Pyrapoint Don E. Hall, 2000-01-01 I SUBMIT TO YOU THAT THE PYRAPPOINT SYSTEM IS THE PRINCIPLE WHICH W.D. GANN USED. We can prove it, I feel. But if you will accept our point, we intend to spend our time with "hands-on" proof so that WE CAN LEARN THE TRUE AND FULL POTENTIAL OF THE SYSTEM. THIS IS WHY WE GO TO A SEMINAR AND WHY WE STUDY THIS MANUAL. Incidentally, we should have no copyright infringements because, to our knowledge and research, Mr. Gann never taught this in any of his seminars. I had the privilege to personally know, for some seven years, Gann's assistant, Mr. Renato Alghini. "Reno" was with Gann for six years, actually sharing close trading desks. Reno confirmed the extremely private personality of his friend, shown in most of Gann's writings and seminars. Reno passed away a few years ago. However, during the author's years of acquaintance with him, he shared a few facts that made the direction of our efforts truly appear validated. One of the confirmation factors seemed especially worthwhile in the revelation that Gann carried a small paper in hand when in the "pit" for his most successfully recorded trades. This paper, Reno related, was a miniature Pythagorean Cube. One more reason to believe that we had to unravel this mystic marvel -- and that we were on the right track for trading understanding. Mr. Gann died in 1956. It is significant to note that a favorite statement of Gann serves us well when we state that we believe that EVERY TOP AND EVERY BOTTOM in the markets have CALCULABLE counterpart -- a formula for projections and targets for both PRICE and for TIME. His quotes included that of the noted mathematician Faraday. Mr. Gann said, "If we wish to avert failure in speculation, we must deal with causes. Everything in existence is based on exact proportion and perfect relationship. There is no chance in nature, because mathematical

principles of the highest order lie at the foundation of all things. Faraday said. There is nothing in the Universe but mathematical points of force.

**Gann Masters** Larry Jacobs, 2006-04 As you know, W.D. Gann was a legendary trader. Some say he amassed a fortune in the the markets. He died in 1955. He wrote several important books on trading as well as a commodity trading course and a stock market trading course. He charged \$3000 to \$5000 for the trading courses which included 6 months of personal instruction by phone. The books and courses were written in veiled language which is almost impossible to understand by the average person. I have found many successful traders used the techniques of W.D. Gann. Due to the overwhelming interest in the W.D. Gann trading techniques, I created the Gann Masters Trading Course to help traders become successful. The course was created in combination with asking large traders how they used the techniques of W.D. Gann. This was put together in an easy-to-understand course designed for the average person. The course includes dozens of charts and illustrations which were not included in the courses of W.D. Gann. The course length is 200 pages. An Excel template was also developed to help the students with master table and circle charts. It is included with the course. It has electronic versions of all the master charts including the square of 4 and 9. It is possible to extend these master charts out to infinity with the Excel template.

New Trading Dimensions Bill M. Williams, 1998-10-06 Händler und erfahrene Privatanleger kommen immer mehr zu dem Schluß, daß die traditionellen Prognosemethoden der fundamentalen oder technischen Analyse offenbar zu widersprüchlichen Ergebnissen kommen. Bei den fundamentalen Analysten geht der Markt eher schwach, bei den technischen Analysten geht er fester. Die Folge von solch gegensätzlichen Signalen ist, daß viele Händler und Anleger

sich auf eine Kombination von wissenschaftlicher Theorie und Anlagepsychologie stützen. Bill Williams zeigt hier neue Perspektiven der Marktbeobachtung auf. Er kombiniert Elemente traditioneller technischer Chartmethoden mit Chaostheorie und Psychologie. Das Ergebnis ist ein komplexes, fünfdimensionales Handelsprogramm mit ausführlichen Erläuterungen und Beispielen zu Bereichen wie Fraktalanalyse, Oszillatoren und psychologischen Aspekten. (10/98)

**Dynamic Trading Indicators** Mark Helweg, David Stendahl, 2002-10-15 Using the insights that stem from value charts and price action profiles, Dynamic Trading Indicators shows traders how to develop systems and whole trading programs that implement these exciting new tools. Through an in-depth exploration of how to effectively use these new technical indicators in a complete trading system, Dynamic Trading Indicators provides a framework that allows readers to obtain a view of what a stock will most likely do next. This innovation in chart design opens up new vistas for traders and unlocks the door to unlimited profits. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered-some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future. Mark W. Helweg has worked and traded on the floor of the Chicago Board of Trade and, earlier in his career, partnered with an international CTA with over \$40 million under management to research

new trading system technology. David C. Stendahl is cofounder of RINA Systems, a software provider for systematic traders. Stendahl is the author of Profit Strategies: Unlocking Trading Performance with Money Management.

