One and the Same Abigail Pogrebin, 2010-10-05

Journalist Abigail Pogrebin is many things—wife, mother, New Yorker—but the one that has defined her most profoundly is “identical twin.” As children, she and her sister, Robin, were inseparable. But when Robin began to pull away as an adult, Abigail was left to wonder not only why, but also about the very nature of twinship. What does it mean to have a mirror image? How can you be unique when somebody shares your DNA? In *One and the Same*, Abigail sets off on a quest to understand how genetics shape us, crisscrossing the country to explore the varied relationships between twins, which range from passionate to bitterly resentful. She speaks to the experts and tries to answer the question parents ask most—is it better to encourage their separateness or closeness? And she paints a riveting portrait of twin life, yielding fascinating truths about how we become who we are.

Mothering Twins Linda Albi, Deborah Johnson, Debra

Catlin, Donna Florien Deurloo, Sheryll Greatwood, 2010-06-15 Invaluable real-life advice and emotional support for mothers of multiples. Meeting the double challenge and reaping the double rewards of having twins can be both exhilarating and exhausting. In this comprehensive guide to twin pregnancy, birth, and early childhood, five mothers, with six sets of twins among them, share their experiences from the first thrill of seeing two heads on the ultrasound screen to coping with two toddlers determined to go in two directions at once. They offer a variety

of it worked for me solutions to the many situations unique to caring for twins, whether it's dealing with the complications of a high-risk pregnancy, creating effective support systems, or simply trying to find time for their husbands and themselves. Emphasizing individuality and adaptability, the authors of *Mothering Twins* encourage each mother to develop her own parenting approach, based on what's best for her and her children.

Cyber-physical Systems and Digital Twins Michael E. Auer, Kalyan Ram B., 2019-07-10 This book constitutes the proceedings of the 16th International Conference on Remote Engineering and Virtual Instrumentation (REV), held at the BMS College of Engineering, Bangalore, India on 3–6 February 2019. Today, online technologies are at the core of most fields of engineering, as well as of society as a whole, and are inseparably connected with Internet of Things, cyber-physical systems, collaborative networks and grids, cyber cloud technologies, service architectures, to name but a few. Since it was first held in, 2004, the REV conference has focused on the increasing use of the Internet for engineering tasks and the problems surrounding it. The 2019 conference demonstrated and discussed the fundamentals, applications and experiences in the field of online engineering and virtual instrumentation. It also presented guidelines for university-level courses on these topics, in view of the increasing globalization of education and the demand for teleworking, remote services and collaborative working environments.

The Twins in Search of Bigfoot Wanda

Gardner, 2012-05-17 After their parents were killed in an automobile accident when the twins were two, Sarah Fay and Shannon Ray are twins being raised by their grandmother on a small farm on the edge of a wooded area in the beautiful Ozarks area of Missouri. Sarah loves to eat and sleep so Shannon has his job cut out for him on weekends when he tries to get her out of bed early and down to the fishpond. Sarahs love of Grams delicious blueberry pancakes often helps Shannon get her to the pond Saturday mornings. This sunny, Spring Saturday seemed a normal day as the twins made their usual bet about who caught the biggest fish so the loser would have to make the other twins bed all next week. The day turned out to be anything but normal. When their German Shepard dog, Rex, joined them at the pond, they decide to play their usual hide from Rex game while he was splashing in the pond. Rex quickly finds them and on the way back to the pond, Rex senses danger. Seeing his strange behavior and realizing there is an even stranger, creepy silence in the woods, they stand quietly on the path where Rex, with the hair on his back raised, stopped suddenly. A huge, hairy creature slowly stepped around a tree into the clearing not twenty-five feet from where Sarah and Shannon stand frozen with fear behind their trembling dog. The creature was so close they could smell him. His stench was so bad it almost made them cough. The creature roared, then stepped back where he stood near a tree watching them before he disappeared into the woods. Rex, no longer sensing

danger, led the twins safely to the pond. While jogging back to the house, Shannon informed Sarah he could hardly wait to tell his friends at school Monday about seeing a Bigfoot. Monday brought great disappointment to Shannon when his friends wouldn't believe him. Sarah, seeing how crushed Shannon was by his buds' nonbelief, helped him come up with the plan to get solid proof of Bigfoot. The plan had been perfected, put in place, and was proving successful when suddenly Bigfoot needs help. Could the twins come up with a rescue plan in time to prevent a Bigfoot from drowning in an abandoned well? Thanks to Shannon's strength and Sarah's bravery they are successful in helping Bigfoot save his child. When the Bigfoot family is safely united and has gone back in the woods, Shannon realizes the family could be in serious danger if they present their proof. Shannon has learned some things are far more important than having friends believe you. Knowing hunters might shoot them, he decides to keep quiet about Bigfoot and his family to protect them. After all the woods is their home.

