Translation into the Second Language Stuart Campbell, 2014-08-27 The dynamics of immigration, international commerce and the postcolonial world make it inevitable that much translation is done into a second language, despite the prevailing wisdom that translators should only work into their mother tongue. This book is the first study to explore the phenomenon of translation into a second language in a way that will interest applied linguists, translators and translation teachers, and ESOL teachers working with advanced level students. Rather than seeing translation into a second language as deficient output, this study adopts an interlanguage framework to consider L2 translation as the product of developing competence; learning to translate is seen as a special variety of second language acquisition. Through carefully worked case studies, separate components of translation competence are identified, among them the ability to create stylistically authentic texts in English, the ability to monitor and edit output, and the psychological attitudes that the translator brings to the task. While the case studies mainly deal with Arabic speakers undergoing translator training in Australia, the conclusions will have implications for translation into a second language, especially English, around the world. Translation into the Second Language is firmly grounded in empirical research, and in this regard it serves as a stimulus and a methodological guide for further research. It will be a valuable addition for advanced undergraduate

and postgraduate students of applied linguistics, translation theory, bilingualism and second language acquisition as well as those involved in teaching or practicing translation at a professional level.

Translating National Allegories Alistair Rolls, John West-Sooby, Marie-Laure Vuaille-Barcan, 2019-04-15 This book explores the intersection of a number of academic areas of study that are all, individually, of growing importance: translation studies, crime fiction and world literature. The scholars included here are leaders in one or more of these areas. The frame of this volume is imagological; its focus is on the ways in which national allegories are constructed and deconstructed, encompassing descriptions of national characteristics as they play out at the level of the local or the individual as well as broader, political analyses. Its corpus, crime fiction, is shown to be a privileged site for writing the national narrative, and often in ways that are more complex and dynamic than is suggested by the genre's much-cited role as vehicle for a new realism. Finally, these two areas are problematised through the lens of translation, which is a crucial player in both the development of crime fiction and the formation, rather than simply the interlingual transfer, of national allegory. In this volume national allegories, and the crime novels in which they emerge, are shown to be eminently versatile, foundationally plural texts that promote critical rewriting as opposed to sites for fixing meaning. This book was originally published as a special

issue of The Translator.

The Universal History of Computing Georges Ifrah, 2001 A brilliant follow-up to a landmark international bestseller Suppose every instrument could by command or by anticipation of need execute its function on its own; suppose that spindles could weave of their own accord, and plectra strike the strings of zithers by themselves; then craftsmen would have no need of hand-work, and masters have no need of slaves. —Aristotle Called the Indiana Jones of arithmetic, Georges Ifrah embarked in 1974 on a ten-year quest to discover where numbers come from and what they say about us. His first book, the highly praised *Universal History of Numbers*, drew from this remarkable journey, presented the first complete account of the invention and evolution of numbers the world over—and became an international bestseller. In *The Universal History of Computing*, Ifrah continues his exhilarating exploration into the fascinating world of numbers. In this fun, engaging but no less learned book, he traces the development of computing from the invention of the abacus to the creation of the binary system three centuries ago to the incredible conceptual, scientific, and technical achievements that made the first modern computers possible. He shows us how various cultures, scientists, and industries across the world struggled to break free of the tedious labor of mental calculation and, as a result, he reveals the evolution of the human mind. Evoking the excitement and joy that accompanied the grand mathematical undertakings throughout history, Ifrah takes us along as he

revisits a multitude of cultures, from Roman times and the Chinese Common Era to twentieth-century England and America. We meet mathematicians, visionaries, philosophers, and scholars from every corner of the world and from every period of history. We witness the dead ends and regressions in the computer's development, as well as the advances and illuminating discoveries. We learn about the births of the pocket calculator, the adding machine, the cash register, and even automata. We find out how the origins of the computer can be found in the European Renaissance, along with how World War II influenced the development of analytical calculation. And we explore such hot topics as numerical codes and the recent discovery of new kinds of number systems, such as surreal numbers. Adventurous and enthralling, *The Universal History of Computing* is an astonishing achievement that not only unravels the epic tale of computing, but also tells the compelling story of human intelligence—and how much farther we still have to go. GEORGES IFRAH is an independent scholar and former math teacher. E. F. Harding, the primary translator, is a statistician and mathematician who has taught at Aberdeen, Edinburgh, and Cambridge Universities. SOPHIE WOOD, cotranslator, is a specialist in technical translation from French. Ian Monk, cotranslator, has translated the works of Georges Perec and Daniel Pennac. ELIZABETH CLEGG, cotranslator, is also an interpreter who has worked on a number of government and international agency projects. Guido Waldman, cotranslator, has translated several classic literary works. In this

