Marine! Burke Davis,2016-03-29 The gripping story of an extraordinary American hero, the most decorated man in US Marine Corps history, from a New York Times-bestselling author. "We are flanked on both sides by an enemy that outnumbers us 29:1. They can't get away from us now!" -Lewis B. "Chesty" Puller, USMC In the glorious chronicles of the US Marine Corps, no name is more revered than that of Lt. Gen. Lewis B. "Chesty" Puller. The only fighting man to receive the Navy Cross five separate times-a military honor second only to the Congressional Medal of Honor-he was the epitome of a professional warrior. A son of the South, descendant of Robert E. Lee, and cousin to George S. Patton, Puller began his enlisted career during World War I and moved up through the ranks as he proved his battlefield mettle in Haiti and Nicaragua, with the Horse Marines in Peking, in the Pacific Theater of World War II, and in the nightmarish winter engagements of the Korean War. Fearless and seemingly indestructible, adored by the troops he championed yet forced into early retirement by a high command that resented his "lowly" beginnings and unwillingness to play politics, Puller remains one of most towering figures in American military history. Bestselling military biographer Burke Davis paints the definitive portrait of this extraordinary marine hero.

Falling into Love Lang Charters,2020-07-07 Lang Charters was living the American Dream until a surreal accident on a family hike stole not only that, but nearly his life. Yet, plummeting off a cliff taught him the richest life isn't about ascending and achieving, but falling into the love of God and others. In Falling into Love, he narrates an inspiring story about his accident, recovery, and rehabilitation. He tells about people coming together when life falls apart, love transcending distance, hope in the midst of despair, beauty blossoming from hurt, and God's unending affection for us shining through in gloriously simple, regular, weird, and awesome ways. This feel-good memoir faces the struggles, doubts, pains, and questions head on, grappling with deep issues thoughtfully and authentically. Charters shares his story and reflections to encourage a greater love for others, self, life, and God. If love is the point, his tale of nearly dying, loss, sorrow, transformation, relationship, kindness, care, healing, and God's goodness highlights what this means.

Basics of Virtual Reality Armin Grasnick,2022-01-04 Today, the reality we know can be recorded and reproduced true to reality using technical processes. Space and time are recreated virtually as a copy in artificial reality. However, the reproduction of virtual reality is not limited to a mere copy of what exists. A visitor to the virtual space does not have to be content with the pixelated image of the old familiar, but can encounter unreal

phenomena in the illusory world that never existed in real life or are even physically impossible. This enables an expansion of the recorded reality and allows the perception of surprisingly new perspectives. A perspective denotes the perception of a fact from a certain point of view and corresponds to the way of looking at things. But a perspective is also the observation of a scene from a viewing position. From different perspectives the illusion of reality arises during the reproduction by observation. This vision is not based on imagination or hallucination, but is the basic function of virtual reality. This book describes the concepts, systems, and technologies used to create virtual reality from its ancient beginnings to the present, and provides a glimpse into a possible future. This book is a translation of the original German 1st edition Grundlagen der virtuellen Realität by Armin Grasnack, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Tough As They Come Travis Mills,Marcus Brotherton,2016-10-25 Thousands have been wounded in the wars in Iraq and Afghanistan. Five have survived quadruple amputee injuries. This is one soldier's story. Thousands of soldiers die every year to defend their country. United States Army Staff Sergeant Travis Mills was sure that he would become another statistic when, during his third tour of duty in Afghanistan, he was caught in an IED blast four days before his twenty-fifth birthday. Against the odds, he lived, but at a severe cost-Travis became one of only five soldiers from the wars in Afghanistan and Iraq to survive a quadruple amputation. Suddenly forced to reconcile with the fact that he no longer had arms or legs, Travis was faced with a future drastically different from the one he had imagined for himself. He would never again be able to lead his squad, stroke his fingers against his wife's cheek, or pick up his infant daughter. Travis struggled through the painful and anxious days of rehabilitation so that he could regain the strength to live his life to the fullest. With enormous willpower and endurance, the unconditional love of his family, and a generous amount of faith, Travis shocked everyone with his remarkable recovery. Even without limbs, he still swims, dances with his wife, rides mountain bikes, and drives his daughter to school. Travis inspires thousands every day with his remarkable journey. He doesn't want to be thought of as wounded. "I'm just a man with scars," he says, "living life to the fullest and best I know how."
