The Web Files Margie Palatini, 2001-05-01 6:32 a.m. This is the farm. My partner, Bill, and I were working the barnyard shift. It was peaceful. Quiet. Then we got the call. Much of this fowl-filled homage to Dragnet (DUM DE DUM DUM!) will be lost on kids--and a few grownups, for that matter. But that doesn't make this straight-faced send-up of that famous crime-partner show--and a dozen-odd fairytales thrown in for good measure--any less funny. So you're saying you were robbed, is that right, ma'am? What exactly is missing from the nest, ma'am? Eggs, ma'am? Chicks, ma'am? But it turns out that it's peppers that have gone missing--a peck of perfect purple, almost-pickled peppers. But nobody was talking: We had Horner in the corner and were trying to make Little Boy Blue quack. Then our intrepid pair of web-footed investigators gets a break in the case when a tub of tartest tasty tomahto turns up missing. DUM DE DUM DUM! It's just more wit from the wonderful Margie Palatini, who brought us Piggie Pie and Zoom Broom,

backed up on this assignment by the spirited illustrations of Richard Egielski. (Ages 4 to 8)--Paul Hughes

Renewable Energy Sources Tasneem Abbasi, S. A.

Abbasi, 2011-07-30 Today, the tide has turned so strongly in favour of renewables that for the first time since the dawn of the fossil fuel era over two hundred years ago renewable energy technologies have started attracting more investment globally than that in the fossil fuel-based technologies. This text provides a comprehensive and wide ranging introduction to various renewable energy technologies and their applications, such as solar, wind, biomass, biogas, wave, geothermal, tidal and small hydel. It provides a thorough understanding of the basic energy conversion processes taking place in various renewable energy-based equipment like heat engines, photovoltaics, wind turbines, windmills, wave machines, and so on. The text also deals with the impact of renewable energy sources on global warming and pollution. The book is intended for courses in Environmental Sciences, Environmental/Electrical/Mechanical Engineering and Energy Studies at the undergraduate and postgraduate levels. It will also serve as a useful reference for scientists, technocrats and environmentalists.

Remaking the City John Pipkin, Mark La Gory, Judith R.

Blau, 1983-01-01 This book pulls together a variety of perspectives on urban form and urban design. It contains invited contributions by well-known architects, economists, geographers, sociologists, and planners, fostering a much-needed dialogue between practitioners and theorists of urban planning. The contributions provide inclusive reviews of the state-of-the-art in various fields, as well as develop original and sometimes controversial new ideas. As a whole, they cut across some of the key conceptual lines of demarcation in urban research: The distinct concerns of architects, planners, social scientists and practitioners are probed; cognitive and semiotic perspectives on urban form are contrasted; and the

merits of individualistic versus structural explanation are discussed.
