Archer and Zowie ,2018-12-15 A sci-fi adventure for kids, written by an author of The Fallacy Detective. Use your imagination to travel into space with an evil microwave and learn the importance of Trash Day.This is a small, but feisty, story about Archer and Zowie: two friends who build a spaceship and travel into deep space on purpose but crash on an alien planet by accident. Then, get into a big argument about it.It is also about the mysterious Teleportee. A device so strange it can crumple up and chew on the whole universe in one googlebillionth of a second.In this book Archer and Zowie will battle dark matter, babysitters, teleporting microwave ovens, big penguin aliens, and even the author of this book to come out on the other side . . . very dirty.

Dispel Illusion Mark Lawrence,2019-12-31 Sometimes being wrong is the right answer. Nick Hayes's genius is in wringing out the universe's secrets. It's a talent that's allowed him to carve paths through time. But the worst part is that he knows how his story will end. He's seen it with his own eyes. And every year that passes, every breakthrough he makes, brings him a step closer. Mia's accident is waiting for them both in 2011. If it happens then he's out of choices. Then a chance 1992 discovery reveals that this seeker of truth has been lying to himself. But why? It's a question that haunts him for years. A straw he clings to as his long-awaited fate draws near. Time travel turns out not to be the biggest problem Nick has to work on. He needs to find out how he can stay on his path but change the destination. Failure has never been an option, and neither has survival. But Nick's hoping to roll the dice one more time. And this new truth begins with a lie.

Tools and Weapons Brad Smith,Carol Ann Browne,2019-09-10 The instant New York Times bestseller. From Microsoft's

president and one of the tech industry's broadest thinkers, a frank and thoughtful reckoning with how to balance enormous promise and existential risk as the digitization of everything accelerates. "A colorful and insightful insiders' view of how technology is both empowering and threatening us. From privacy to cyberattacks, this timely book is a useful guide for how to navigate the digital future." –Walter Isaacson Microsoft President Brad Smith operates by a simple core belief: When your technology changes the world, you bear a responsibility to help address the world you have helped create. This might seem uncontroversial, but it flies in the face of a tech sector long obsessed with rapid growth and sometimes on disruption as an end in itself. While sweeping digital transformation holds great promise, we have reached an inflection point. The world has turned information technology into both a powerful tool and a formidable weapon, and new approaches are needed to manage an era defined by even more powerful inventions like artificial intelligence. Companies that create technology must accept greater responsibility for the future, and governments will need to regulate technology by moving faster and catching up with the pace of innovation. In *Tools and Weapons*, Brad Smith and Carol Ann Browne bring us a captivating narrative from the cockpit of one of the world's largest and most powerful tech companies as it finds itself in the middle of some of the thorniest emerging issues of our time. These are challenges that come with no preexisting playbook, including privacy, cybercrime and cyberwar, social media, the moral conundrums of artificial intelligence, big tech's relationship to inequality, and the challenges for democracy, far and near. While in no way a self-glorifying Microsoft memoir, the book pulls back the curtain remarkably wide onto some of the company's most crucial recent decision points as it strives to protect the hopes technology offers against the very real threats it also presents. There are huge ramifications for communities and countries, and Brad Smith provides a thoughtful and urgent contribution to that effort.

Righteous Correction? Simon J Stephens, 2017-08-08 A thrilling new crime series based on the English canals. An enigmatic hero with a tragic past fights crime and injustice using cutting edge technology and drones. Zipoly is just an ordinary man, but after the tragic death of his family he has to take on a whole new role, avenging the wrongs his family have suffered. After reluctantly adapting to his new life circumstances, and with a shadowy organisation forcing him into even greater changes, Zip begins a new life living on a canal boat and travelling the waterways of England. With a new identity and now in a completely new life, Zip becomes the unlikeliest of crime fighters, working as an agent for an ancient secret order. Nobody knows who he is. To the people he meets as he cruises the canals of England, he's just another guy who's chosen to live a simple life on a narrow boat. To his handlers, he is 'The Kingfisher'. He does their bidding and restores the balance of justice when official means have failed. Zip finds that he is very good at his new role and succeeds where many had failed. That is, until his handlers ask him to cross a line he can, once again, never come back from... *Righteous Correction?* is a gripping work of crime fiction that also raises questions about justice and vigilantism – and their relationship to the official justice system. Can one ever justify the other?