Search for the Causes of Schizophrenia Heinz Häfner, Wagner F. Gattaz, 2012-12-06 H. HAFNER and W. F. GATTAZ
Between 1891 and 1955, three founders of modern psychiatry, Emil Kraepelin (1856-1926),

Karl Jaspers (1883-1969) and Kurt Schneider (1887-1967) lectured at the University of Heidelberg: Kraepelin for 12 years, Jaspers for over 25 years and Schneider for approximately 10 years. During this period they laid the foundations of descriptive psychopathology and modern classification and contributed essentially to the development of our current thinking on schizophrenia. In 1986, on the occasion of the 600th anniversary of the University of Heidelberg, we held a symposium in memory of these three giants of psychiatry for which we chose the title Search for the Causes of Schizophrenia. It was jointly organized by the Central Institute of Mental Health in Mannheim and the Department of Psychiatry of the University of Heidelberg. The intention was to meet one of the major challenges of current psychiatric research, namely the fact that since Kraepelin's masterly description of Dementia praecox (1894) and E. Bleuler's slightly different definition of schizophrenia (1911), we have made only insufficient advances in clarifying the aetiology of this frequent and still often disabling mental disease.

Born Together-Reared Apart Nancy L.

Segal, 2012-06-18 The identical "Jim twins" were raised in separate families and met for the first time at age thirty-nine, only to discover that they both suffered tension headaches, bit their fingernails, smoked Salems, enjoyed woodworking, and vacationed on the same Florida beach. This example of the potential power of genetics captured widespread media attention in 1979 and inspired the Minnesota Study of Twins Reared Apart. This landmark investigation into the nature-nurture debate shook the scientific community by demonstrating, across a number of traits, that twins reared separately are as alike as those raised together. As a postdoctoral fellow and then as assistant director of the Minnesota Study, Nancy L. Segal provides an eagerly anticipated overview of its scientific contributions and their effect on public consciousness. The study's evidence of genetic influence on individual differences in traits such as personality (50%) and intelligence (70%) overturned conventional ideas about parenting and teaching. Treating children differently and nurturing their inherent talents suddenly seemed to be a fairer approach than treating them all the same. Findings of genetic influence on physiological characteristics such as cardiac and immunologic function have led to more targeted approaches to disease prevention and treatment. And indications of a stronger genetic influence on male than female homosexuality have furthered

debate regarding sexual orientation.

Search Engine Advertising Catherine Seda, 2004
Most Internet search engines now allow marketers to buy specific keyword positions in addition to, or instead of, programming their way to the top. This book reveals how to effectively buy a top position on the major search engines and directories.

Someone Else's Twin Nancy L. Segal, 2011-07-19
The combination of a riveting true story and cutting-edge twin research makes this book an irresistible page-turner. Identical twins Begoña and Delia were born thirty-eight years ago in Spain's Canary Islands. Due to chaotic conditions at the hospital or simple human error, the unthinkable happened: Delia was unintentionally switched with another infant in the baby nursery. This fascinating story describes in vivid detail the consequences of this unintentional separation of identical twin sisters. The author considers not only the effects on these particular sisters, but the important implications of this and similar cases for questions concerning identity, familial bonds, nature-nurture, and the law.

Offers unique insights into twinning rates, mechanisms and factors surrounding twinship Provides clear instruction on both basic and advanced twin research methods and study design Features leading international experts in twin biology, genetics, health and psychology Examines findings from recent twin studies across a broad array of health and behavioral studies

Separated @ Birth Anais Bordier, Samantha Futerman, 2015-01-28 It all began when design student Ana s Bordier viewed a YouTube video and saw her own face staring back. After some research, Ana s found that the Los Angeles actress Samantha Futerman was born in a South Korean port city called Busan on 19 November 1987 - the exact same location and day that Ana s was born. This propelled her to make contact on Facebook. One

message later, both girls wondered: Could they be twins? Thus begins their remarkable journey to build a relationship as sisters, continents apart.

