WorldMinds: Geographical Perspectives on 100 Problems Donald G.

Janelle,Barney Warf,Kathy Hansen,2004-05-31 WorldMinds provides broad exposure to a geography that is engaged with discovery, interpretation, and problem solving. Its 100 succinct chapters demonstrate the theories, methods, and data used by geographers, and address the challenges posed by issues such as globalization, regional and ethnic conflict, environmental hazards, terrorism, poverty, and sustainable development. Through its theoretical and practical applications, we are reminded that the study of Geography informs policy making.

**Island Landscapes** Gloria Pungetti,2016-11-10 Island Landscapes takes a critical look at the evolution of European islandscapes and seascapes to examine the conditions facing them in the twenty first century. Considering island landscapes as an expression of European culture, this book envisages future trends and presents clearly the need to find a balance between preservation and development to ensure sustainability. Both large and small islands are illustrated in the book including the British Isles, Malta and Cyprus as well as archipelagos in Norway, Italy and Greece. Their unique identities and values reveal the remarkable breadth of cultural heritage possessed by these diverse European islands. An interdisciplinary approach is applied to the history, perception, characterisation and planning of islandscapes and seascapes in Europe, to support culturally-oriented strategies for these fragile landscapes.

*Pacific Island Landscapes* Patrick D. Nunn,1998 Pacific island landscapes

explores the origin and physical history of one of the least known regions of the Earth's surface - the Pacific Islands. Never before has such a systematic account of the island groups been compiled. In this volume, Patrick Nunn outlines how each of the main island groups originated then gives detailed accounts - much from his own research -- - of islands in Fiji, Samoa and Tonga. A final substantive chapter treats the interaction of early human settlers of Pacific Islands and their environments.--Back cover

**Living in a Dynamic Tropical Forest Landscape** Nigel Stork, Stephen M. Turton, 2009-01-26 This book brings together a wealth of scientific findings and ecological knowledge to survey what we have learned about the "Wet Tropics" rainforests of North Queensland, Australia. This interdisciplinary text is the first book to provide such a holistic view of any tropical forest environment, including the social and economic dimensions. The most thorough assessment of a tropical forest landscape to date Explores significant scientific breakthroughs in areas including conservation genetics, vegetation modeling, agroforestry and revegetation techniques, biodiversity assessment and modeling, impacts of climate change, and the integration of science in natural resource management Research achieved, in part, due to the Cooperative Research Centre for Tropical Rainforest Ecology and Management (the Rainforest CRC) Written by a number of distinguished international experts contains chapter summaries and section commentaries

*Landscape Design with Plants* Brian Clouston, 2013-10-22 Landscape Design with Plants, Second Edition focuses on landscape architecture. The book first discusses trees in the countryside. Adaptation to locality, self-town vegetation, designs for both short-term and long-term effect, ecological planting, and plant associations are described. The text looks at planting

for forestry. The need for afforestation; forest habitat; scale of the forest mosaic; and woodlands as visual elements in the landscape are considered. The book puts emphasis on trees in urban areas, shrubs and groundcover, and herbaceous plants and bulbs. The text also focuses on water plants. The use of water plants in garden design, aquatic communities, and historical background are discussed. The book underscores the use and management of plant species native to Britain in landscaping; urban landscape and roof gardens; and how to transplant semi-mature trees. The text also describes reclamation and planting of industrial and urban wastelands; landscaping of reservoir margins; and the relationship of plants and air pollution. The book also puts emphasis on the use of vegetation in slope stabilization; planting in tropical lowland areas; planting in hot, arid climates; and the functional use of Australian plants. The selection is a must for readers interested in landscaping.

