Talking Politics in Broadcast Media Mats Ekström,Marianna Patrona,2011-08-26 This book is a collection of studies on political interaction in a variety of broadcast, namely news and current affairs programs, political interviews, audience participation programs and radio phone-ins. Following a growing scholarly interest in political discourses, dialogic forms of news production and media talk in general, a number of internationally acclaimed scholars investigate the discursive and interactional practices that give rise to the arena of public politics in contemporary society. Chapters span an array of cultural contexts, as diverse as Sweden, Greece, Belgium (Flanders), the U.K., Spain, Israel, the U.S.A., Australia and China. Authors combine an interest in discourse analysis and conversation analysis with different disciplinary orientations, such as linguistics, media and cultural studies, sociology, political science, and social psychology. The book uncovers current trends in media and political discourse, and will be of interest to both students and scholars of media discourse and politics.

Serving Their Communities Stephen Warley,2005 The New York State Broadcasters Association was founded in 1955 with a mission to provide radio and television broadcasters a stronger voice in government--and in the shaping of policies affecting media. This book chronicles in detail the history--and impact--of one of the nation's most influential media organizations. Representing television and radio broadcasting in the largest market in the country, NYSBA has helped set a national political agenda, just as it has worked for smaller stations and markets throughout the state. Stephen Warley tracks the way the Association has responded to a host of important issues--technological, economic, political, legal, and cultural--as it serves not only the profession but also the larger public interest in effective media access during an era of rapid consolidation. He also includes personal accounts from almost one hundred well-known broadcasters.

Crossing the Ether Sean Street,2006 Histories of British broadcasting suggest that the BBC monopoly was never seriously challenged until the coming of ITV in 1955. Crossing the Ether counters this view, telling the story of commercial radio's first challenge to the Public Service monopoly between 1930 and 1939. In the telling, this account provides substantial primary evidence that radio in Britain during the 1930s was a battleground between continental-based stations, run by British and American commercial interests, and the BBC, beset by paternalistic and sabbatarian principles.

Radio and Television Broadcasting on the European Continent Burton Paulu,1967-10-30 Radio and Television Broadcasting on the European Continent was first published in 1967. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. In this book Dr. Paulu provides a comprehensive survey based on firsthand study of the development and current status of radio and television broadcasting in continental Europe. He discusses the technical, organizational, financial, and programming aspects of European broadcasting in both Communist and Western countries. The material is organized, not on a country-by-country basis, but as it relates to broad basic issues, and it is presented in a framework of such interrelated factors as geography, history politics, international relations, religious traditions, language, national economic standards, and cultural and social life. The broadcasting systems studied include those of the Soviet Union and other Communist countries, France, West Germany, Belgium, the Netherlands, Italy, Sweden, and Switzerland. The account is particularly timely in view of the concern and discussion about the future course of broadcasting in the United States. It has relevance not only for communications specialists but for political scientists and other scholars in the social sciences as well as for the growing public which is interested in the improvement of American broadcasting.

A History of Broadcasting in the United States: The Image Empire Erik Barnouw,1970 During the iQSo's, in a frontier atmosphere of enterprise and sharp struggle, an American television system took shape. But even as it did so, its pioneers pushed beyond American borders and became programmers to scores of other nations. In its first decade United States television was already a world phenomenon. Since American radio had for some time had international ramifications, American images and sounds were radiating from transmitter towers throughout the globe. They were called entertainment or news or education but were always more. They were a reflection of a growing United States involvement in the lives of other nations an involvement of imperial scope. The role of broadcasters in this American expansion and in the era that produced it is the subject matter of The Image Empire, the last of three volumes comprising this study.
