PC Basics with Windows 7 and Office 2010 Kim Lindros,2010-10-12 This book presents a complete survey of the computer technologies necessary for achieving basic technology literacy. It provides a strong foundation by giving the reader the background needed to make smart buying decisions about computer technology. It then gives a description of the hardware that is the foundation of all of the technologies used every day, whether it's a laptop, personal computer, smartphone, or other digital device. From there, it explains how the Internet actually works. It then guides the reader through engaging, step-by-step tutorials on how to use the Windows 7 operating system and the popular Office 2010 productivity tools, including Word, Excel, and Powerpoint. The book is written in a conversational and engaging style. At the end of each chapter, there are review questions, and a project to apply what has been learned. --

The Minimum Core for Information and Communication Technology: Audit and Test Sandra Murray,2009-07-29 This book supports trainee teachers in the Lifelong Learning Sector in the assessment of their knowledge of ICT. A self-audit section is included to help trainees understand their level of competence and confidence and will help them identify any gaps in their knowledge and skills. This is followed by exercises and activities to support and enhance learning. The book covers all the content of the LLUK standards for the minimum core for information and communication technology. Coverage and assessment of the core have to be embedded in all Certificate and Diploma courses leading to QTLS and ATLS status.
