The Economics of Tropical Farm Management J. P. Makeham, L. R. Malcolm, 1986 In the tropics farmers have to work from a limited resource base which does not lend itself to highly productive crop and animal yields. The principles of farm management economics and the application of farm management analysis and planning can help small farmers in the tropics to produce 'a bit more' from their lots.

**Tropical Fruit Tree Diversity** Bhuwon Sthapit, Hugo Lamers, Ramanatha Rao, Arwen Bailey, 2016-05-12 Farmers have developed a range of agricultural practices to sustainably use and maintain a wide diversity of crop species in many parts of the world. This book documents good practices innovated by farmers and collects key reviews on good practices from global experts, not only from the case study countries but also from Brazil, China and other parts of Asia and Latin America. A good practice for diversity is defined as a system, organization or process that, over time and space, maintains, enhances and creates crop genetic diversity, and ensures its availability to and from farmers and other users. Drawing on experiences from a UNEP-GEF project on Conservation and Sustainable Use of Wild and Cultivated Tropical Fruit Tree Diversity for Promoting Livelihoods, Food Security and Ecosystem Services, with case studies from India, Indonesia, Malaysia and Thailand, the authors show how methods for identifying good practices are still evolving and challenges in scaling-up remain. They identify key principles effective as a strategy for mainstreaming good practice into development efforts. Few books draw principles and lessons learned from good practices. This book fills this gap by combining good practices from the research project on tropical fruit trees with chapters from external experts to broaden its scope and relevance.

*Tropical Fruits* Robert E. Paull, Odilo Duarte, 2011 This book examines economically important horticultural crops selected from the major production systems in temperate, subtropical and tropical climatic areas. The general aspects of the tropical climate, fruit production techniques, tree management and postharvest handling and the principal tropical fruit crops that are common in temperate city markets are discussed. The taxonomy, cultivars, propagation and orchard management, biotic and abiotic problems and cultivar development of these fruit crops are also highlighted.

Tropical Dairy Farming John Moran, 2005-12-08 Tropical Dairy Farming is a manual designed for use by dairy production advisors working in tropical areas, especially in South-East Asia. It aims to increase the productivity of small holder dairy farmers in the humid tropics by improving the feeding management of their livestock. It shows how to provide dairy cows with cost-effective feeds that match small holder farming systems and discusses the major obstacles to improving feeding management in the humid tropics. The author shows the benefits and drawbacks of various feed components and the calculation of balanced diets based mainly on forages combined with some supplementary feeding. Diseases and problems associated with unbalanced diets are also covered, as well as important information on growing and conserving quality forages as silage. The book draws on examples from a variety of countries including Indonesia, Malaysia, Thailand, Vietnam, China, East Timor and the Philippines.

**Poultry Production in the Tropics** Ugochukwu ADINDU, 2018-08-02 This book has been extensively prepared for poultry farmers in the tropical regions of Africa and Asia, although a little emphasis was made considering the Nigerian socio-economic and agro-climatic conditions. Small

scale farmers make up over 80% of the total output realised from meat and egg production in the tropics, therefore this book was prepared having them in mind. Familiar topics and some terminologies have been well explained for the benefits of poultry lovers who are interested in going into poultry production but lack the technical know-how. Students of Animal production in tertiary institutions are not left out as this book covers the academic curriculum for undergraduates. Veterinarians, Poultry researchers and consultants will find this book invaluable as the information therein is solid and up to date as regards to the current trend in poultry production. This book is written based on the author's knowledge on poultry farming and the knowledge of various scholars, researchers, farmers and poultry breeders in Africa, India and Great Britain. The following topics have been exhaustively treated 1. Breeds of the domestic fowl 2. Incubation and hatching management 3. Poultry housing and equipment 4. Poultry brooding (management of day old chicks) 5. Management of growers, layers, breeders and broilers 6. Poultry nutrition 7. Poultry feeds and feeding (including feed formulation) 8. Poultry diseases: prevention and control 9. Processing and preservation of poultry products 10. Poultry economics (how to start poultry farming/financial implication) 11. Poultry farm records.

