User Experience in the Age of Sustainability Kem-Laurin Kramer,2012-05-30 User Experience in the Age of Sustainability focuses on the economic, sociological and environmental movement in business to make all products including digital ones more sustainable. Not only are businesses finding a significant ROI from these choices, customers are demanding this responsible behaviour. The author looks at user experience practice through the lens of sustainability whether it be a smart phone, service – based subscription solutions or sustainable packaging to expose the ways in which user researchers and designers can begin to connect to the sustainability not merely as a theoretical. This book has a practical take on the matter providing a framework along with case studies and personal stories from doing this work successfully. Both hardware and software design are covered. Learn about the fundamentals of sustainability and how it can change the future of user experience professionals Learn how to integrate sustainability into designs with a solid framework using user research methodology, techniques, and purposeful metrics Find out how to integrate sustainability frameworks into the software and product development cycles Find out how sustainability applies to mobile and digital products with discussions on user messaging, dematerialization, and efficient design See how companies have made it work with case studies

The STREAM TONE: The Future of Personal Computing? T. Gilling,2017-02-13 Personal computing is changing from an old world of local services provided by local devices to a new world of remote Web-based services provided by cloud computing-based data centres. This book explores in detail what might be required to make a comprehensive move to this exciting new world and the many benefits that move could bring.

Smart Education and e-Learning 2016 Vladimir L. Uskov,Robert J. Howlett,Lakhmi C. Jain,2016-06-13 This book contains the contributions presented at the 3rd international KES conference on Smart Education and Smart e-Learning, which took place in Puerto de la Cruz, Tenerife, Spain, June 15-17, 2016. It contains a total of 56 peer-reviewed book chapters that are grouped into several parts: Part 1 - Smart University: Conceptual Modeling, Part 2 – Smart Education: Research and Case Studies, Part 3 – Smart e-Learning, Part 4 – Smart Education: Software and Hardware Systems, and Part 5 – Smart Technology as a Resource to Improve Education and Professional Training. We believe that the book will serve as a useful source of research data and valuable information for faculty, scholars, Ph.D. students, administrators, and practitioners - those who are interested in innovative areas of smart education and smart e-learning.

Why Managing Sucks and How to Fix It Jody Thompson,Cali Ressler,2013-01-22 Change the way you think about work (and life) by focusing on results—and only results Why Managing Sucks and How to Fix It shows how the Results-Only Work Environment (ROWE) mindset can make you or your organization more entrepreneurial, more connected with the broader trends in your industry, and more willing to take smart risks. It explains how to set clear expectations and focus on the endpoint as opposed to managing the process that gets you there. With eyes set on getting rid of distractions, long meetings, and unnecessary updates, this book offers quick, everyday strategies to experience huge increases in productivity (without adding resources) and dramatic drops in turnover. Authors Ressler and Thompson began their work together at Best Buy where they are credited with revolutionizing the workplace Reframes thinking away from counting on general availability (Where's Bob?) to creating clear expectations (Does Bob know exactly what's expected of him?) Explains how to reduce the number of meetings while increasing their quality Shows how to eliminate scheduled events in order to increase critical thinking and improve communication ROWE is a bold, cultural transformation that permeates the attitudes and operating style of an entire workplace, leveling the playing field and giving people complete autonomy—to manage their measurable results using adult common sense.

Power Generation from Solid Fuels Hartmut Spliethoff,2010-03-18 Power Generation from Solid Fuels introduces the different technologies to produce heat and power from solid fossil (hard coal, brown coal) and renewable (biomass, waste) fuels, such as combustion and gasification, steam power plants and combined cycles etc. The book discusses technologies with regard to their efficiency, emissions, operational behavior, residues and costs. Besides proven state of the art processes, the focus is on the potential of new technologies currently under development or demonstration. The main motivation of the book is to explain the technical possibilities for reducing CO2 emissions from solid fuels. The strategies which are treated are: more efficient power and heat generation technologies, processes for the utilisation of renewable solid fuels, such as biomass and waste, and technologies for carbon capture and storage. Power Generation from Solid Fuels provides, both to academia and industry, a concise treatment of industrial combustion of all types of solid, hopefully inspiring the next generation of engineers and scientists.