Exploring Mathematics with Integrated Spreadsheets in Teacher Education Sergei

Abramovich, 2015-07-30 The goal of the book is to technologically enhance the preparation of mathematics schoolteachers using an electronic spreadsheet integrated with Maple and Wolfram Alpha – digital tools capable of sophisticated symbolic computations. The content of the book is a combination of mathematical ideas and concepts associated with pre-college problem solving curriculum and their extensions into more advanced mathematical topics. The book provides prospective and practicing teachers with a foundation for developing a deep understanding of many concepts fundamental to the teaching of school mathematics. It also provides the teachers with a technical expertise in designing spreadsheet-based computational environments. Consistent with the current worldwide guidelines for technology-enhanced teacher preparation, the book emphasizes the integration of context, mathematics, and technology as a method for teaching mathematics. Throughout the book, a number of mathematics education documents developed around the world (Australia, Canada, England, Japan, Singapore, United States) are reviewed as appropriate.

Search Engine Society Alexander Halavais, 2013-04-25 Search engines have become a

key part of our everyday lives. Yet while much has been written about how to use search engines and how they can be improved, there has been comparatively little exploration of what the social and cultural effects might be. Like all technologies, search engines exist within a larger political, cultural, and economic environment. This volume aims to redress this balance and to address crucial questions such as: * How have search engines changed the way we organize our thoughts about the world, and how we work? * What are the 'search engine wars', what do they portend for the future of search, and who wins or loses? * To what extent does political control of search engines, or the political influence of search engines, affect how they are used, misused, and regulated? * Does the search engine help shape our identities and interactions with others, and what implications does this have for privacy? Informed members of the information society must understand the social contexts in which search engines have been developed, what that development says about us as a society, and the role of the search engine in the global information environment. This book provides the perfect starting point.

Digital-Twin-Enabled Smart Control Engineering

Jairo Viola, YangQuan Chen, 2023-03-13 This book presents a novel design framework for the development of Digital Twin (DT) models for process- and motion-control applications. It is based on system-data acquisition using cutting-edge computing technologies, modelling of physical-system behavior through detailed simultaneous simulation of different aspects of the system, and optimal dynamic behavior-matching of the process. The design framework is enhanced with real-time data analytics to improve the performance of the DT's behavior-matching with the real system or physical twin. The methods of creating a DT detailed in Digital-Twin-Enabled Smart Control Engineering make possible the study of a system for real-time controller tuning and fault detection. They also facilitate life-cycle analysis for multiple critical and dangerous conditions that cannot be explored in the corresponding real system or physical twin. The authors show how a DT can be exploited to enable self-optimizing capabilities in feedback control systems. The DT framework and the control-performance assessment, fault diagnosis and prognosis, remaining-useful-life analysis, and self-optimizing control abilities it allows are validated with both process- and motion-control systems and their DTs. Supporting MATLAB-based

material for a case study and an expanded introduction to the basic elements of DTs can be accessed on an associated website. This book helps university researchers from many areas of engineering to develop new tools for control design and reliability and life-cycle assessment and helps practicing engineers working with robotic, manufacturing and processing, and mechatronic systems to maintain and develop the mechanical tools they use.

Imperial Japanese Navy Light Cruisers 1941-45

Mark Stille, 2012-02-20 The Imperial Japanese Navy went to war with 17 light cruisers and another three cruiser-sized training ships. Of these, most were 5,500-ton ships designed to act as destroyer squadron flagships. This made them much different in capabilities and mission from their American counterparts. During the war, the Japanese built another five light cruisers, all but one of which maintained the design premise of being able to serve as destroyer squadron flagships. During the war, Japanese light cruisers were active throughout the Pacific performing many missions in addition to their flagship duties. Mark Stille continues Osprey's coverage of the IJN of WWII

with this concise and complete study of all 25 ships, from their design and development to their ultimate fates. Detailed Osprey artwork and rare period photographs from the Fukui collection held in Kure, Japan illustrate this discussion.