**Blueprints for Tropical Dairy Farming** John Moran, Philip Chamberlain, 2017-01-20 Blueprints for Tropical Dairy Farming provides insight into the logistics, infrastructure and management required for the development of small and large dairy farms in tropical developing countries. Farmers will learn how to improve the welfare, milk quality and productivity of their dairy herds. This book complements author John Moran's five previous books on the principles of tropical dairy

farming. The manual covers a wide range of topics related to ensuring the sustainability of dairy production systems in tropical developing countries, such as South and East Asia, Africa and Central America. It also provides guidelines for the best management practices of large-scale, more intensive dairy systems. While smallholder farms are the major suppliers of milk in the tropics, many larger farms are becoming established throughout the tropics to satisfy the increasing demands for fresh milk. Blueprints for Tropical Dairy Farming will be a valuable resource for farmers and stockpeople who want to improve the productive performance of their dairy herds, farm advisers who can assist farmers to achieve this aim, educators who develop training programs for farmers or who train dairy advisers in the basics of dairy production technology, and other stakeholders in tropical dairy production, such as local agribusiness, policy makers and research scientists. National and international agencies will learn new insights into the required long-term logistics for regional dairy development, while potential investors will acquire knowledge into intensive tropical dairy farming.

**Business Management for Tropical Dairy Farmers** John Moran, 2009-05-22 Most countries in South-East Asia have established smallholder dairy farming industries through social welfare and rural development programs to provide a regular cash flow for poorly resourced farmers. These farms are now being treated as accepted rural industries and require a more business-minded approach based on changes to farm profitability. *Business Management for Tropical Dairy Farmers* gives smallholder dairy farmers the business management skills they will need to remain sustainable. Drawing on detailed financial analyses of smallholders in countries such as Pakistan, Thailand and Malaysia, it shows how to budget cash inputs to match cash outflows during different seasons of the year, and how to invest wisely in improving cattle housing and feeding systems. If

farmers make greater use of formats and structures for farm costs and returns, it will increase their awareness of the relative importance of all their financial inputs in terms of cost of production per kilogram of milk produced on the farm. It will also allow them to make more meaningful and timely decisions by correctly costing planned changes to their routine farming practices. The book will also be of use to support organisations to more clearly define the key drivers of profit on smallholder farms, and to government departments and national dairy organisations to routinely evaluate and update their industry policies.

**Tropical Mariculture** Sena S. De Silva, 1998-08-19 Tropical Mariculture takes an in-depth look at developmental activities in a growing industry striving towards sustainability and environmental integrity. All of the contributors to this book have considerable experience and expertise in the field of tropical mariculture, and this is the first book to bring expert contributions together. The topics covered are wide and varied, ranging from general issues such as the impact of mariculture on coastal ecosystems to genetic improvement of cultured marine species, as well as the specifics of breeding selected marine species of current importance, such as groupers and sea bass. Significant coverage is also given to the problems of larval rearing in inland aquaculture as well as the demands of water- and land-based resources in a tropical environment. This book will be essential for everyone working in and researching tropical mariculture. Key Features \* Looks at developmental activities in tropical mariculture \* All of the contributors are experts in the field \* Covers specific breeding problems and larval rearing \* Studies the environmental impact of inland aquacultural activities \* Provides detailed examples of cultivated species in the tropics \* Compiles mariculture strategies and discusses example species \* First book to give an overview of tropical mariculture

