**United States Transportation Command** Danita L. Hunter, United States. Transportation Command, 1997 Throughout the history of the United States, when the need arose for the nation to move its military forces from point A to point B, the Army, Navy, Marines and Air Force deployed unilaterally. There was no single point of contact for transportation. If an Army unit had to move from Fort Bragg, NC, to Stuttgart, Germany, for example, their equipment might go by rail to Charleston, SC, where it would be taken by sea to Antwerp, Belgium. There, it would be unloaded from the ship and placed on a train and taken by rail to Stuttgart. From there it would be again unloaded and reloaded on a truck to be taken to the final destination. The people in the unit would travel by bus to

the airport, fly to Frankfurt, get bussed to Stuttgart, and wait for their equipment to arrive. For many, many years a move such as this, which happens routinely, required the unit transportation officer to coordinate with people in the other services and civilian transportation companies to route the passengers and equipment from the origin through many transportation systems to arrive at the final destination. Whether or not it would all arrive safely could not readily be determined while the cargo was in transit. Today, that whole scenario is taken care of with one phone call. The transportation officer simply picks up the phone and dials 1-800-USTRANSCOM to arrange for all of the people and cargo to be transported from Fort Bragg to Stuttgart. All of the coordination still must be accomplished for the equipment and people to reach their final destination, but now the professionals at U.S. Transportation Command (USTRANSCOM) and its Transportation Component Commands -- the Air Force's Air Mobility Command, the Army's Military Traffic Management Command, and the Navy's Military Sealift Command -- take care of the details. This monograph chronicles the creation of USTRANSCOM and its involvement in military operations, military exercises, and humanitarian and relief efforts from 1987 to 1997.--Abstract.

**The 9/11 Commission Report** Thomas R. Eldridge,Susan Ginsburg,Walter T. Hempel II,Janice L. Kephart,Kelly Moore,Joanne M. Accolla,The National Commission on Terrorist Attacks Upon the United States,2018-02-05 It is perhaps obvious to state that terrorists cannot plan and carry out attacks in the United States if they are unable to enter the country. Yet prior to September 11, while there were efforts to enhance border security, no agency of the U.S. government thought of border security as a tool in the counterterrorism arsenal. Indeed, even after 19 hijackers demonstrated the relative ease of obtaining a U.S. visa and gaining admission into the United States, border security still is not considered a cornerstone of national security policy. We believe, for reasons we discuss in the following pages, that it must be made one. Contents: A Factual Overview of the September 11 Border Story The September 11 Travel Operation – a Chronology Terrorist Entry and Embedding Tactics, 1993-2001 The Redbook Terrorist Travel Tactics by Plot Al Qaeda's Organizational Structure for Travel and Travel Tactics Immigration and Border Security Evolve, 1993 to 2001 The Intelligence Community The State Department The Immigration and Naturalization Service Planning and Executing Entry for the 9/11 Plot The State Department The Immigration and Naturalization Service Finding a Fair Verdict Crisis Management and Response Post-September 11 The Intelligence Community The Department of State The Department of Justice Response at the Borders, 9/11-9/20, 2001 The Department of

**Politics of Command** John Nelson Rickard, 2010-03-20 In December 1943, Lieutenant-General A.G.L. McNaughton resigned from command of the 1st Canadian Army amidst criticism of his poor generalship and of his abrasive personality. Despite McNaughton's importance to the Canadian Army during the first four years of the Second World War, little has been written about the man himself or the circumstances of his resignation. In *The Politics of Command*, the first full-length study of the subject since 1969, John Nelson Rickard analyses McNaughton's performance during Exercise SPARTAN in March 1943 and assesses his relationships with key figures such as Sir Alan F. Brooke, Bernard Paget, and Harry Crerar. This detailed re-examination of McNaughton's command argues that the long-accepted reasons for his relief of duty require extensive modification. Based on a wide range of sources, *The Politics of Command* will redefine how military historians and all Canadians look at not only Andy McNaughton but also the Canadian Army itself.