**How I Trade for a Living** Gary Smith, 1999-11-09 Viele Händler und aktive Anleger träumen davon, das Handeln professionell zu betreiben. Analysten, Fondsmanager und andere Experten haben zwar eine Fülle an Literatur über Handelsstrategien verfaßt, aber zum Thema 'Erfolgreich Handeln von zu Hause' gab es bislang keine Informationen. Bis jetzt! Hier ist das erste Buch, das sich mit diesem Thema eingehend beschäftigt. Autor Gary Smith handelt seit über 15 Jahren erfolgreich von zu Hause aus. Er ist ein berühmtes und angesehenes Mitglied der Händlergemeinschaft und erklärt, was es heißt, von zu Hause aus zu agieren - mit der nötigen Courage und Hardware. Smith

erläutert seine gewinnbringenden Handelsstrategien, die er für Aktien, Optionen und Anleihen einsetzt und demonstriert, wie er diese bei Aktien-Index-Futures und offenen Investmentfonds anwendet. Seine Strategie ist einfach, ohne komplexe technische Indikatoren, ohne verwirrende Charts, ohne große Softwareausstattung und mit geringem Risiko. Ein realistischer Leitfaden für jeden, der professionell einsteigen will. (12/99)

Cybernetic Analysis for Stocks and Futures John F. Ehlers, 2011-01-06  
Cutting-edge insight from the leader in trading technology In Cybernetic Analysis for Stocks and Futures, noted technical analyst John Ehlers continues to enlighten readers on the art of predicting the market based on tested systems. With application of his engineering expertise, Ehlers explains the latest, most advanced techniques that help traders predict stock and futures markets with surgical precision. Unique new indicators and automatic trading systems are described in text as well as Easy Language and EFS code. The approaches are universal and robust enough to be applied to a full range of market conditions. John F. Ehlers (Santa Barbara, CA) is President of MESA Software ([www.mesasoftware.com](http://www.mesasoftware.com)) and has also written Rocket Science for Traders (0-471-40567-1) as well as numerous articles for Futures and Technical Analysis of Stocks & Commodities magazines.

Investment Psychology Explained Martin J. Pring, 1995-11-03  
Expert advice in a back-to-basics handbook on how to beat the market-the classic way In Investment Psychology Explained Martin J. Pring, one of the most respected independent investment advisors in the world, argues that in the revisionist '90s there are no quick, magical paths to market success. Rather, he emphasizes the timeless values of hard work, patience, and self-discipline-and much more. Drawing on the wisdom of creative investors such as Jesse

Livermore, Humphrey Neill, and Barnard Baruch, as well as his own experience, Pring shows how to: \* Overcome emotional and psychological impediments that distort decision making \* Map out an independent investment plan-and stick to it \* Know when to buck herd opinion-and go contrarian \* Dispense with the myths and delusions that drag down other investors \* Resist the fads and so-called experts whose siren call to success can lead to disaster \* Exploit fast-breaking news events that rock the market \* Deal skillfully with brokers and money managers \* Learn and understand the rules that separate the truly great investors and traders from the rest

Reading *Investment Psychology Explained* will give you a renewed appreciation of the classic trading principles that, through bull and bear markets, have worked time and again. You'll see, with the help of numerous illustrative examples, what goes into making an effective investor-and how you can work toward achieving that successful profile.

