Paul Renner Christopher Burke,1998-12 German typographer Paul Renner is best known as the designer of the typeface Futura, which stands as a landmark of modern graphic design. This is the first study of Renner's typographic career, detailing his life and work to reveal the breadth of his accomplishment and influence.

Adrian Frutiger – Typefaces Heidrun Osterer,Philipp Stamm,2021-04-06 The Swiss type designer Adrian Frutiger decisively influenced the international creation of typefaces after 1950. His Univers typeface and the machine-readable font OCR-B are milestones, as is his type for the Paris airports, which evolved into the Frutiger typeface. All set new standards for signage types. In all, he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research, this publication provides a highly detailed and accurate account of the type designer's artistic development. All of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture.

Basics Typography 01: Virtual Typography Matthias Hillner,2009-06 Basics Typography: Virtual Typography addresses a fundamentally new form of typographical communication. The book explores the visual arrangement of words and letters in the context of multimedia. Here, this arrangement is not simply a spatial positioning of text information it is also bound by time. The increasing use of moving, virtual type can help to harmonise this time-based presentation of words on screen. The book touches on work from a variety of designers, including Channel 4 and Pentagram Design. This will provide an excellent introduction to the latest methods in typographical and visual communication.

The New Typography Jan Tschichold,2023-11-10 Since its initial publication in Berlin in 1928, Jan Tschichold's The New Typography has been recognized as the definitive treatise on book and graphic design in the machine age. First published in English in 1995, with an excellent introduction by Robin Kinross, this new edition includes a foreword by Rich Hendel, who considers current thinking about Tschichold's life and work.

Typography /[Wolfgang Weingart]. Wolfgang Weingart,2000 Wolfgang Weingart's influence on the development of typography since the 1970s is unparalleled and his work has served as an inspiration to countless designers in both North America and Europe. In Typography, Weingart sums up an impressive lifework in 500 pages that describe his own development and the foundations of his teachings.

Adrian Frutiger – Typefaces Heidrun Osterer,Philipp Stamm,Swiss Foundation Type and Typography,2009-01-01 The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer's artistic development. For the first time, all of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture.

Caractère Typographique Comme Programme François Rappo,2010 This publication

continues the ECAL design series. The project began with a simple question: Is there such thing as a computer program capable of taking over the routine tasks of letter design? This issue, both artistic and digital, led the professors And The students of the Masters in Art Direction of the ECAL to imagine exchanges back and forth between digital type specifications And The actual shape of letters. They went into more general questions about the groups of shapes that make up our letters - stems, curves, and serifs - asking themselves how they could possibly simplify and further amalgamate these groups of shapes that monopolize the energy of schoolchildren, illustrators, and type designers alike. Calligraphy and hand-drawn letters comprise series of strokes and curves; mechanical typography does too, through the engraving process of punches and counter-punches. Digital typography, however, dematerializes this operation, leaving the choice of formal references open-ended. Does that mean novel forms of design could evolve through manipulating fonts' algorithmic data? Several small scripting programs were developed and tested by the students during a series of workshops. From a set of typography experiments based on these simple scripts, David Keshavjee and Julien Tavelli designed a text typeface that is featured in this book and displays the characteristics of the tool that generated it. As an extension to this concept, mobile wooden characters were made as a materialization of a graphic application arising from scripting techniques; this enabled play with typographic equipment, hand setting, spaces, and printing. Published with ECAL, University of art and design Lausanne. English and French text.

Electronic Publishing, Artistic Imaging, and Digital Typography Roger Hersch, Jacques Andre, Heather Brown, 2003-07-30 This book presents the refereed proceedings of the EP'98 and RIDT'98 conferences, held jointly during the Second International Week on Electronic Publishing and Typography in St. Malo, France, in March/April 1998. The 43 revised full papers presented were carefully selected for inclusion in the book. Among the topics covered are artistic imaging, tools and methods in typography, non-latin type, typographic creation, imaging, character recognition, handwriting models, legibility and design issues, fonts and design, time and multimedia, electronic and paper documents, document engineering, documents and linguistics, document reuse, hypertext and the Web, and hypertext creation and management.

The Fraktur Book was made by professional calligraphers and type researchers and includes some impressive examples of Fraktur Art that will delight you!

TypoLyrics Slanted, 2012-12-13 Graphic designers love music. This is attested not least by the tremendous enthusiasm that readers of the typography magazine Slanted bring to its Typo Lyrics column, in which designers interpret music in entirely new ways with the help of fonts. For this publication of the same name, celebrated graphic designers like Fons Hickmann as well as talented young designers from all over the world have taken song lyrics and used them as the inspiration for innovative font designs. The result is a collection of fascinating visuals – typographic images that present contemporary fonts a little bit differently. The extraordinary interplay of type design and music brings the fonts to life and practically sets them dancing. In contrast to classical pattern books and font fans, this volume provides a special, more emotional experience of typography and illustrates the great expressive potential of typefaces. On analogy with the traditional classification of fonts, the book is organized into eleven chapters, each of which treats a particular font family and

song lyrics from a particular musical style.
