Dick Foeken

African Urban Harvest Gordon Prain,2010-09-17 This book seeks to answer the question of how much urban agriculture helps feed and support people living in towns and cities with evidence and proposals based on studies in Eastern and Central Africa.

Advances in Head and Neck Oncology K. Thomas Robbins,1998 Featuring the expertise and guidance of leading experts in the fields of surgical oncology, radiation oncology, reconstructive surgery, tumor biology, speech-language pathology, and laryngology, *Advances in Head and Neck Oncology* is the most thorough and current reference text available today on the subject. Highlighting 14 important areas in the field of head and neck oncology in which significant advances have been achieved over the past few years, this challenging book helps health care providers stay current with management principles and emphasizes the valuable collaborative multidisciplinary team approach to improve the treatment and management of patients with head and neck cancer.

The Impact of Urbanization on Environment in Africa Robert A. Obudho,1997

Cities Feeding People Axumite G. Egziabher,2014-05-14 *Cities Feeding People* examines urban agriculture in East Africa and proves that it is a safe, clean, and secure method to feed the world's struggling urban residents. It also collapses the myth that urban agriculture is practiced only by the poor and unemployed. *Cities Feeding People* provides the hard facts needed to convince governments that urban agriculture should have a larger role in feeding the urban population.

To Subsidise My Income Dick Foeken,2006-07-01 This book is about urban agriculture as a source of livelihood for urban dwellers in Nakuru town, Kenya. Various aspects of the phenomenon are discussed, with particular emphasis on its importance for the urban poor.

Agriculture in the City María Caridad Cruz,Roberto Sánchez Medina,2003 During the 1990s, several national economies saw their urban food markets collapse. Like Zambia, Mozambique, and Armenia, Cuba responded to this crisis with a food program that included support to urban agriculture: farming in the city. As a result, food prices are increasing, free markets have been reinstated, production cooperatives have been linked with markets, land has been redistributed, and areas under export crops have been converted to domestic food crops. The Cuban government is now calling upon its

cities to become more self-reliant for food OCo a focus that is dramatically modifying the landscape, lifestyle, and food supply of Havana residents.

The Migration Experience in Africa Jonathan Baker,Tade Akin Aina,1995 South Africa, by Christian M. Rogerson

The City in Time and Space Aidan Southall,1998 Includes bibliographical references and index.

The Social Sustainability of Cities Mario Polèse,Richard E. Stren,Richard Stren,2000-01-01 Cities are a locus of human diversity, where people with varying degrees of wealth and status share an association within a particular urban boundary. Despite the common geography, sharp social divisions characterize many cities. High levels of urban violence bear witness to the difficult challenge of creating socially cohesive and inclusive cities. The devastated inner cities of many large American urban centres exemplify the failure of urban development. With an enlightened democratic approach to policy reform, however, cities can achieve social sustainability. Some cities have been more successful than others in creating environments conducive to the cohabitation of a diverse population. In this collection of original essays, case studies of ten cities (Montreal and Toronto in Canada, Miami and Baltimore in the United States, Geneva and Rotterdam in Europe, S-o Paulo and San Salvador in South America, and Nairobi and Cape Town in South Africa) are presented and analysed in terms of social sustainability. The volume as a whole looks at the policies, institutions, and planning and social processes that can have the effect of integrating diverse groups and cultural practices in a just and equitable fashion. The authors conclude that policies conducive to social sustainability should, among other things, seek to promote fiscal equalization, weave communities within the metropolis into a cohesive whole, and ideally, provide transport systems that ensure equal access to public services and workplaces, all within the framework of an open and democratic local governance structure.
