The Pragmatics of Text Messaging Michelle A. McSweeney,2018-05-30 This book provides a comprehensive linguistic exploration of textism use by bilingual young adults, illustrating the function of alternative and creative linguistic features and their role in conveying tone through text. Drawing on a corpus of nearly 45,000 text messages donated by bilingual young adults in New York City, this volume explores the ways in which the use of texting features such as 'lol,' emojis, abbreviations, and acronyms is systematic and essential. In part, toward the aim of exposing the tensions bilinguals face navigating a platform that preferences monolingual language practices, the book highlights creativity as a means of both constructing meaning and performing identity for bilingual youths. These findings are extended to explore the role texting plays in communication and identity construction in contemporary society more generally. This volume extends the boundaries of emerging research on language and digital communication, and will be of particular interest to graduate students and scholars in computer-mediated communication, pragmatics, and new media.

Content is King David Mill,2005 Providing guidance on how to write, edit and publish more effective content for online readership, this text addresses important topics to consider when writing for the Web, including how to write for Web sites, e-mail, e-zines, newsletters, search engines and also how to place online ads.

Content is King David Chaffey,David Mill,2012-05-23 A growing number of information providers are now online, and as a result being able to produce copy that is suitable for an online readership is of increasing importance. In this text the basic principles of copywriting are covered, along with more specific guidance on writing for online sources. The differences between writing for online and offline are highlighted to enable the reader to distinguish between the two and consequently write the best form of copy for the end source. Different sources of online content require different approaches, and therefore the author takes a structured approach, taking each of these channels in turn, for example writing for web sites, writing for email, ezines and newsletters, writing for search engines, and writing for online ads. By approaching each topic individually, specific guidance is provided enabling the reader to be properly equipped with the tools required to write the most appropriate copy for the task in hand.

An Introduction to Python Programming for Scientists and Engineers Johnny Wei-Bing Lin,Hannah Aizenman,Erin Manette Cartas Espinel,Kim Gunnerson,Joanne Liu,2022-05-31 Python is one of the most popular programming languages, widely used for data analysis and modelling, and is fast becoming the leading choice for scientists and engineers. Unlike other textbooks introducing Python, typically organised by language syntax, this book uses many examples from across Biology, Chemistry, Physics, Earth science, and Engineering to teach and motivate students in science and engineering. The text is organised by the tasks and workflows students undertake day-to-day, helping them see the connections between programming tools and their disciplines. The pace of study is

carefully developed for complete beginners, and a spiral pedagogy is used so concepts are introduced across multiple chapters, allowing readers to engage with topics more than once. "Try This!" exercises and online Jupyter notebooks encourage students to test their new knowledge, and further develop their programming skills. Online solutions are available for instructors, alongside discipline-specific homework problems across the sciences and engineering.

Envisioning Machine Translation in the Information Future John S. White,2003-07-31 Envisioning Machine Translation in the Information Future When the organizing committee of AMTA-2000 began planning, it was in that brief moment in history when we were absorbed in contemplation of the passing of the century and the millennium. Nearly everyone was comparing lists of the most important accomplishments and people of the last 10, 100, or 1000 years, imagining the radical changes likely over just the next few years, and at least mildly anxious about the potential Y2K apocalypse. The millennial theme for the conference, "Envisioning MT in the Information Future," arose from this period. The year 2000 has now come, and nothing terrible has happened (yet) to our electronic infrastructure. Our musings about great people and events probably did not ennoble us much, and whatever sense of jubilee we held has since dissipated. So it may seem a bit obsolete or anachronistic to cast this AMTA conference into visionary themes.

Formulaic language Aleksandar Trklja,Łukasz Grabowski, The notion of formulaicity has received increasing attention in disciplines and areas as diverse as linguistics, literary studies, art theory and art history. In recent years, linguistic studies of formulaicity have been flourishing and the very notion of formulaicity has been approached from various methodological and theoretical perspectives and with various purposes in mind. The linguistic approach to formulaicity is still in a state of rapid development and the objective of the current volume is to present the current explorations in the field. Papers collected in the volume make numerous suggestions for further development of the field and they are arranged into three complementary parts. The first part, with three chapters, presents new theoretical and methodological insights as well as their practical application in the development of custom-designed software tools for identification and exploration of formulaic language in texts. Two papers in the second part explore formulaic language in the context of language learning. Finally, the third part, with three chapters, showcases descriptive research on formulaic language conducted primarily from the perspectives of corpus linguistics and translation studies. The volume will be of interest to anyone involved in the study of formulaic language either from a theoretical or a practical perspective.
