Coming to My Senses Alyssa Harad,2012-07-05 A sudden love affair with fragrance leads to sensual awakening, self-transformation, and an unexpected homecoming At thirty-six-earnest, bookish, terminally shopping averse-Alyssa Harad thinks she knows herself. Then one day she stumbles on a perfume review blog and, surprised by her seduction by such a girly extravagance, she reads in secret. But one trip to the mall and several dozen perfume samples later, she is happily obsessed with the seductive underworld of scent and the brilliant, quirky people she meets there. If only she could put off planning her wedding a little longer. . . . Thus begins a life-changing journey that takes Harad from a private perfume laboratory in Austin, Texas, to the glamorous fragrance showrooms of New York City and a homecoming in Boise, Idaho, with the women who watched her grow up. With warmth and humor, Harad traces the way her unexpected passion helps her open new frontiers and reclaim traditions she had rejected. Full of lush description, this intimate memoir celebrates the many ways there are to come to our senses.

Manual of Construction Project Management Jüri Sutt,2011-05-09 This construction client's manual is written in the form of a list of activities. It supports owners in the role of client by helping them make choices during the project development process. This increases control over cost, quality and duration at each stage. Activities within each main stage of the project development (preparation stage; procurement; design; preparation for construction; construction itself; handover; implementation) are divided into phases, each requiring separate decision-making. The phase begins with a list of direct previous decisions and continues with a list of executors, the goal of the present phase and a list of activities to be performed. And each phase ends with a list of expected results and a list of activities that these results release for action in the next phase. The sequence of these seven stages can be altered to help building owners manage risk by choosing and combining the timing of these stages. The tasks involved in project preparation, described in the first chapter are for example, often left by the owner for the designers to solve - or sometimes even the contractors. The decisions relating to the choice of procurement schemes, described in the second chapter, can be made either at the preparation stage of project development, as part of the prioritisation of aims, or at the time of choosing the designer, or at the stage of choosing construction contractors. Manual of Construction Project Management - for owners & clients is for prospective owners who either operate as clients themselves, or who use the services of professional construction management companies. The aim is to help both owners and their construction partners understand what to expect from each other. The manual describes activities at the level of detail required to choose the management task or method to make the decision. It is not bound to regulations of any specific country and a detailed glossary makes it an indispensable worldwide reference.