Hacking the Hacker Roger A. Grimes,2017-04-18 Meet the world's top ethical hackers and explore the tools of the trade Hacking the Hacker takes you inside the world of cybersecurity to show you what goes on behind the scenes, and introduces you to the men and women on the front lines of this technological arms race. Twenty-six of the world's top white hat hackers, security researchers, writers, and leaders, describe what they do and why, with each profile preceded by a no-experience-necessary explanation of the relevant technology. Dorothy Denning discusses advanced persistent threats, Martin Hellman describes how he helped invent public key encryption, Bill Cheswick talks about firewalls, Dr. Charlie Miller talks about hacking cars, and other cybersecurity experts from around the world detail the threats, their defenses, and the tools and techniques they use to thwart the most advanced criminals history has ever seen. Light on jargon and heavy on intrigue, this book is designed to be an introduction to the field; final chapters include a guide for parents of young hackers, as well as the Code of Ethical Hacking to help you start your own journey to the top. Cybersecurity is becoming increasingly critical at all levels, from retail businesses all the way up to national security. This book drives to the heart of the field, introducing the people and practices that help keep our world secure. Go deep into the world of white hat hacking to grasp just how critical cybersecurity is Read the stories of some of the world's most renowned computer security experts Learn how hackers do what they do--no technical expertise necessary Delve into social engineering, cryptography, penetration testing, network attacks, and more As a field, cybersecurity is large and multi-faceted--yet not historically diverse. With a massive demand for qualified professional that is only going to grow, opportunities are endless. Hacking the Hacker shows you why you should give the field a closer look.

You Must Be Very Intelligent Karin Bodewits,2017-07-03 You Must be Very Intelligent is the author's account of studying for a PhD in a modern, successful university. Part-memoir and part-exposé, this book is highly entertaining and unusually revealing about the dubious morality and desperate behaviour which underpins competition in twenty-first century academia. This witty, warts-and-all account of Bodewits' years as a PhD student in the august University of Edinburgh is full of success and failure, passion and pathos, insight, farce and warm-hearted disillusionment. She describes a world of collaboration and backstabbing; nefarious financing and wasted genius; cosmopolitan dreamers and discoveries that might just change the world... Is this a smart people's world or a drip can of weird species? Modern academia is certainly darker and stranger than one might suspect... This book will put a wry, knowing smile on the faces of former researchers. And it is a cautionary parable for

innocents who still believe that lofty academia is erected upon moral high ground...

Hello, My Name Is Resilient Jessica Sage, 2018-09-24 In this world, all human beings face troubles. That is a guarantee from Jesus. Author Jessica Sage is no exception. But fortunately, Jesus does not leave us alone to deal with life's challenges. God walks with us, delivers us, and brings us through the other side of our struggles, stronger than before. In *Hello, My Name Is Resilient*, Sage shares her story. It speaks of a young woman coping with her parents' divorce as she begins a new life by seeking Jesus Christ first. Sometimes caught between the world around her and her church and family, she shares a chronicle of her journey through the good times and the bad. A memoir and spiritual guidebook, *Hello My Name Is Resilient*, addresses a host of topics through the lens of the Bible, including divorce, suicide, prayer, media, travel, the future, and one's calling. Sage's stories show how heeding the call of Christ led her to a sense of purpose she could not have found elsewhere.

