Web Mining: From Web to Semantic Web Bettina Berendt,Andreas Hotho,Dunja Mladenic,Maarten van Someren,Myra Spiliopoulou,Gerd Stumme,2011-04-05 In the last years, research on Web mining has reached maturity and has broadened in scope. Two different but interrelated research threads have emerged, based on the dual nature of the Web: – The Web is a practically in?nite collection of documents: The acquisition and - ploitation of information from these documents asks for intelligent techniques for information categorization, extraction and search, as well as for adaptivity to the interests and background of the organization or person that looks for information. – The Web is a venue for doing business electronically: It is a venue for interaction, information acquisition and service exploitation used by public authorities, n- governmental organizations, communities of interest and private persons. When observed as a venue for the achievement of business goals, a Web presence should be aligned to the objectives of its owner and the requirements of its users. This raises the demand for understandingWeb usage, combining it with other sources of knowledge inside an organization, and deriving lines of action. ThebirthoftheSemanticWebatthebeginningofthedecadeledtoacoercionofthetwo threadsintwoaspects:(i)theextractionofsemanticsfromtheWebtobuildtheSemantic Web;and(ii)theexploitationofthesesemanticstobettersupportinformationacquisition and to enhance the interaction for business and non-business purposes. Semantic Web mining encompasses both aspects from the viewpoint of knowledge discovery.

The Fire and Fuels Extension to the Forest Vegetation Simulator Elizabeth D. Reinhardt,2003 The Fire and Fuels Extension (FFE) to the Forest Vegetation Simulator (FVS) simulates fuel dynamics and potential fire behavior over time, in the context of stand development and management. Existing models of fire behavior and fire effects were added to FVS to form this extension. New submodels representing snag and fuel dynamics were created to complete the linkages. This report contains four chapters. Chapter 1 states the purpose and chronicles some applications of the model. Chapter 2 details the model's content, documents links to the supporting science, and provides annotated examples of the outputs. Chapter 3 is a user's guide that presents options and

examples of command usage. Chapter 4 describes how the model was customized for use in different regions. Fuel managers and silviculturists charged with managing fire-prone forests can use the FFEFVS and this document to better understand and display the consequences of alternative management actions.

U. S. Civil Aircraft Joseph P. Juptner,1967 This is the definitive history of U.S. civil air-craft, a classification in 1927 and continued through 1948, when the certification system was changed. An invaluable resource, this series is a tribute to the more than 800 aircrafts it describes and illustrates, as well as to the people who made them famous. Nineteen years of intensive research is represented in the series--every aircraft is explored down to the last river. Juptner provides specifications, performance figures, production information, and prices in meticulous detail. Outstanding photography, aircraft and company histories, and the names of designers round out the books in this one-of-a-kind collector's series.