**Float Analysis** Steve Woods, 2002-10-10 A complete guide to trading with price, volume, and float

Float Analysis explains how to use the Woods Cumulative Volume Float Indicator, the landmark concept in technical analysis that teaches the reader how to accurately determine when to purchase stocks. This groundbreaking book also contains all-new insights on how to understand and profit from these indicators, how support and resistance are redefined by this innovation, and how to implement these strategies into a high-growth portfolio. Steve Woods (Hyattsville, MD) is the Executive Director of FloatAnalysis.com and has written a number of articles for various journals including *Technical Analysis of Stocks & Commodities*. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the

vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

**Beyond Technical Analysis** Tushar S. Chande, 1996-12-27 A bulletproof trading system is essential for trading success. You also need an effective system for trading to implement that trading system consistently. Otherwise, your trading experience will be stressful at best and insanely inconsistent at worst. Though you can always get a canned black-box trading system, few traders ever stick with them for long: experts agree that the ideal system for each trader is unique to his or her trading style—proprietary systems created by the individual. Now acclaimed system developer Tushar Chande shows you how to create real-world systems that meet your trading needs. A stimulating mix of cutting-edge techniques, timeless principles, and practical guidelines, *Beyond Technical Analysis* offers a comprehensive methodology to develop and implement your own system, bridging the gap between analysis and execution. Chande begins with a crucial first step: assessing your trading beliefs. As he points out, Your beliefs about price action must be at the core of your trading system. This allows the trading system to reflect your personality, and you are more likely to succeed with such a system over the long run. Once you've pinpointed your beliefs, you can then build effective systems around them. To help you construct and use these systems, Chande starts with the basics and ends at the state of the art. With easy-to-read charts and numerous examples, Chande explores the following:

Foundations: diagnosing market trends, the perils of optimization, setting initial stops, selecting data, choosing orders, and understanding the summary test results New systems: trend following, pattern-based, trend/anti-trend, inter-market, filtered and extraordinary market opportunity systems, plus variations Equity curve analysis: measuring smoothness, portfolio strategies, monthly equity curves, and triggering effects Money management: risk of ruin, projecting drawdowns, changing bet size Data scrambling: a new method to generate synthetic data for testing A system for trading: starting, risk control, compliance, full traceability To foster consistent execution, Beyond Technical Analysis provides software that enables you to paper trade your system. A demo disk of Chande's Secure trade management software and data scrambling utility will let you test your system on true out-of-sample data and track your emotions and P&L as you transition the system from computer table to trading desk. A complete, concise, and thorough reference, Beyond Technical Analysis takes you step-by-step through the intricacies of customized system design, from initial concept through actual implementation. Acclaim for Tushar Chande's revolutionary approach for developing and implementing your own winning trading system Tushar Chande provides insightful but clear-cut techniques which will enlighten the savant as well as the newcomer. I would urge traders of all levels of experience to apply Chande's tremendously useful strategies! – Charles Le Beau President, Island View Financial Group Inc., author, Computer Analysis of the Futures Market The chapter on 'Equity Curve Analysis' alone will share with you concepts which have cost large trading houses millions of dollars to discover. –Murray A. Ruggiero, Jr. Contributing Editor, Futures Magazine President, Ruggiero Associates Tushar Chande is an accomplished quantitative technician, but in

this book he's gone far beyond grinding numbers. His coverage of system development is the first thorough treatment disclosing both specific trading systems and the practicalities of their implementation. – John Sweeney  
Technical Editor, Technical Analysis of Stocks & Commodities magazine author, Maximum Adverse Excursion: Analyzing Price Fluctuations for Trading Management For any aspiring CTA, this is a must-read on developing [his or her] trading system. – Rick Leesley Jack Carl Futures

**Building Winning Trading Systems with Tradestation** George Pruitt, John R. Hill, 2012-08-15 The updated edition of the guide to building trading systems that can keep pace with the market The stock market is constantly evolving, and coupled with the new global economic landscape, traders need to radically rethink the way they do business at home and abroad. Enter Building Winning Trading Systems, Second Edition, the all-new incarnation of the established text on getting the most out of the trading world. With technology now a pervasive element of every aspect of trading, the issue has become how to create a new system that meets the demands of the altered financial climate, and how to make it work. Giving voice to the question on every trader and investor's lips, the book asks, How can we build a trading system that will be paramount for our increasingly stressed markets? The answer? Establish mechanical trading systems that remove human emotion from the equation and form the cornerstone of a complete trading plan and with greater agility, characteristics that are more important than ever given the kinetic pace of the markets. Presents an all-new strategy for trading systems that will show traders how to create systems that will work in the twenty first century Expert advice from highly respected trading authority, George Pruitt Includes a new website featuring updated TradeStation code and shows how to use the world's best investment software platform to develop and utilize trading systems that really work Once again paving the way for traders who want to

adapt to their environment, *Building Winning Trading Systems*, Second Edition combines expertise in indicator design and system building in one indispensable volume.

