Moon-face and Other Stories Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Waste: Uncovering the Global Food Scandal Tristram Stuart,2009-10-26 The true cost of what the global food industry throws away. With shortages,

volatile prices and nearly one billion people hungry, the world has a food problem—or thinks it does. Farmers, manufacturers, supermarkets and consumers in North America and Europe discard up to half of their food—enough to feed all the world's hungry at least three times over. Forests are destroyed and nearly one tenth of the West's greenhouse gas emissions are released growing food that will never be eaten. While affluent nations throw away food through neglect, in the developing world crops rot because farmers lack the means to process, store and transport them to market. But there could be surprisingly painless remedies for what has become one of the world's most pressing environmental and social problems. Waste traces the problem around the globe from the top to the bottom of the food production chain. Stuart's journey takes him from the streets of New York to China, Pakistan and Japan and back to his home in England. Introducing us to foraging pigs, potato farmers and food industry CEOs, Stuart encounters grotesque examples of profligacy, but also inspiring innovations and ways of making the most of what we have. The journey is a personal one, as Stuart is a dedicated freegan, who has chosen to live off of discarded or self-produced food in order to highlight the global food waste scandal. Combining front-line investigation with startling new data, Waste shows how the way we live now has created a global food crisis—and what we can do to fix it.

Food Waste Reduction and Valorisation Piergiuseppe Morone, Franka Papendiek, Valentina Elena Tartiu, 2017-04-26 This book adds a new dimension to the sustainability assessment of food waste reduction and valorisation: policy analysis. Featuring a transdisciplinary analysis by key experts in the field, it identifies the drivers of change in food-waste reduction and valorisation technologies by looking, for example, at the regulatory framework and at policy actions undertaken by local and global actors. The book explores the development of regulations and policies for food-waste prevention, management, and valorisation at a global as well as European Union level. It also discusses the notion of food waste in legal terms and investigates the effects of the lack of a standard, universal definition of food waste on the efficient use of by-products, promising processes and products for technological and commercial exploitation. Utilising mathematical mapping methods to assess food consumption impacts and providing supply chain models that allow the testing of consumption scenarios, the book goes on to discuss a series of emerging technologies (tested at lab scale and/ or pilot scale) and opportunities for the valorisation of food waste.

What's Mine Is Yours Rachel Botsman, Roo Rogers, 2010-09-14 "Amidst a thousand tirades against the excesses and waste of consumer society, What's Mine Is Yours offers us something genuinely new and invigorating: a way out." —Steven Johnson, author of *The Invention of Air* and *The Ghost Map* A groundbreaking and original book, What's Mine is Yours articulates for the first time the roots of collaborative consumption, Rachel Botsman and Roo Roger's timely new coinage for the technology-based peer communities that are transforming the traditional landscape of business, consumerism, and the way we live. Envisioning a Future Without Food Waste and Food Poverty Leire Escajedo San Epifanio (jurist),Mertxe de Renobales Scheifler,2015 Different factors have contributed to what is known as the Contemporary Food Paradox. To express this more graphically, let us say that more than a third of the food in the world is wasted while almost 800 million people suffer extreme malnutrition. Now the Millennium Goals' deadline expired, we must set the targets for the Sustainable Development Goals for the next decades. Many national and international organizations point out the imperative need to give an adequate reply to this paradox. Food waste has important economic and environmental implications and, in addition, there is an undeniable ethical and social justice aspect. Beyond the figures of hunger and malnutrition, mothers, the unweaned, and small children die prematurely and young people experience a deficient physical and mental development. All these people, members of our human family, oblige us to recognize their inherent dignity as human beings and their equal and inalienable rights. In this work, academics from fifteen countries and different disciplines discuss proposals and strategies in order to respond to the desire for a world without waste or food poverty.

Social Innovation and New Business Models Laura Michellini, 2012-08-08 Extreme poverty continues to afflict the world, and it requires urgent action. Social innovation can be the driving force to spark change and to find common ground for shared value creation, particularly when it is directed at low-income markets. Leading companies have recently developed innovative forms of social innovation by combining three elements - the concept of shared value creation, the theory of the fortune at the bottom of the pyramid, and a corporate social entrepreneurship approach - which they use to enter low-income markets by helping to solve global challenges while simultaneously generating profits. The book identifies the main forms of social innovation: social business models, social products and social communication strategies. Further, it shows how companies can successfully

implement social innovation and presents new forms of social business models that can be used to target low-income markets. Finally, the book presents key success factors related to the social product innovation process and corresponding communication.
