QC-LDPC Code-Based Cryptography Marco Baldi, 2014-05-02 This book describes the fundamentals of cryptographic primitives based on quasi-cyclic low-density parity-check (QC-LDPC) codes, with a special focus on the use of these codes in public-key cryptosystems derived from the McEliece and Niederreiter schemes. In the first part of the book, the main characteristics of QC-LDPC codes are reviewed, and several techniques for their design are presented, while tools for assessing the error correction performance of these codes are also described. Some families of QC-LDPC codes that are best suited for use in cryptography are also presented. The second part of the book focuses on the McEliece and Niederreiter cryptosystems, both in their original forms and in some subsequent variants. The applicability of QC-LDPC codes in these frameworks is investigated by means of theoretical analyses and numerical tools, in order to assess their benefits and drawbacks in terms of system efficiency and security. Several examples of QC-LDPC code-based public key cryptosystems are presented, and their advantages over classical solutions are highlighted. The possibility of also using QC-LDPC codes in symmetric encryption schemes and digital signature algorithms is also briefly examined.

Noble Savages Napoleon A. Chagnon, 2014-02-18 The renowned anthropologist author of the best-selling *Yanomamö* describes his controversial life-long research among the Yanomamö Indians, describing how his beliefs in the evolutionary advantages of their inherent violence have been systematically rejected by politically correct scientists. 50,000 first printing.

Business Process Excellence August-Wilhelm Scheer, Ferri Abolhassan, Wolfram Jost, Mathias Kirchmer, 2012-09-15 Business process management is the basis for all initiatives like SCM, CRM, ERP, or business intelligence. New component and internet-based software architectures and web services require a solid process management to deliver the expected business success. However, many organizations still struggle to find the right approach to business process management. IDS Scheer delivers with ARIS the framework to meet this challenge successfully. IDS Scheer has successfully applied its ARIS business process management approach at thousands of organizations worldwide such as Intel, Siemens, or the US Navy. This book presents international case studies in various manufacturing and service industries as well as the public sector. It shows how to achieve business process excellence in practice.

Essential Readings in Evolutionary Biology Francisco J. Ayala, John C. Avise, 2014-03-15 Traces scholarly thought from the nineteenth-century birth of evolutionary biology to the mapping of the human genome through forty-eight essays, arranged in chronological order, each preceded by a one-page essay that explains the significance of the chosen work.

The World Factbook (2001) Barry Leonard, 2002-02 The World Factbook is prepared by the Central Intelligence Agency (CIA). In general, information available as of 1 Jan. 2001 was used in the preparation of this edition. The Factbook presents a profile of each country in alphabetic order, including background information, geography, population, government, economy, communications, transportation, military, and transnational issues. There are also many full-color maps, including 2 large fold-outs dated April 2001: Physical Map of the World, and Political Map of the World.

Systematic Atheology John R. Shook, 2017-12-01 Atheology is the intellectual effort to understand atheism, defend the reasonableness of unbelief, and support nonbelievers in their encounters with religion. This book presents a historical overview of the development of atheology from ancient thought to the present day. It offers in-depth examinations of four distinctive schools of atheological thought: rationalist atheology, scientific atheology, moral atheology, and civic atheology. John R. Shook shows how a familiarity with atheology's complex histories, forms, and strategies illuminates the contentious features of today's atheist and secularist movements, which are just as capable of contesting each other as opposing religion. The result is a book that provides a disciplined and philosophically rigorous examination of atheism's intellectual strategies for reasoning with theology. Systematic Atheology is an important contribution to the philosophy of religion, religious studies, secular studies, and the sociology and psychology of nonreligion.

The Gaia Hypothesis Michael Ruse, 2013-09-25 "The book is full of empathetic, insightful, and often very funny portraits of Margulis, Lovelock, and a community of other figures associated with Gaia." —Carla Nappi, *New Books in Science, Technology, and Society* In 1965 English scientist James Lovelock had a flash of insight: the Earth is not just teeming with life; the Earth, in some sense, is life. He mulled this revolutionary idea over for several years, first with his close friend the novelist William Golding, and then in an extensive collaboration with the American scientist Lynn Margulis. In the early 1970s, he finally went public with the Gaia hypothesis, the idea that everything happens for an end: the good of planet Earth. Lovelock and Margulis were scorned by professional scientists, but the general public enthusiastically embraced Lovelock and his hypothesis. In *The Gaia Hypothesis*, philosopher Michael Ruse, with his characteristic clarity and wit, uses Gaia and its history, its supporters and detractors, to illuminate the nature of science itself. Gaia emerged in the 1960s, a decade when authority was questioned and status and dignity stood for nothing, but its story is much older. Ruse traces Gaia's connection to Plato and a long history of goal-directed and holistic—or organicist—thinking and explains why Lovelock and Margulis's peers rejected it as pseudoscience. But Ruse also shows why the project was a success. He argues that Lovelock and Margulis should be commended for giving philosophy firm scientific basis and for provoking important scientific discussion about the world as a whole, its homeostasis or—in this age of global environmental uncertainty—its lack thereof. "[Ruse's] treatment is thought-provoking and original, as you would expect from this perceptive, irrepressible philosopher of biology." —*New Scientist*

