Indian Classical Music and the Gramophone, 1900-1930
Vikram Sampath, 2022-06-30 In 1902 The Gramophone Company in London sent out recording experts on expeditions across the world to record voices from different cultures and backgrounds. All over India, it was women who embraced the challenge of overcoming numerous social taboos and aesthetic handicaps that came along with this nascent technology. Women who took the plunge and recorded largely belonged to the courtesan community, called tawaifs and devadasis, in North and South India, respectively. Recording brought with it great fame, brand recognition, freedom from exploitative patrons, and monetary benefits to the women singers. They were to become pioneers of the music industry in the Indian sub-continent. However, despite the pioneering role played by these women, their stories have largely been forgotten. Contemporaneous with the courtesan women adapting to recording technology was the anti-naught campaign that sought to abolish these women from the performing space and brand them as common prostitutes. A vigorous renaissance and arts revival movement followed, leading to the creation of a new classical paradigm in both North Indian (Hindustani) and South Indian (Carnatic) classical music. This resulted in the standardization, universalization, and institutionalization of Indian classical music. This newly created classical paradigm impacted future recordings of The Gramophone Company in terms of a shift in genres and styles. Vikram Sampath sheds light on the role and impact

of The Gramophone Company's early recording expeditions on Indian classical music by examining the phenomenon through a sociocultural, historical and musical lens. The book features the indefatigable stories of the women and their experiences in adapting to recording technology. The artists from across India featured are: Gauhar Jaan of Calcutta, Janki Bai of Allahabad, Zohra Bai of Agra, Malka Jaan of Agra, Salem Godavari, Bangalore Nagarathnamma, Coimbatore Thayi, Dhanakoti of Kanchipuram, Bai Sundarabai of Pune, and Husna Jaan of Banaras.

After the Software Wars Keith Curtis, 2009
Computers are an advancement whose importance is comparable to the invention of the wheel or movable type. While computers and the Internet have already changed many aspects of our lives, we still live in the dark ages of computing because proprietary software is still the dominant model. One might say that the richest alchemist who ever lived is my former boss, Bill Gates. (Oracle founder Larry Ellison, and Google co-founders Sergey Brin and Larry Page are close behind.) Human knowledge increasingly exists in digital form, so building new and better models requires the software to be improved. People

can only share ideas when they also share the software to display and modify them. It is the expanded use of free software that will allow a greater ability for people to work together and increase the pace of progress. This book will demonstrate that a system where anyone can edit, share, and review the body of work will lead not just to something that works, but eventually to the best that the world can achieve! With better cooperation among our scientists, robot-driven cars is just one of the many inventions that will arrive -- pervasive robotics, artificial intelligence, and much faster progress in biology, all of which rely heavily on software. - Publisher.

The World of the Crusades Christopher Tyerman, 2019-05-23 A lively reimagining of how the distant medieval world of war functioned, drawing on the objects used and made by crusaders Throughout the Middle Ages crusading was justified by religious ideology, but the resulting military campaigns were fueled by concrete objectives: land, resources, power, reputation. Crusaders amassed possessions of all sorts, from castles to reliquaries. Campaigns required material funds and equipment, while conquests produced bureaucracies, taxation, economic

exploitation, and commercial regulation. Wealth sustained the Crusades while material objects, from weaponry and military technology to carpentry and shipping, conditioned them. This lavishly illustrated volume considers the material trappings of crusading wars and the objects that memorialized them, in architecture, sculpture, jewelry, painting, and manuscripts. Christopher Tyerman's incorporation of the physical and visual remains of crusading enriches our understanding of how the crusaders themselves articulated their mission, how they viewed their place in the world, and how they related to the cultures they derived from and preyed upon. A note to readers: the grey-shaded pages throughout this volume look at the Crusades in detail, exploring individual themes such as food and drink, medicine, weapons and women's role in the Crusades. These short essays are interspersed throughout the chapters and the main text will continue after each one. For instance, 'Taking the Cross' runs from pages 4 to 7, and the Introduction continues on p. 8.