engaging successor to *The Universal History of Numbers*, you'll discover the entire story of the calculation of yesteryear and the computation of today. From the invention of the abacus to the creation of the binary system three centuries ago to the conceptual, scientific, and technical achievements that made the earliest computers possible, highly acclaimed author and mathematician Georges Ifrah provides an illuminating glimpse into humankind's greatest intellectual tale: the story of computing. PRAISE FOR GEORGES IFRAH'S *The Universal History of Numbers* Georges Ifrah is the man. This book, quite simply, rules. . . . It is outstanding . . . a mind-boggling and enriching experience. –The Guardian (London) Monumental . . . a fascinating journey taking us through many different cultures. –The Times (London) Ifrah's book amazes and fascinates by the scope of its scholarship. It is nothing less than the history of the human race told through figures. –International Herald Tribune Dazzling. –Kirkus Reviews Sure to transfix readers. –Publishers Weekly

Text Typology and Translation Anna Trosborg, 1997-11-27
This book breaks new ground in translation theory and practice. The central question is: In what ways are translations affected by text types? The two main areas of investigation are: A. What are the advantages of focusing on text types when trying to understand the process of translation? How do translators tackle different text types in their daily practice? B. To what extent and in what areas are text types identical across languages and cultures? What similarities and dissimilarities can be observed in text types of original and

translated texts?Part I deals with methodological aspects and offers a typology of translations both as product and as process. Part II is devoted to domain-specific texts in a cross-cultural perspective, while Part III is concerned with terminology and lexicon as well as the constraints of mode and medium involving dubbing and subtitling as translation methods. Sonnets, sagas, fairy tales, novels and feature films, sermons, political speeches, international treaties, instruction leaflets, business letters, academic lectures, academic articles, medical research articles, technical brochures and legal documents are but some of the texts under investigation. In sum, this volume provides a theoretical overview of major problems and possibilities as well as investigations into a variety of text types with practical suggestions that deserve to be weighted by anyone considering the relation between text typology and translation. The volume is indispensable for the translator in his/her efforts to become a "competent text-aware professional".

Dancing on Ropes Anna Aslanyan, 2021-05-20 'Full of lively stories ... leaves the reader with an awed respect for the translator's task' Economist Would Hiroshima have been bombed if Japanese contained a phrase meaning 'no comment'? Is it alright for missionaries to replace the Bible's 'white as snow' with 'white as fungus' in places where snow never falls? Who, or what, is Kuzma's mother, and why was Nikita Khrushchev so threateningly obsessed with her (or it)? The course of diplomacy rarely runs smooth; without an

invisible army of translators and interpreters, it could hardly run at all. Join veteran translator Anna Aslanyan to explore hidden histories of cunning and ambition, heroism and incompetence. Meet the figures behind the notable events of history, from the Great Game to Brexit, and discover just how far a simple misunderstanding can go.

Can Theory Help Translators? Andrew Chesterman, Emma Wagner, 2014-07-16 *Can Theory Help Translators?* is a dialogue between a theoretical scholar and a professional translator, about the usefulness (if any) of translation theory. The authors argue about the problem of the translator's identity, the history of the translator's role, the translator's visibility, translation types and strategies, translation quality, ethics and translation aids.

Translation Excellence Marilyn Gaddis Rose, 1987-01-01 This inaugural volume transcends its archival value. Indeed, taken as a whole, the essays pose a provocation for both translation practice and theory. The criteria proposed and the issues examined remain the same. Absolute excellence, however, continues to move beyond the horizon, and changes in technology and taste inevitably change both the implementation of the criteria and the evaluation of the issues. The attendant ambiguities may stem from a parenthesis in the volume: does excellence lie in the X-factor that elusive quality which renders one translation clearly superior to others?

Translating the Middle Ages Karen L. Fresco, 2016-02-17 Drawing on approaches from

literary studies, history, linguistics, and art history, and ranging from Late Antiquity to the sixteenth century, this collection views 'translation' broadly as the adaptation and transmission of cultural inheritance. The essays explore translation in a variety of sources from manuscript to print culture and the creation of lexical databases. Several essays look at the practice of textual translation across languages, including the vernacularization of Latin literature in England, France, and Italy; the translation of Greek and Hebrew scientific terms into Arabic; and the use of Hebrew terms in anti-Jewish and anti-Muslim polemics. Other essays examine medieval translators' views and performance of translation, looking at Lydgate's translation of Greek myths through mental images rendered through rhetorical figures or at how printing transformed the rhetoric of intervernacular translation of chivalric romances. This collection also demonstrates translation as a key element in the construction of cultural and political identity in the *Fet des Romains* and Chester Whitsun Plays, and in the papacy's efforts to compete with Byzantium by controlling the translation of Greek writings.