Utsuwa Kylie Johnson, Tiffany Johnson, 2021 A piece must be practical enough to be used every day. It must be crafted at its place of origin, using traditional techniques and materials. And it must be handmade. Japanese craft has long been revered for its quality and beauty, and skilled craftwork remains an important part of Japanese life. 'Utsuwa', meaning 'for everyday use', embodies the ethos of handmaking in Japan, where handcrafted wares must be as practical as they are beautiful. This book takes us behind the scenes into the private studios of some of Japan's most exciting artisans to reveal stories of material, method, place and culture. It guides us through quiet galleries and colourful marketplaces, where the provenance of a piece is central to its story. Utsuwa is a love letter to the makers and sellers, and to all those who share the Japanese reverence for tradition and beauty.

Recipe for a Kinder Life Annie Smithers, 2021-07-27 Recipe for a Kinder Life is like getting a big hug from your nanna. It's wholesome, comforting and nourishing. Our yearning to rekindle a deeper connection with the land and each other is stronger now than ever. Where to start the journey lies within these pages.' Indira Naidoo 'The anti-celebrity chef Annie Smithers brings a cook's palate, a grower's heart and a poet's soul to bear in the moving, practical, inspiring story of her life. It's the how-to (and how-to-not!) book I wish I'd read before starting my own kitchen garden, complete with hothouse tips, philosophy and all the recipes you may ever need.' Matthew Evans 'This is a deeply honest and personal story of a love of the land and food. Annie takes us, warts and all, on her sustainable journey of cultivation and cooking. Her respect for the land is evident by the barrowload.' Paul Bangay OAM In this generous account of life on the land and in the kitchen, trailblazing cook Annie Smithers chronicles her quest for a more sustainable existence, in harmony with the environment and the self. Part meditation, part memoir, the book offers practical advice and wisdom

gleaned from a life dedicated to seasonal food and living lightly on the ground beneath her feet. Annie's story spans thirty years of productive gardens and kitchens across country Victoria. Now settled on a plot of land in Lyonville, which she farms for her family and her restaurant, du Fermier, she shares her hard-won lessons: setting up du Fermier, the gardens and the buildings on the farm; working with the weather, water and resident animals; and seeking the emotional stability so often elusive amid the crushing pressures of the restaurant industry. Recipes that celebrate the harvested produce and local environs accompany each step of the journey. Recipe for a Kinder Life offers a guiding hand for anyone, from the city to the regions, who yearns to live more gently. It is about caring for land and reaping the bounty. But at its heart, it reveals that the key to living a sustainable life is finding the best way to sustain yourself.

Reading the Seasons Germaine Leece, Sonya Tsakalakis, 2021-03-30 It's an old cliché that books 'transport you'; but as any avid reader will tell you, there's far more to them than that. Alongside comfort and retreat, books offer insight into ourselves and others; they tell us how the world is, was or might be; they are windows into other worlds, whose meanings resonate through the ages. It's this multiplicity that is at the heart of bibliotherapy, the ancient practice of reading for therapeutic effect. Reading the Seasons charts the evolution of a friendship through candid letters between bibliotherapists Germaine Leece and Sonya Tsakalakis. Ignited by a shared love of reading, of finding a book for every occasion, every emotion - both for themselves and for their clients - their conversations soon confront life's ups and downs. The authors they reach for range from Stephen King to Javier Marias, Helen Garner to Maggie O'Farrell, as they reflect upon loss, change, parenting, careers, simple pleasures, travel, successes, fears and uncertainty. Reading the Seasons not only offers an entryway to new titles but affirms the power of books to console, heal and hold us together as friends and as individuals.

Architecture at the Heart of the Home Jan Henderson, Dianna Snape, 2021-10-26 Increasingly, domestic architecture has sought to enhance everyday life by providing resonant settings that reflect the human need for comfort, safety and connection. A house has walls and ceilings, and perhaps a garden, but beyond that, there is always that one part of a home that becomes a place of belonging, around which people gather. Architecture at the Heart of the Home showcases those special places and features that make a residence unique. Of course, there are kitchen and dining areas, but a home's heart can also be the physical link between the interior and the exterior, a view, a particular room, or even an architectural feature: a pool that reflects the sky overhead, windows that frame a panoramic vista, or a building's position in the landscape. The projects in this book are not necessarily grand in scale, but all reveal extraordinary settings that fill the heart with joy and the soul with happiness - the places where memories are made.

