*Sam the Man & the Cell Phone Plan* Frances O'Roark Dowell,2019-06-04 Sam Graham wants a cell phone to help him with his research, but when his parents say no, he has to come up with another way to keep all the info he needs in his pocket in this hilarious fifth chapter book in the Sam the Man series from Frances O'Roark Dowell. Here are the facts: Sam Graham is an information man. But to get information, you need to do research. You never know when you'll need an urgent piece of info—like, say, the number for a chicken emergency hotline—so a resource for instant research is a must! This is why Sam needs a cell phone. Unfortunately, Mom and Dad disagree. So, Sam has to come up with a plan. But what is small enough to fit in your pocket and can hold all the information you need? Sam will have to go old-school with his latest plan and use a handy notebook instead. Luckily, retro is in, and a la Nick in Andrew Clements's Frindle, Sam might just start the latest trend!

*The Threat From Within* Gilbert Lewis,2019-12-11 The Threat From Within By: Gilbert Lewis The ISIS high command is angry that the hostage operation has failed. They conclude that their main obstacle is the MI6 operative, Estella "Rose" Mathews. Rose and a combined team of British and French Special Forces successfully rescued the six hostages from England, France, and the United States. After the hostages were

successfully rescued, ISIS now plans an attack using their western fighters. Again, these attacks are prevented by western intelligence agencies. ISIS has now moved its attack to the America Homefront. MI6 assigns Rose to the CIA. The CIA, in turn, assigned Rose to work covertly with the American company White Mountain Analytics (WMA). ISIS develops a fool-proof-plan to kill Rose. They have posted a “kill contract” on the darknet to assassinate Rose. The posting of the “kill contract” is answered by Adolf Wolfgang (Wolf) Schneider. Wolf was in the Marines and was given a dishonorable discharge. He blames his being booted from the Marines on a black captain. Wolf grew up in Kentucky with a father who blamed all of his failures on the “blacks.” Wolf grew up in an environment of “White Supremacy” thus, him being booted from the Marines only strengthen his hatred for Negros, slant eyes and beaners. Upon being booted from the Marines, Wolf found his way to KKK camps in Montana and Tennessee. Within two years he was the top dog. The KKK camp sells drugs brought in illegally from Mexico. Wolf quickly spreads the KKK enterprise to gun running and prostitution. Wolf’s expertise is “sniper” kills. His motto is “One Shot, One Kill.” He learned the trade in the Marines. When Wolf answered the post to kill Rose, he already had completed kills on mafia rats, crooked politicians, and police officers who have not honored their contract to the mafia. So far, he finds it easy money. Each kill brings in an average of \$100K. Wolf checks on the darknet monthly for easy kills. His contract to kill Rose is \$600K. The story unfolds as Rose is tipped off that there is a kill contract on her life. Rose and members of WMA determine that the assassin is a member of a White Nationalist camp in Tennessee. The WMA team discovers that the camp is involved in illicit drugs, opioids, gun-running, and forced prostitution. When the prostitutes are no longer needed, they use them in snuff movies. Rose and her team of experienced special operations personnel and the FBI engage in a long siege. As the siege continues, President Trout in his rallies is bad-mouthing the FBI. The crowd surrounding the White Nationalist camp is turning against Rose and the FBI. They must quickly and carefully attack and turn the general public against the tide of support for these domestic terrorists.

**An Evaluation of an Automatic Cell Detection and Tracking Algorithm** James G. Wiener, 1982 A storm tracking algorithm designed to detect and track fine structure in digitized radar data is evaluated. These fine structures are defined by regions containing values within 3 dB of peaks in reflectivity factor. The algorithm describes storm structure and evolution by correlating these peak regions in time and space. The evaluation consists of a comparison of the algorithm output with raw data and with output from an AFGL algorithm which detects and tracks three-dimensional reflectivity weighted centroids defined by a preselected threshold. It is concluded that the algorithm cannot reliably detect and track significant structures within storms when applied to data sets with a temporal resolution of approx. 6 min and a spatial resolution of 1.0 deg in azimuth and 0.7 deg in elevation. The significance of tracking 3 dB peaks is questioned and the implication of defining a larger peak threshold is discussed. The algorithm does track the large features of storms with results similar to the AFGL algorithm. However, it does not run in real time and is not modular, unlike the AFGL algorithm.

Mobile Entity Localization and Tracking in GPS-less Environments Richard Fuller, Xenofon D. Koutsoukos, 2009-09-11 This book constitutes the refereed proceedings of the second International Workshop on Mobile Entity Localization and Tracking in GPS-less Environments, MELT, held in Orlando, Florida, USA, in September 2009 in conjunction with the 11th International Conference on Ubiquitous Computing (Ubicomp 2009). MELT is a forum for the state-of-the-art technologies in mobile localization and tracking and novel applications of location-based services. The research contributions in these proceedings cover significant aspects of localization and tracking of mobile devices that include techniques suitable for smart phones and mobile sensor networks in both outdoor and indoor environments using diverse sensors and radio signals. Novel theoretical methods, algorithmic design and analysis, application development, and experimental studies are presented in 14 papers that were reviewed carefully by the program committee. In addition, three invited papers, with topics on location determination using RF systems, Cramer-Rao-Bound analysis for indoor localization and approaches targeting mobile sensor networks, are also included in the proceedings.
