Hacking Your Education Dale J. Stephens,2013-03-05 It's no secret that college doesn't prepare students for the real world. Student loan debt recently eclipsed credit card debt for the first time in history and now tops one trillion dollars. And the throngs of unemployed graduates chasing the same jobs makes us wonder whether there's a better way to "make it" in today's marketplace. There is--and Dale Stephens is proof of that. In Hacking Your Education, Stephens speaks to a new culture of "hackademics" who think college diplomas are antiquated. Stephens shows how he and dozens of others have hacked their education, and how you can, too. You don't need to be a genius or especially motivated to succeed outside school. The real requirements are much simpler: curiosity, confidence, and grit. Hacking Your Education offers valuable advice to current students as well as those who decided to skip college. Stephens teaches you to create opportunities for yourself and design your curriculum--inside or outside the classroom. Whether your dream is to travel the world, build a startup, or climb the corporate ladder, Stephens proves you can do it now, rather than waiting for life to start after "graduation" day.

Charles Portis has long been acclaimed as one of America's foremost writers. True Grit tells the story of Mattie Ross, who is just fourteen when the coward Tom Chaney shoots her father down in Fort Smith, Arkansas, and robs him of his life, his horse, and \$150 in cash. Mattie leaves home to avenge her father's blood. With one-eyed Rooster Cogburn, the meanest available U.S. Marshal, by her side, Mattie pursues the killer into Indian Territory. True Grit is eccentric, cool, straight, and unflinching, like Mattie herself. From a writer of true status, this is an American classic through and through.

When a NASA satellite spots evidence of an astoundingly rare object buried deep in the Arctic ice, the floundering space agency proclaims a much-needed victory--one that could have profound implications for US space policy and the impending presidential election. With his re-election hanging in the balance, the President sends White House Intelligence analyst Rachel Sexton to the Milne Ice Shelf to verify the authenticity of the find. Accompanied by a team of experts, including the charismatic academic Michael Tolland, Rachel uncovers the unthinkable: evidence of scientific trickery. Before she can contact the President, she and Michael are attacked by a deadly team of assassins controlled by a mysterious power broker who will stop at nothing to hide the truth. Fleeing for their lives in an environment as desolate as it is lethal, their only hope for survival is to find out who is behind this masterful ploy. The truth, they will learn, is the most shocking deception of all in this "taut, fast-paced, barn-burner of a book" (St. Petersburg Times).

In this dramatic book, former Assistant Attorney General John P. Carlin takes readers to the front lines of a global but little-understood fight as the Justice Department and the FBI chases down hackers, online terrorist recruiters, and spies. Today, as our entire economy goes digital, from banking to manufacturing to transportation, the potential targets for our enemies multiply. This firsthand account is both a remarkable untold story and a warning of dangers yet to come.

Sleeping by the Mississippi, 2017 Alec Soth's *Sleeping by the Mississippi* is one of the defining publications of the photo-book era. First published in 2004, it was Soth's first book and sold through three editions, establishing him as a leading light of contemporary photographic practice. Evolving from a series of road trips along the Mississippi river, America's iconic yet oft-neglected 'third coast', Soth's richly descriptive, large-format colour photographs present an eclectic mix of individuals, landscapes, and interiors. Sensuous in detail and raw in subject, the work elicits a consistent mood of loneliness, longing, and reverie. This MACK edition includes two photographs not published in the prior versions.

But with the exception of a small piece of Africa and a few minor islands in the Pacific, Germany is without an empire. Kaiser Wilhelm II demands that the United States surrender its newly acquired territories: Guam, Puerto Rico, Cuba, and the Philippines. President McKinley indignantly refuses, so with the honor and economic future of the Reich at stake, the Kaiser launches an invasion of the United States, striking first on Long Island. Now the Americans, with their army largely disbanded, must defend the homeland. When McKinley suffers a fatal heart attack, the new commander in chief, Theodore Roosevelt, rallies to the cause, along with Confederate general James Longstreet. From the burning of Manhattan to the climactic Battle of Danbury, American forces face Europe's most potent war machine in a blazing contest of will against strength.
