC methods yet still make sound judgments and allow for reasonable justifications in practice.

The Promise of Technology in Schools Charles K. Stallard, Julie S. Cocker, 2001-11-13 How can educators survive in the whirlwind restructuring and reform caused by the digital age? Will the impact of information technology improve learning, and how? The Promise of Technology in Schools answers these questions, by surveying the next 20 years in education. First, Stallard examines why the transfer of technology to education has taken so long and has been so difficult to accomplish. Then, he examines what challenges educators will face, how technology will affect school organization, why the K-12 education market is so important, and more.

Ganga Rejuvenation: Governance Challenges And Policy Options Wu Xun, Wasson Robert James, Poocharoen Ora-orn, 2017-10-26 This book focuses on governance and management issues in the much publicized 'Ganga Rejuvenation Project', led by the Indian Prime Minister Mr. Narendra Modi. Attempts over the past three decades to clean up and rejuvenate one of the world's greatest rivers have proved futile. The major reasons for the lack of success are absence of long-term planning, poor co-ordination and failure to sustain whatever little

infrastructure for water and sewage treatment could be developed. Focusing on these broad aspects, the book explores spaces for better governance through active community participation, knowledge management, prospects of Public-Private-Partnership, e-governance, youth education, waterfront development, lessons from past failures, comparative international analogies, utilization of external aid and global expertise in successful implementation of a sustainable long-term plan for a river basin's integrated development of both the economy and environment. A host of activities, such as, improving pollution monitoring systems, new development plans for tourism enhancement; river dredging and sewerage riparian cities are already being carried in the hope of quick results. The Government of India has also appointed a task force for preparation of a long-term strategy. However, substantial knowledge gaps persist especially with regard to governance. This book aims to address the governance and policy issues and will be a very timely contribution to cleaning as well as rejuvenating Ganga, a river that is lifeline of millions of people. Contents: Introduction Historical Evaluation of Ganga Action Plans (Dawa Tshering, Denny Ariaputra, Soh Siew Luie, Tashi Tobgay and Wang Nian) Forming a Broad Umbrella: Facilitating Inter- and Intra-State Coordination (Hlaing Myat, Lay Sopagna, Sirilak Kakanopas, Soe Myint Aung, Visvanathakkurukkal Sokkanathan and Joost Buurman) Educating the Youth: Facilitating a Sustainable Transformation of Ganga (Low Lay Chin, Mark McKiernan, May Yu Lwin, Siow Boon Teik, Erwin and Thamil Selvan
