The No-Drop Zone Patrick Brady, 2011 *The No-Drop Zone* contains all the information necessary for new cyclists to gain the knowledge and skills to take them from buying their first bicycle to starting their first race. Cyclists learn how to handle the bike, perform minor maintenance, select clothing and accessories, join clubs, and find events. The book also covers every aspect of riding in a group, emphasizing such specific skills as how to avoid bumping into other riders when riding in close quarters and fixing a flat quickly enough to rejoin the group. Author Patrick Brady explores the particular pleasures that come from group riding, a unique experience at once social (talking with friends while riding), exciting (descending in a group), and exhilarating (finishing a long hill). Brady also details the enormous fitness benefits of riding in a group. *The No-Drop Zone* has all the knowledge a cyclist needs to move to that next level of skill.

Trials Bikes Thomas Streissguth, 2006-08-01 *Trials bike riding* is more about agility and balance than it is speed. This requires a certain type of motorcycle. Young readers will learn how trials bikes are built to suit the needs of their riders.

Greeves Colin Sparrow, 2014-06-30 In twenty-five years, Greeves produced around 25,000-30,000 machines - a number considered relatively modest when compared with some of their contemporaries, such as Triumph. However, Greeves was not small in ambition, or indeed achievement, which is resoundingly illustrated in this new book. From a tentative start in the early 1950s, Greeves expanded through the 1960s, producing scrambler, trials, road racing and road bikes. Founders Bert Greeves and Derry Preston Cobb produced machines from their factory at Thundersley in Essex, establishing a world-wide reputation in motorcycle sport, particularly off-road competition. *Greeves - The Complete Story* gives a detailed history from the early 1950s to the 1970s. With production histories and specification details for all the main models, and hundreds of photographs throughout, it is the ideal resource for anyone with an interest in these classic sporting motorcycles. The book covers: Bert Greeves, Derry Preston Cobb and the formative years - from invalid carriages to motorcycle production in 1953; model-by-model specification guides for the main roadsters, scramblers, trials bikes and road racing bikes; world-wide motorcycle sport success, including European Championship wins for Greeves scramblers in 1960 and 1961; the final years - 1972-1979; and advice on owning and restoring a Greeves model today. Superbly illustrated with 299 colour and black & white photographs.

Tour De France For Dummies Phil Liggett, James Raia, Sammarye Lewis, 2011-05-04 A plain-English guide to the world's most famous-and grueling-bicycle race Featuring eight-pages of full-color photos from recent Tour de France races, this easy-to-follow, entertaining guide demystifies the history, strategy, rules, techniques, equipment, and competitors in what is arguably the most grueling and intriguing multiday, multistage sporting event in the world. Hodaka Motorcycles Ken Smith, 2014 Hodaka motorcycles were some of the most creatively marketed and designed motorcycles in America. The bike of choice for the hip young racer, the street-savvy urbanite, or the 14-year-old boy's favorite poster, these machines had colorful logos, creative advertising and terrific names. The Combat Wombat, Road Toad, Dirt Squirt and the fantastic Super Rat are just a few of the models produced by Hodaka. More than 15 years in the making, this exhaustively-researched tome contains all the details about the machines as well as a treasure trove of photographs, advertisements, and graphics. Written by Ken Smith, the editor of VMX Magazine, and created with the help of Paul Stannard of Strictly Hodaka and many of the people who designed and sold Hodakas back in the day, this book is a captivating, colorful look at one of the wildest, most popular motorcycles of the 1960s and 1970s.

Motorbike Suspensions Dario Croccolo, Massimiliano Agostinis, 2013-05-14 Although they may look like simple components, the motorbike fork plays a critical role in the overall dynamic behaviour of motorcycles. It must provide appropriate stiffness characteristics, damping capabilities and the lowest sliding friction values in order to guarantee as much performance, safety and comfort as possible to the rider. Front Motorbike Suspensions addresses the fundamental aspects of the structural design of a motorbike fork. Utilizing the authors' many years of experience in this industrial research topic, Motorbike Suspensions provides useful design rules and applied mechanical design theories to optimize the shape of motorbike suspension. Overall structural considerations are explored alongside specific aspects including how bolted and adhesively bonded joints design can be applied to these components. R&D designers in the motorcycle industry who would like to improve their knowledge about the structural design of motorbike suspension will find Motorbike Suspension a concise and coherent guide to this specific feature. Whereas, undergraduates and graduates in industrial engineering matters may use this as a case study for an interesting application of the theories learned from machine design courses.

Researching Subcultures, Myth and Memory Bart van der Steen, Thierry P.F. Verburch, 2020-07-30 This book brings together contributions that analyse how subcultural myths develop and how they can be studied. Through critical engagement with (history) writing and other sources on subcultures by contemporaries, veterans, popular media and researchers, it aims to establish: how stories and histories of subcultures emerge and become canonized through the process of mythification; which developments and actors are crucial in this process; and finally how

researchers like historians, sociologists, and anthropologists should deal with these myths and myth-making processes. By considering these issues and questions in relation to mythmaking, this book provides new insights on how to research the identity, history, and cultural memory of youth subcultures.
