India in Translation Through Hindi Literature Maya Burger,Nicola Pozza,2010 What role have translations from Hindi literary works played in shaping and transforming our knowledge about India? In this book, renowned scholars, translators and Hindi writers from India, Europe, and the United States offer their approaches to this question. Their articles deal with the political, cultural, and linguistic criteria germane to the selection and translation of Hindi works, the nature of the enduring links between India and Europe, and the reception of translated texts, particularly through the perspective of book history. More personal essays, both on the writing process itself or on the practice of translation, complete the volume and highlight the plurality of voices that are inherent to any translation. As the outcome of an international symposium held at the University of Lausanne, Switzerland, in 2008, India in Translation through Hindi Literature engages in the building of critical histories of the encounter between India and the «West», the use and impact of translations in this context, and Hindi literature and culture in connection to English (post)colonial power, literature and culture.

Krishna Edwin F. Bryant,2007-06-18 In the West Krishna is primarily known as the speaker of the Bhagavad Gita. But it is the stories of Krishna's childhood and his later exploits that have provided some of the most important and widespread sources of religious narrative in the Hindu religious landscape. This volume brings together new translations of representative samples of Krishna religious literature from a variety of genres -- classical, popular, regional, sectarian, poetic, literary, and philosophical.

Translation as Scholarship Jay Crisostomo,2019-01-14 In the first half of the 2d millennium BCE, translation occasionally depicted semantically incongruous correspondences. Such cases reflect ancient scribes substantiating their virtuosity with cuneiform writing by capitalizing on phonologic, graphemic, semantic, and other resemblances in the interlingual space. These scholar-scribes employed an essential scribal practice, analogical hermeneutics, an interpretative activity grounded in analogical reasoning and empowered by the potentiality of the cuneiform script. Scribal education systematized such practices, allowing scribes to utilize these habits in copying compositions and creating translations. In scribal education, analogical hermeneutics is exemplified in the word list Izi, both in its structure and in its occasional bilingualism. By examining Izi as a product of the social field of scribal education, this book argues that scribes used analogical hermeneutics to cultivate their craft and establish themselves as knowledgeable scribes. Within a linguistic epistemology of cuneiform scribal culture, translation is a tool in the hands of a knowledgeable scholar.

Zoroastrian Scholasticism in Late Antiquity Zeini Arash Zeini,2020-02-03 Examines Zoroastrian exegesis by investigating a late antique translation of an ancient Iranian textChallenges the view that considers the study of the Zand an auxiliary science to Avestan studiesViews the Zand of the YH as a text in its own right and investigates it within the wider Pahlavi literatureConsiders the so-called glosses in the Zand for the first time as an integral part of the textOffers a variorum edition of the Middle Persian text, refusing to establish an UrtextIn late antiquity, Zoroastrian exegetes set out to translate their ancient canonical texts into Middle Persian, the vernacular of their time. Although undated, these translations, commonly known as the Zand, are often associated with the Sasanian era (224-651 ce). Despite the many challenges the Zand offers to us today, it is indispensable for investigations of late antique exegesis of the Avesta, a collection of religious and ritual texts commonly regarded as the Zoroastrians' scripture.Arash Zeini also offers a fresh edition of the Middle Persian version of the Avestan Yasna HaptaA hA iti, a ritual text composed in the Old Iranian language of Avestan, commonly dated to the middle of the second millennium bce. Zeini challenges the view that considers the Zand's study an auxiliary science to Avestan studies, framing the text instead within the exegetical context from which it emerged.

Learning a Second Language through Interaction Rod Ellis,1999-12-15 This book examines different theoretical perspectives on the role that interaction plays in second language acquisition. The principal perspectives are those afforded by the Interaction Hypothesis, Socio-Cultural Theory and the Levels of Processing model. Interaction is, therefore, defined broadly; it is seen as involving both intermental and intramental activity. The theoretical perspectives are explored empirically in a series of studies which investigate the relationship between aspects of interaction and second language acquisition. A number of these studies consider the effects of interaction on the acquisition of vocabulary (word meanings) by both adult and child L2 learners. In addition, the effects of language aptitude on input processing are considered. Further studies consider the contribution that interaction makes to the acquisition of grammatical knowledge. These studies provide clear evidence that social and intermental interaction are major forces in the acquisition of an L2. Finally, the book, considers a number of pedagogic specifications. In particular, the importance of discourse control as a means of learners' obtaining the quality of interaction likely to foster acquisition is discussed.