*Biodiversity and Climate Change Adaptation in Tropical Islands* Chandrakasan Sivaperuman, A. Velmurugan, Awnindra Kumar Singh, I. Jaisankar, 2018-04-05  
*Biodiversity and Climate Change Adaptation in Tropical Islands* provides comprehensive information on climate change, biodiversity, possible impacts, adaptation measures and policy challenges to help users rehabilitate and preserve the natural resources of tropical islands. While biodiversity and climate change of tropical islands has previously received less attention, it is ironically one of the most vulnerable regions in this regard. The core content of the work derives largely from the ideas and research output from various reputed scientists and experts who have recorded climate change impacts on aquatic and coastal life in tropical regions. Contributors have direct working experience with the tribes in some of the tropical islands.

All of their expertise and information is compiled and presented in the work, including coverage related to climate change. This work highlights the ever-growing need to develop and apply strategies that optimize the use of natural resources, both on land and in water and judicious use of biodiversity. It functions as a critical resource on tropical island biodiversity for researchers, academicians, practitioners and policy makers in a variety of related disciplines. Covers a huge range of biodiversity documentation, conservation measures and strategies that can be applied to various sectors, from forests to agriculture Brings together expertise from researchers in the area who have direct experience in the regions described Contains a wealth of field research related to biodiversity conservation and its applications from a variety of tropical islands

**Encyclopedia of Ecology** Brian D. Fath, 2018-08-23 Encyclopedia of Ecology, Second Edition, Four Volume Set continues the acclaimed work of the previous edition published in 2008. It covers all scales of biological organization, from organisms, to populations, to communities and ecosystems. Laboratory, field, simulation modelling, and theoretical approaches are presented to show how living systems sustain structure and function in space and time. **Problematic Wildlife II** Francesco Maria Angelici, Lorenzo Rossi, 2020-05-07

In a world where habitats are constantly changing and the impact of anthropization on the environment is increasingly intense, interactions between human and wildlife are becoming more and more complex. Some species pose problems for human activities while many others need to be helped in order to continue to exist. This book follows the first volume called 'Problematic Wildlife', edited by F.M. Angelici and published by Springer in 2016, which has had considerable success with readers and critics. The volume includes 21 chapters divided into 7 parts devoted specific topics which are approached in a multidisciplinary way. There are both review chapters and specific cases, always bearing in mind the interest for an international audience. The book is useful both for scientists, wildlife specialists, conservationists, zoologists, ecologists, university students, nature managers, and for those who live in contact with wildlife and its problems, such as farmers, shepherds, hunters, urban planners, and staff of parks and nature reserves. Its ultimate goal is to offer scientific and pragmatic approaches to manage each categories of problematic species.

Mediterranean Island Landscapes Ioannis N. Vogiatzakis, Gloria Pungetti, A.M. Mannion, 2008-02-26 Mediterranean islands exhibit many similarities in their biotic ecological, physical and environmental characteristics. There are also many differences in terms of their human colonization and current anthropogenic pressures. This book addresses in three sections these characteristics and examines the major environmental changes that the islands experienced during the Quaternary period. The first section provides details on natural and cultural factors which have shaped island landscapes. It describes the environmental and cultural changes of the Holocene and their effects on biota, as well as on the current human pressures that are now threats to the sustainability of the island communities. The second section focuses on the landscapes of the largest islands namely Sicily, Sardinia, Corsica, Cyprus, Crete, Malta and the Balearics. Each island chapter includes a special topic reflecting a particular characteristic of the island. Part three presents strategies for action towards sustainability in Mediterranean islands and concludes with a comparison between the largest islands. Despite several published books on Mediterranean ecosystems/landscapes there is no existing book dealing with Mediterranean islands in a collective manner. Students, researchers and university lecturers in environmental science, geography, biology and ecology will find this work invaluable as a cross-disciplinary text while planners and politicians will welcome the succinct summaries as background material to planning decisions.