Growing Up in New Guinea Margaret Mead, 2016-05-10 Now with a new introduction by Howard Gardner, Ph.D., Mead's second book following her landmark Coming of Age in Samoa, Growing Up in New Guinea established Mead as the first anthropologist to look at human development in a cross-cultural perspective. Margaret Mead was 23 when she traveled alone to Samoa on her first expedition to the South Seas. Her first book, Coming of Age in Samoa, chronicled that visit and launched her distinguished career. Following her landmark field work focusing on girls in American Samoa, noted anthropologist Margaret Mead found that she needed to study preadolescents in order to understand adolescents. In 1928 she went to Manus Island in New Guinea, where she studied the play and imaginations of younger children and how they were shaped by adult society. Mead and her second husband, Reo Fortune, lived in 24-hour contact with the inhabitants of this fishing village.

The Star of Bethlehem Aaron Adair, Bob Berman, 2013-09-09 The Star of Bethlehem: A Skeptical View is an analysis of the astronomical portent found in the Gospel of Matthew which supposedly led the Magi from the East to the birthplace of Jesus. Throughout history, people have tried to connect the Star to real, naturalistic phenomena, as well as to explain it in other ways. Adair takes a thorough look at all of these explanatory attempts, using the tools of science and astronomy, and finds them fundamentally wanting. Take a trip through the heavens above with Adair as he critically explores many centuries of flawed hypotheses, looking to answer the question Did the Star of Bethlehem really

exist? This book is at the conjunction of science and religion. Well researched, scientifically reasoned, elegantly concise, this book will long be required reading on the 'Star of Bethlehem'. Full of fascinating historical facts, and better informed and more careful than any other book on the subject, this should be on the shelf of everyone interested in that legendary celestial event. Richard Carrier, Ph.D., author of *Proving History: Bayes's Theorem and the Quest for the Historical Jesus*. A fascinating and readable feat of hardcore historical legwork and keen scientific analysis. David Fitzgerald, author of *The Complete Heretic's Guide to Western Religion: The Mormons*. ...tightly-argued, well-reasoned.... Adair masterfully demonstrates why every effort to rationalize the Star thus far has failed.... A concise and rigorous must-read for anyone interested in religion, history, and modern efforts to understand the past. Jason Colavito, author of *The Cult of Alien Gods*.

Science and Religion Gregg D. Caruso, 2014-04 Are science and religion compatible when it comes to understanding cosmology (the origin of the universe), biology (the origin of life and of the human species), ethics, and the human mind (minds, brains, souls, and free will)? Do science and religion occupy non-overlapping magisteria? Is Intelligent Design a scientific theory? How do the various faith traditions view the relationship between science and religion? What, if any, are the limits of scientific explanation? What are the most important open questions, problems, or challenges confronting the relationship between science and religion, and what are the prospects for progress? These and other questions are explored in *Science and Religion: 5 Questions*-a collection of thirty-three interviews based on 5 questions presented to some of the world's most influential and prominent philosophers, scientists, theologians, apologists, and atheists. Salad Janneke Philippi, 2022-02-15 Freshen up the table with bright and beautiful salads. Salads are so versatile: healthy and inexpensive meals that can be thrown together using endless combinations of ingredients and a little creativity. Dressed up or pared back, a salad can be as simple as tossing a few green leaves in a bowl or served as a main meal packed with vegetables, grains, or your choice of protein. This cookbook is filled with light, everyday meals for all occasions, with dressings to mix and match, ideas for toppings, and simple breads and crackers to make from scratch. Filled with beautiful photography and suggestions to make each dish your own, *Salad* is a book about so much more than the humble lettuce.

A Room of Her Own Robyn Lea, 2021-06-08 Meet the creative women who are living life on their own terms, and the unique living spaces they have designed and inhabit in this lavishly produced volume. Creative practitioners, philosophers, and rebels, the women chronicled in this volume refuse to compartmentalize or neglect any of their talents or interests. Instead, their lives are a canvas for their artistry. We see it in their homes and studios, on their tables, and in their wardrobes. Equal parts biography and interior design study, *A Room of Her Own* features twenty extraordinary women and takes us on a private tour across the world into their personal and professional domains. Among them are painters, sculptors, writers, chefs, designers, jewelers, curators, makers, and directors. While each woman has navigated a unique path, they are united in their refusal to play by the rules of others. Taking in the likes of the grand, sweeping halls of a castle in the Austrian countryside, a convent-like property in Mexico, and a cozy home on the banks of the Hudson, this book celebrates the homes, philosophies, design aesthetics, and practices of these inspiring multihyphenates.

High Grade Living Jacqui Lewis, Arran Russell, 2020-10-27 In an increasingly frenetic and fractured world, we have lost the essence of ourselves. This book is a guide to stripping away artifice in your life to discover your 'broad place', where you come into contact with your higher self as a creative and conscious human. *High-Grade Living* demonstrates how a strong foundation of meditation can benefit all areas of your life, from the home to relationships, creativity and happiness. The book examines

how to audit, edit and refine your home through considered exercises on assessing excess and determining how well your possessions reflect who you are. Other prompts will help your creativity flow and establish how your words and actions embody who you want to be. Author Jacqui Lewis is a long-time practitioner of Integrated Meditation and founder of multiple businesses who has lived life at the extremes of stress and anxiety, and now teaches others the grounded, innovative and resilient approach that brought her back to herself.