Plant Parasitic Nematodes in Subtropical and Tropical Agriculture, 3rd Edition Richard A Sikora,Danny Coyne,Johannes Hallmann,Patricia Timper,2018-08-10 Covering all aspects of practical plant nematology in subtropical and tropical agriculture, the third edition of this definitive global reference work is fully revised and in full colour throughout. It covers the presence, distribution, symptomology and management of all economically important plant parasitic nematodes damaging the world's major food and cash crops. This includes: rice, cereals, solanum and sweet potatoes (and other root and tuber crops), food legumes, vegetables, peanut, citrus, fruit tree crops, coconut and other palms, coffee, cocoa, tea, bananas, sugarcane, tobacco, pineapple, cotton, other tropical fibres, spices and medicinal plants. New content for this edition includes: A chapter on nematode soil biodiversity and soil health; Reflections on the future impact of nematodes and nematology on food security; The importance of climate change, emerging threats, and new management technologies for large and small subsistence growers; Significant revisions to the IPM chapter and chapters on vegetables, citrus, legumes, tuber crops, cotton, peanut and banana where major advances in nematode management have occurred. This book is highly illustrated, with up-to-date practical guidance on methods of extraction, processing and diagnosing of different plant and soil nematodes and on integrated pest management. It remains an invaluable resource for those studying and working in the area of crop protection.

*Rearing Young Stock on Tropical Dairy Farms in Asia* John Moran,2012 Rearing young stock for

replacement heifers is probably one of the least well understood and practiced aspects of herd and feeding management on dairy farms throughout the world, particularly on smallholder dairy farms in the tropics. This book addresses all the major concerns of the small holder dairy farmer in Asia. It shows how to attain optimal growth in young stock, so that as cows, they can calve at an appropriate early age at the lowest cost and promptly substitute for any cows culled from the milking herd. This provides continuing returns on the investments of feed, labor and other farm resources. Low reproductive rates and high calf mortality are the major causes of reproductive wastage. This has a direct bearing on culling and replacement strategies and on genetic improvement. In many tropical countries, calf mortality can be as high as 50%. In some areas this can be due to climatic stress on temperate or crossbred stock. While climatic stress compounds the other hazards of calf life, high calf mortality is usually due to diseases and poor feeding management. Rearing Young Stock on Tropical Dairy Farms in Asia encourages the smallholder dairy farmer to maintain their investment in replacement heifers and gives them the tools necessary to achieve realistic targets for mortalities, live weight gain, mating age and age and live weight at first calving. - Shows how to reduce mortality rates of milk fed and weaned heifer replacements in the tropics. - Covers disease prevention and treatment to ensure a longer lifespan of the milking herd. - Companion volume to three previous manuals written by John Moran: Tropical Dairy Farming, Business Management for Tropical Dairy Farmers and Managing High Grade Dairy Cows in the Tropics.

**Tropical Animal Feeding: A Manual for Research Workers** T.J. Preston, 1998 The aim of this book is to provide practical guidance to researchers committed to promoting the better use of tropical feed resources in sustainable livestock systems. The emphasis is on appropriate technologies for small farmers in developing countries. This book is not a list of recipes for making

laboratory analysis or preparing experiments. Half of its contents is devoted to describing the essential principles which should assist the research worker in conducting useful and cost effective research. This includes: the importance of managing natural resources for sustainable development and of identifying priority areas for research aimed at solving practical problems and improving the lot of small farmers in developing countries, the basic principles of animal nutrition, the identification of important feed resources and of some appropriate technologies to better use them. Contents Chapter 1: Managing Natural Resources for Sustainable Livestock Based Agriculture, Chapter 2: Identifying Priority Areas for Research on Tropical Feed Resources, Chapter 3: Nutrition of Non Ruminants, Chapter 4: Feed Resources for Non Ruminants, Chapter 5: Nutrition of Ruminants, Chapter 6: Feed Resources for Ruminants, Chapter 7: Technologies for Improving the Use of Renewable Natural Resources, Chapter 8: Design and Analysis of Experiments, Chapter 9: Biological and Chemical Analytical Methods, Chapter 10: Animal Feeding Trials, Chapter 11: On Farm Research: A Discussion of Some Practical Examples and Procedures, Chapter 12: Guidelines for the Evaluation of Feed Resources, Chapter 13: Presentation of Research Results.