From AIDS to Population Health James D. Kelly,2022-11 From AIDS to Population Health explores the thirty-year history of a unique collaboration between the medical schools of Indiana University and Moi University in Kenya, as it progressed from combating the HIV/AIDS epidemic in East Africa

to the building of a national plan to provide universal healthcare to all. The Academic Model Providing Access to Healthcare (AMPATH) program focuses on the medical education of healthcare professionals who are building communities that can take care of themselves. The overwhelming success of the AMPATH program and its continuing vibrant legacy today are showcased through dozens of striking photographs, telling interviews, and revealing anecdotes and encounters. It focuses on four of the most innovative projects among the fifty that AMPATH oversees: a microfinance officer who organizes villagers, an oncology nurse who runs outreach clinics, a farm extension agent working in partnership with a multinational agriculture corporation to improve farm output, and a special healthcare clinic exclusively for adolescents. Over its thirty-year history, AMPATH has served more than a million clients and trained 2,600 medical professionals and community health workers, always guided by its motto Leading with Care. From AIDS to Population Health presents their compelling stories and explores the program's continuing legacy for the first time.

Motorcycle Road Trips (Vol. 3) Turbo Chronicles – 137,000 Miles With A Yamaha Turbo Backroad Bob,2010-06-23 Eighteen previously published magazine articles gleaned from 25 years and 137,000 miles of Yamaha Turbo ownership. Installing a K&N air filter, following Team Turbo, meeting other clubs' members, reviewing all the Turbos, attending Turbo Rallies, revealing dyno truths, and sharing what's been learned from many years and even more miles of turbo ownership are just some of the subjects covered.

Making Cell Groups Work Navigation Guide Joel Comiskey, Scott Boren, Ralph Neighbour, Randall Neighbour, Bill Beckham,2023-05-27 This is an expanded, 624-page reference tool for the 8-stage transition process found in *How Do We Get There From Here?* (formerly titled, *Making Cell Groups Work*). This sizable compilation is filled with hundreds of articles by pastors and experts, including helpful articles such as how to transition your church's calendar and budget to allow for a growing holistic small group (cell group) ministry, how to choose team members to implement the transition; tips on how to prototype groups; and much much more! One of the most valuable tools found in this resource is a revealing readiness assessment tool, which will help you determine weaknesses (if any) in four key areas of church health, all of which are required for a successful transition.

Accelerating Change in Schools Linda Dudar,Shelleyann Scott,Donald E. Scott,2017-03-24 This book presents major findings from a research study exploring the leadership needed to enact rapid change – defined as three years or less – in various school contexts, overtly including the perspectives of leaders, teachers, students, parents, community members, and district leaders.

~~Swarming Landscapes~~ Rob Roggema,2012-12-02 This book advocates a fresh approach to planning that anticipates, rather than reacts to, the changes in climate currently in process. Today’s spatial planning procedures rely on historical evidence instead of preparing for factors that by definition lie in the future, yet which are relatively uncontroversial: shortages of water, sea level rise and rises in average temperatures being but three examples. Arguing for more flexibility, the contributors view ‘complexity’ as the key to transforming the way we plan in order to better equip us to face uncertainties about our future environment.

The Handbook for SMART School Teams Anne E. Conzemius,Jan O'Neill,2013-12-18 Prepare your students for the future while juggling the expectations of multiple stakeholders! A fresh take on the classic first edition, this guide defines and advocates SMART goals—goals that are Strategic and specific, Measurable, Attainable, Results oriented, and Time bound. Gain a schoolwide understanding of how to cultivate a productive collaborative culture, and engage every member of your team in the process.
