Black Picket Fences Mary E. Pattillo, Mary Pattillo-McCoy, 2000-11 Black Picket Fences is a stark, moving, and candid look at a section of America that is too often ignored by both scholars and the media: the black middle class. The result of living for three years in Groveland, a black middle-class neighborhood on Chicago's South Side, sociologist Mary Pattillo-McCoy has written a book that explores both the advantages and the boundaries that exist for members of the black middle class. Despite arguments that race no longer matters, Pattillo-McCoy shows a different reality, one where black and white middle classes remain separate and unequal. An insightful look at the socio-economic experiences of the black middle class. . . . Through the prism of a South Side Chicago neighborhood, the author shows the distinctly different reality middle-class blacks face as opposed to middle-class whites. —Ebony A detailed and well-written account of one neighborhood's struggle to remain a haven of stability and prosperity in the midst of the cyclone that is the American economy. —Emerge

Stiff: The Curious Lives of Human Cadavers Mary Roach, 2004-05-17 Beloved, best-selling science writer Mary Roach's "acutely entertaining, morbidly fascinating" (Susan Adams, Forbes) classic, now with a new epilogue. For two thousand years, cadavers – some willingly, some unwittingly – have been involved in science's boldest strides and weirdest undertakings. They've tested France's first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation surgery, cadavers have helped make history in their quiet way. "Delightful—though never disrespectful" (Les Simpson, Time Out New York), *Stiff* investigates the strange lives of our bodies postmortem and answers the question: What should we do after we die? "This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is." —Tara Parker-Pope, Wall Street Journal "Gross, educational, and unexpectedly sidesplitting." —Entertainment Weekly

These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, originally published in 1959, contains the first sixteen columns published in the magazine from 1956-1958. They were reviewed and briefly updated by Gardner for this 1988 edition.