*Australian Island Arks* Dorian Moro, Derek Ball, Sally Bryant, 2018-02-01  
Australia is the custodian of a diverse range of continental and oceanic

islands. From Heard and Macquarie in the sub-Antarctic, to temperate Lord Howe and Norfolk, to the tropical Cocos (Keeling) Islands and the islands of the Great Barrier Reef, Australia's islands contain some of the nation's most iconic fauna, flora and ecosystems. They are a refuge for over 35% of Australia's threatened species and for many others declining on mainland Australia. They also have significant cultural value, especially for Indigenous communities, and economic value as centres for tourism. Australian Island Arks presents a compelling case for restoring and managing islands to conserve our natural heritage. With contributions from island practitioners, researchers and policy-makers, it reviews current island management practices and discusses the need and options for future conservation work. Chapters focus on the management of invasive species, threatened species recovery, conservation planning, Indigenous cultural values and partnerships, tourism enterprises, visitor management, and policy and legislature. Case studies show how island restoration and conservation approaches are working in Australia and what the emerging themes are for the future. Australian Island Arks will help island communities, managers, visitors and decision-makers to understand the current status of Australia's islands, their management challenges, and the opportunities that exist to make best use of these iconic landscapes.

Tropical Forests: Management and Ecology Ariel E. Lugo, Carol Lowe, 2012-12-06 Forestry professors used to remind students that, whereas physicians bury their mistakes, foresters die before theirs are noticed. But good institutions live longer than the scientists who contribute to building them, and the half-century of work of the USDA Forest Service's Institute of Tropical Forestry (ITF) is in plain view: an unprecedented corpus of

accomplishments that would instill pride in any organization. There is scarcely anyone interested in current issues of tropical forestry who would not benefit from a refresher course in ITF's findings: its early collaboration with farmers to establish plantations, its successes in what we now call social forestry, its continuous improvement of nursery practices, its screening trials of native species, its development of wood-processing technologies appropriate for developing countries, its thorough analysis of tropical forest function, and its holistic approach toward conservation of endangered species. Fortunately, ITF has a long history of information exchange through teaching; like many others, I got my own start in tropical forest ecology from just such a course in Puerto Rico. And long before politicians recognized the global importance of tropical forestry, the ITF staff served actively as ambassadors of the discipline, visiting tropical countries everywhere to learn and, when invited to do so, to help solve local problems. It is a general principle of biogeography that species' turnover rates on islands are higher than those on continents. Inevitably, the same is true of scientists assigned to work on islands.

Creating Island Resorts Brian King, 2002-06-01 This work studies tropical island resorts, the people who live and work there and the tourists who visit them. The author includes, but goes beyond the more commonly encountered marketing and economic analyses of resort destinations, by examining social, cultural, mythical, environmental, organizational and political dimensions.

**Islands in the Rainforest** Stéphen Rostain, 2012-11-15 Stéphen Rostain's book is a culmination of 25 years of research on the extensive human modification of the wetlands environment of Guiana and how it reshapes our thinking of ancient settlement in lowland South America and other tropical zones. Rostain

demonstrates that populations were capable of developing intensive raised-field agriculture, which supported significant human density, and construct causeways, habitation mounds, canals, and reservoirs to meet their needs. The work is comparative in every sense, drawing on ethnology, ethnohistory, ecology, and geography; contrasting island Guiana with other wetland regions around the world; and examining millennia of pre-Columbian settlement and colonial occupation alike. Rostain's work demands a radical rethinking of conventional wisdom about settlement in tropical lowlands and landscape management by its inhabitants over the course of millennia.

**Introduction to Montserrat** Gilad James, PhD, Montserrat is a small island territory in the Caribbean that was first settled by the Arawak and Carib peoples. The island was later colonized by the British, who established sugar plantations and brought in enslaved Africans to work the land. Montserrat gained independence from Britain in 1962 and remains a British Overseas Territory today. The island's history is also marked by the devastating effects of natural disasters, including hurricanes and volcanic eruptions. In 1995, the island's Soufrière Hills volcano erupted, forcing the evacuation of most of the population and causing widespread damage. Despite these challenges, Montserrat has a rich cultural heritage and is known for its music, including the traditional music called scratch and the modern style of soca. The island also has a thriving tourism industry, attracting visitors with its natural beauty and history.
