Saved by Angels Bruce Van Natta, 2008-06-28 Many people believe in and practice praying to the Lord, but the Bible is very clear that the Lord also speaks back to us in various ways! This book goes into detail about the 7 different ways that God speaks to us as found in the Bible, and how that applies to our lives today. It reveals to us that these 7 areas are not just the different ways that God still speaks to us, but that when looked at as a whole they are a picture of what a healthy relationship with God involves. It further shows that this kind of intimate relationship is available to all believers and that this is exactly the kind of relationship that God desires to have with each of us. Throughout the book several Biblical and personal examples are used to validate each section. The reader is also given opportunities to see how God has already been talking to them in his/her own life, and then record these examples at the end of every chapter. Each person who reads this book is challenged to grow in his/her relationship with the Lord and is given many tools to help accomplish that. This is important because when a believer has an intimate relationship with the Lord they hear His voice more clearly. The Holy Spirit is then better able to guide and empower the believer to become victorious in their daily walk.

Collision of Two CN Freight Trains, Anding, Mississippi, July 10, 2005 United States. National Transportation Safety Board, 2007 On Sunday, July 10, 2005, about 4:15 a.m., central daylight time, two CN freight trains collided head on in Anding, Mississippi. The collision occurred on the CN Yazoo Subdivision, where the trains were being operated under a centralized traffic control signal system on single track. Signal data indicated that the northbound train, IC 1013 North, continued past a stop (red) signal at North Anding and collided with the southbound train, IC 1023 South, about mile beyond the signal. The collision resulted in the derailment of 6 locomotives and 17 cars. About 15,000 gallons of diesel fuel were released from the locomotives and resulted in a fire that burned for about 15 hours. Two crewmembers were on each train; all four were killed. As a precaution, about 100 Anding residents were evacuated; they did not report any injuries.

Truck Accidents Kill Brad Pistotnik, 2015-01-09 The statistics are alarming. While large trucks make up approximately 4 percent of the registered vehicles on the nation's roadways, they account for almost 10 percent of accidents involving fatalities-and the numbers of truck crashes and related injuries and fatalities increase every year. Last year, trucking revenues totaled \$610 billion, which is estimated to double by 2015. With payment incentives that focus on deadlines and moving cargo rapidly for pay by the mile or by weight, the trucking industry has created a killing field on US roads. So what can we do to stop the carnage? Truck accident lawyer Brad Pistotnik is an expert on motor-carrier regulations, practices, and litigation. His book *Truck Accidents Kill* is the most authoritative text to date on the issues surrounding large-truck accidents. From the latest available statistics and the causes of driver errors to manufacturing and maintenance problems, job pressures, and questions of liability, he provides the tools for anyone who is concerned about road safety. The book is valuable to attorneys who are fighting to ensure that the trucking and insurance industries take responsibility in keeping the public safe.

Truck-Tractor Semitrailer Rear-End Collision Into Passenger Vehicles on Interstate 44 Near Miami, Oklahoma June 26, 2009 National Transportation Safety Board, 2010-09-28 The pickup was pushed into a Chevrolet Tahoe SUV. As a result of the accident, 10 passenger vehicle occupants died, 5 received minor-to-serious injuries, and the Volvo combination unit driver was seriously injured. The major safety issues identified were the accident truck driver's fatigue, the need for updated and comprehensive fatigue education materials and fatigue management programs, the significance of heavy vehicle aggressivity in collisions between dissimilar vehicles, the lack of Federal requirements for heavy commercial vehicle event data recorders and video event recorders, and the lack of Federal requirements for forward collision warning systems.

Trucking Accidents in Ohio Slater & Zurz Llp,2016-02-05 When there is a crash between a car and a truck, the car driver and his or her passengers are usually the people seriously injured or killed. The sheer weight of a truck is overwhelming and there is little chance one will just walk away from the accident without harm. Trucking accident cases are not the same as an accident where only cars are involved. The trucking industry is big business with sophisticated logistic companies who have many resources to protect their interests including their insurance companies and their attorneys. It's also a regulated industry with many rules and regulations. This book will help you understand the trucking industry, the rules and regulations that govern it and what you need to know if you've been involved in a trucking accident anywhere in Ohio. At the Ohio law firm of Slater & Zurz LLP, we've been helping the victims of trucking accidents for over 40 years. We have the extensive experience and the team of professionals needed to effectively represent our clients and make sure they are treated fairly by trucking companies, their insurance companies and their lawyers when one of their trucks has been involved in a trucking accident and changed our clients' lives forever.