*Chart Reading for Professional Traders* Michael S. Jenkins, 1996 This book is a complete, comprehensive study on reading charts, forecasting the markets, time cycles, and trading strategies. Explains reversal of trends, when to expect them, and how to know the trend has changed. Shows you how to forecast with great reliability how long the new trend will last and its price target. As does *Geometry of Markets*, this book discusses in depth the Gann techniques of time and price. Progresses to the very advanced concepts of day trading with circular arc segments and calculating final high and low price targets. Each principle is demonstrated with numerous chart illustrations and real world applications. The information found in this book is unique with many of the techniques discovered personally by Mr. Jenkins and found nowhere else.

The Taylor Trading Technique George Douglas Taylor, 2016-05-20 This high-quality reissue of *The Taylor Trading Technique* contains the same time-honored information it did when it was first published in 1950. Taylor's Book Method of trading is based on his insights about the repetition of grain market cycles but applies to the financial futures market and others as well. By identifying moves in the market that might fool less-savvy traders into buying or selling at the wrong time, Taylor's system protects against pitfalls while giving you an edge over other traders. Taylor breaks down market movements into three-day cycles comprising a Buy Day, a Sell Day, and a Sell Short Day. These classifications are used to keep tabs on a market's rhythm and identify the ideal moments at which you should enter and exit. This book will help you understand the ways the market fluctuates and

develops, so you can create and apply a plan for how best to trade in it. Combined with a bit of practice and a willingness to learn and experiment, The Taylor Trading Technique will arm you with a strong system for swing trading in financial futures.

*Gann's Master Charts Unveiled* Larry Jacobs, 2000 Most of Gann's books and courses were written in a veiled language as said by the trading community. What this means is he buried his techniques in his courses. It's there, but the reader has to read and reread his material several times to get anything of trading value out of it. Gann's material is extremely complicated and the trader must have a strong background in mathematics to full benefit from it. Some experts think that he did not put in the books and courses what he really traded with, even though the price of the courses was an unbelievable \$3500 at the time he sold them. Converted into today's prices, it would be equivalent to \$50,000. He kept the good trading secrets for himself or for those few who could afford to pay him the asking price of \$100,000. One of the trading methods that Gann kept to himself was the use of Pythagorean Square. He also kept secret the hexagon and the circle charts. He went to the land of the Pyramids to study the Pythagorean Square to find its secrets. It's believe that he found someone over there who explained how it worked and how it could be used in the markets. We know that Gann used the Pythagorean Square because he was found carrying it with him into the trading pit all the time. This square was hidden in the palm of his hand. How did he use this square? Why did he not discuss the use of this square in his courses? There is only one page covering the Square of Nine in all of his books and courses. Was this square his most valuable tool? These and all the other squares Gann used will be discussed in detail in this book with many illustrations and

examples to prove how they work. It almost seems that Gann kept the secret of how to use these charts to himself for two reasons: these charts tell the real mysteries behind the market; and if other traders knew how to use these master charts, it might have hurt his trading. Also included in this book are many of the archived articles previously written in the Gann and Elliott Wave and Traders World magazine on the Square of Nine. These articles are included so you can get a different viewpoint from experts in the field. ...It is just like a professional athlete, he trains over and over again and when he is out on the field he doesn't have to think when he plays, it becomes automatic. You too, must train over and over again using these methods with historical data before you are ready to go out on the field to play or trade.

Trading with DiNapoli Levels Joe DiNapoli, 1998 Excellent manual from an experienced trader and exceptional teacher on the practical application of Fibonacci analysis to investment markets. This method is fascinating and often amazingly accurate, and every technical trader should become conversant with its principles. DiNapoli teaches all the basics, as well as his own unique methods of applying Fibonacci to trading in multiple time frames.
