INTRODUCTION TO INFORMATION TECHNOLOGY RAJARAMAN, V.,2018-01-01 his textbook is designed to teach a first course in Information Technology (IT) to all undergraduate students. In view of the all-pervasive nature of IT in today's world a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor's degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental "Science" of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize, process and disseminate processed data, namely, information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably stable, fundamental concepts on which the technology is built. A unique feature of the book is the discussion of topics such as image, audio and video compression technologies from first principles. We have also described the latest technologies such as 'e-wallets' and 'cloud computing'. The book is suitable for all Bachelor's degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know, the principles used to design jpg, mp3 and mpeg4 compression, the image formats—bmp, tiff, gif, png, and jpg, search engines, payment systems such as BHIM and Paytm, and cloud computing, to mention a few of the technologies discussed, will find this book useful. KEY FEATURES • Provides comprehensive coverage of all basic concepts of IT from first principles • Explains acquisition, compression, storage, organization, processing and dis-semination of multimedia data • Simple explanation of mp3, jpg, and mpeg4 compression • Explains how computer networks and the Internet work and their applications • Covers business data processing, World Wide Web, e-commerce, and IT laws • Discusses social impacts of IT and career opportunities in IT and IT enabled services • Designed for self-study with every chapter starting with learning objectives and concluding with a comprehensive summary and a large number of exercises.

Parental Control of Television Broadcasting Monroe E. Price,Stefaan Verhulst,2002-01-12 This project, originally developed for the European Community, examines parental roles in controlling television programs watched by children in Europe. The structure of the study includes: *an analysis of the technical devices available to assist in parental control of television broadcasting services, including descriptions of devices, their cost, availability, and the infrastructure needed to introduce them; *a corresponding analysis of potential ratings or labeling systems to work in conjunction with or in the place of technical devices, enabling a comparative analysis of rating systems used in film, video, and online services; and *an overview and assessment of the educational and awareness measures in the field of protection of minors and harmful content, providing the data for the review of available considerations in this field of viewer literacy. In addition to these main strands of analysis, the study provides for background information and analysis in the following areas: *an overview of the main media theories focusing on the effect and impact of specific types of content on children and their behavior; *an assessment of the economic impact and social efficacy of different protective measures; and *a comparison of the regulatory contexts and rating systems for film, video, television, and online services concerning the protection of minors from harmful content. This volume is intended for scholars and students in comparative media studies, media policy, and regulation.