Translating Official Documents Roberto Mayoral Asensio, 2014-07-16 Official translations are generally documents that serve as legally valid instruments. They include anything from certificates of birth, death or marriage through to academic transcripts or legal contracts. This field of translation is now as important as it is fraught with difficulties, for it is only in a few

areas that the cultural differences are so acute and the consequences of failure so palpable. In a globalizing world, our official institutions increasingly depend on translations of official documents, but little has been done to elaborate the skills and dilemmas involved. Roberto Mayoral deals with the very practical problems of official translating. He points out the failings of traditional theories in this field and the need for revised concepts such as the virtual document, pragmatic constraints, and risk analysis. He details aspects of the social contexts, ethical norms, translation strategies, different formats, fees, legal formulas, and ways of solving the most frequent problems. Care is taken to address as wide a range of cultural contexts as possible and to stress the active role of the translator. This book is intended as a teaching text for the classroom, for self-learning, or for professionals who want to reflect on their practice. Activities and exercises are suggested for each chapter, and information is included on professional associations and societies across the globe.

The Spoken Language Translator Manny

Rayner, 2000-08-28 This book describes the Spoken Language Translator (SLT), one of the first major projects in the area of automatic speech translation.

Beyond the Ivory Tower Brian James Baer, Geoffrey S. Koby, 2003-10-27 This collection of essays by contemporary translation scholars and trainers addresses what is a critically important, though often neglected, field within translation studies: translation pedagogy. The contributors explore

some of the current influences on translator training from both inside and outside the academy, such as: trends in foreign language pedagogy, teaching methods adapted from various applied disciplines, changes in the rapidly-expanding language industry, and new technologies developed for use both in the classroom and the workplace. These various influences challenge educators to re-conceptualize the translator's craft within an increasingly specialized and computerized profession and encourage them to address changing student needs with new pedagogical initiatives. Combining theory and practice, the contributors offer discussion of pedagogical models as well as practical advice and sample lessons, making this volume a unique contribution to the field of translation pedagogy.

Translators through History Jean Delisle, Judith Woodsworth, 2012-07-05 Acclaimed, when it first appeared, as a seminal work – a groundbreaking book that was both informative and highly readable – *Translators through History* is being released in a new edition, substantially revised and expanded by Judith Woodsworth. Translators have played a key role in intellectual exchange through the ages and across borders. This account of how they have contributed to the development of languages, the emergence of literatures, the dissemination of knowledge and the spread of values tells the story of world culture itself. Content has been updated, new elements introduced and recent directions in translation scholarship incorporated, providing fresh insights and a more nuanced view of past events. The bibliography contains over 100 new

titles and illustrations have been refreshed and enhanced. An invaluable tool for students, scholars and professionals in the field of translation, the latest version of Translators through History remains a vital resource for researchers in other disciplines and a fascinating read for the wider public.

Beginner Abacus Math: a Fun Way to Learn Basic Math Tong Dazai, 2016-12-22 Basic Abacus Math is your perfect guidebook to be a proficiently capable abacus user. Our exercise will translate the way you look and think of numbers by visualizing them. With us, you are mentally training your brain muscle to be stronger, more logical, observational, better memory and a fuller imagination. At its very simplest, abacus is a language just like you'd read aloud from a book. The beads you'll see on the abacus are like the musical notes on a score sheet. And they each represent a different number and place value, as well as groups and patterns such as the composition of fives and tens. The method of an abacus has been used for hundreds of years and is the symbol of wisdom in numbers. Learning to read numbers on an abacus really does open up a whole new world to explore! The physical movement of the abacus beads will imprint a mental abacus inside your mind, which will allow you to mentally exercise your mind. By stimulating, abacus can help your brain in concentration, observation, memory, comprehension, logical thinking, critical thinking, problem solving, fast judgment, endurance, determination, confidence and the general interest in numbers. Abacus 101 Series:

Challenging the Traditional Axioms Nike K. Pokorn, 2005-04-26 Translation into a non-mother tongue or inverse translation, especially of literary texts, has always been frowned upon within Translation Studies in Western cultures and regarded by literary scholars and linguists as an activity of dubious worth, doomed to fail. The study, which received an award from EST in 2001, sets out to challenge the established view and to critically question some of the axiomatic assumptions of Western theorists. Its challenge is supported by extensive empirical research involving reader response to translations of specific literary texts. The conclusion reached is that the quality of the translation, its fluency and acceptability in the target language environment depend primarily on the as yet undetermined individual abilities of the particular translator, his/her translation strategy and knowledge of the source and target cultures, and not on his/her mother tongue or the

direction in which s/he is translating.
