Computational Ship Design Myung-II Roh, Kyu-Yeul Lee, 2017-09-29 This book offers an introduction to the fundamental principles and systematic methodologies employed in computational approaches to ship design. It takes a detailed approach to the description of the problem definition, related theories, mathematical formulation, algorithm selection, and other core design information. Over eight chapters and appendices the book covers the complete process of ship design, from a detailed description of design theories through to cutting-edge applications. Following an introduction to relevant terminology, the first chapters consider ship design equations and models, freeboard calculations, resistance prediction and power estimation. Subsequent chapters cover topics including propeller

design, engine selection, hull form design, structural design and outfitting. The book concludes with two chapters considering operating design and economic factors including construction costs and fuel consumption. The book reflects first-hand experiences in ship design and R&D activities, and incorporates improvements based on feedback received from many industry experts. Examples provided are based on genuine case studies in the field. The comprehensive description of each design stage presented in this book offers guidelines for academics, researchers, students, and industrial manufactures from diverse fields, including ocean engineering and mechanical engineering. From a commercial point of view the book will be of great value to those involved in designing a new vessel or improving an existing ship.

Dar Al Islam--the Mediterranean, the World System and the Wider Europe Peter Herrmann, Arno Tausch, 2005 With the process of a 'wider Europe' (EU-Commission President Romano Prodi's 'ring of friends') that extends from Marrakech in Morocco to St Petersburg in Russia gathering speed, the growing rift between Europe and America also is about how to deal politically with the countries of the Mediterranean-Muslim world. The house of Islam (Dar al Islam) was pivotal to the European path to the Renaissance and to the re-discovery of classic Greek philosophy. The Mediterranean policy of the European Union aims at a positive and co-operative relationship with the region. A successful integration of the Mediterranean South would have tremendous and positive repercussions for regional and world peace. World-wide leading experts from the field of world systems analysis, economics, integration theory, political science, theology and area studies, agnostics, Christians, Jews and Muslims alike discuss the issue with European decision

makers. The outcome is an interdisciplinary evaluation of this projected export of peace, co-operation, dialogue and stability in the framework of world centre-periphery relationships.

Evolutionary Developmental Biology of Invertebrates 2 Andreas

Wanninger, 2015-08-10 This multi-author, six-volume work summarizes our current knowledge on the developmental biology of all major invertebrate animal phyla. The main aspects of cleavage, embryogenesis, organogenesis and gene expression are discussed in an evolutionary framework. Each chapter presents an in-depth yet concise overview of both classical and recent literature, supplemented by numerous color illustrations and micrographs of a given animal group. The largely taxon-based chapters are supplemented by essays on topical aspects relevant to modern-day EvoDevo research such as regeneration, embryos in the fossil record, homology in the age of genomics and the role of EvoDevo in the context of reconstructing evolutionary and phylogenetic scenarios. A list of open questions at the end of each chapter may serve as a source of inspiration for the next generation of EvoDevo scientists. *Evolutionary Developmental Biology of Invertebrates* is a must-have for any scientist, teacher or student interested in developmental and evolutionary biology as well as in general invertebrate zoology. This volume covers the animals that have a ciliated larva in their lifecycle (often grouped together as the Lophotrochozoa), as well as the Gnathifera and the Gastrotricha. The interrelationships of these taxa are poorly resolved and a broadly accepted, clade-defining autapomorphy has yet to be defined. Spiral cleavage is sometimes assumed to be the ancestral mode of cleavage of this grouping and therefore the clade is referred to as Spiralia by some authors, although others prefer to extend the term Lophotrochozoa to this entire assemblage. Aside

from the taxon-based chapters, this volume includes a chapter that highlights similarities and differences in the processes that underlie regeneration and ontogeny, using the Platyhelminthes as a case study.

Alternative Programs for Disruptive Youth Marie Angele Thomas, David A. Sabatino, Rosemary C. Sarri, 1982 The book addresses issues in meeting the educational needs of disruptive students. In the introduction, R. Sarri examines the rise of alternative schools and discusses common elements in their design and operation. D. Sabatino follows with *Issues and Concerns: Problems with Alternative Schools*, in which he examines the particular difficulties involved in evaluating alternative programs. Four alternative programs are described in depth: Learning Center II, a program administered jointly by the local education agency and the Washington State Juvenile Rehabilitation Division; Bellefaire School (Cleveland, Ohio), an integrated program of group living, education, and psychotherapy; Longfellow Education Center (Minneapolis, Minnesota), designed for multiply handicapped students with severe emotional disturbances; and Special People Realizing Individual New Goals (Atlanta, Georgia), an approach to teaching survival skills to senior high disturbed students. Brief overview descriptions of 12 additional alternative programs are presented: SAIL Project (Student Advocates Inspire Learning) in Minnetonka, MN; the Starr Commonwealth Schools Alternative Education Program (Van Wert, OH); Delta County Education Center (Gladstone, MI); Chana High School (Auburn, CA); Wallbridge Academy (Grand Rapids, MI); Horizons High School (Wyoming, MI); Kansas City Youth Diversion Project (Kansas City, MO); LIFE Center (Albuquerque, NM); Alternative Program (State College, PA); William Smith High School (Aurora, CO); Partners School (Denver, CO);

and Project CITE (Crisis Intervention Techniques for Education) in Terrell, TX. (CL)