Housing Design for an Increasingly Older Population Victor Regnier, 2018-08-06 "Longer lifespans and the needs of the oldest old are challenging the senior living industry to find bold and compassionate solutions to combine programs and services with housing. Victor Regnier's latest research provides a thoughtful and insightful roadmap that arrays new ways of thinking from small-scale settings to community based options. International case studies offer possible solutions with the best thinking from around the globe...all with Vic's unique perspective of extracting themes and concepts that are broadly applicable and essential to addressing the needs of those that live on life's fragile edge." -David Hoglund, FAIA "Supporting the independence of the oldest-old is a tough problem Victor Regnier addresses in his latest book on aging and housing. Like previous work, Victor relies on the best practices of northern Europeans to outline a three-prong approach. First, providing extremely comprehensive home care services in an apartment for life setting. Second, reforming the conventional nursing home by exploring small group style accommodations. Third, combining new technology with community based services to age in place. Case studies document the experiences of others in making these programs work here and abroad. The magnitude of the 90+ and 100+ population increases in the next 50 years make it clear how important it is to address this concern today." -Edward Steinfeld Darch "The movement of health care from the institution to the home is a theme that Regnier identifies as one of the most important lessons in rethinking the issue of how to support the ever growing and increasingly aged older population here and abroad. He examines simple but profound approaches we can take in making long-term care a more humane proposition. Familiar themes like humanizing technology and optimizing the impact of the natural environment are brought together with clear policy thinking about what we need to do. The timing is good because the impact of this growing segment of society will have major repercussions on health care for the next 50-70 years." -Stephan Verderber, Ph.D. A comprehensive guide to designing housing for the world's aging population The dilemma of helping older people maintain their independence through better housing with services is growing. This book presents innovative solutions for those who create and provide housing for the world's increasingly longer-living population. By focusing on three specific housing and service arrangements, it offers alternatives that provide greater freedom of choice than the current living arrangements that exist today. It presents selected examples of housing and service solutions from the US, Sweden, Denmark and the Netherlands to stimulate thinking about the possibilities of community-based service models. *Housing Design for an Increasingly Older Population* looks at a trio of options for housing the "oldest-old:" the Dutch Apartment/Condo for Life Model (AFL); decentralized Small/Green Houses; and the provision of enhanced personal and health care for people who want to stay in their own home. It offers unique and eye-opening chapters covering: what older people want; what age changes affect independence; demographics and living arrangements; how long-term care is defined; concepts and

objectives for housing the frail; care giving and management practices that avoid an institutional lifestyle; innovative case studies; programs that encourage staying at home with service assistance; therapeutic use of outdoor spaces; how technology will help people stay independent; and more. Based on the author's numerous conversations with other experts, as well as his examinations of high quality settings from Northern Europe and the US Building case study examples showcase innovative and compassionate solutions In-depth coverage of three major systems that work Examines successful programs such as PACE, Friendly Cities, NORC, and the "Village to Village Network" to demonstrate the progress made in helping older, frail people stay in their own homes for as long as possible Housing Design for an Increasingly Older Population: Redefining Assisted Living for the Mentally and Physically Frail is an important book for those who create, design, and manage assisted living and skilled nursing facilities, as well as for those who set policies regarding health, and personal care for our world's aging society.

The Vanishing Girl (Daphne and Velma #1) Josephine Ruby, 2020-03-03 It's the classic girl detectives like you've never seen them before! Daphne Blake and Velma Dinkley have a terrifying new mystery to solve - and this time, the culprit is far more frightening than any man in a mask... Popular Daphne Blake and über-nerd Velma Dinkley are not friends. They aren't enemies either, but they don't have any reason to speak to each other, and that's how they prefer it. The two girls grew up together - they'd been best friends since pre-K - but when they hit middle school, Daphne dropped Velma and never looked back. These days, Daphne's deep in the popular crowd, daughter of the richest family in town, while Velma's an outsider, hiding from the world behind her thick glasses. When they run into each other in the halls of Crystal Cove High, they look the other way. But then Daphne's best friend, Marcy - who happens to be Velma's cousin - goes missing. A century ago, there was a wave of disappearances in Crystal Cove, and many local people believe that supernatural forces were behind it. Now the whole town believes those same forces are back . . . and up to no good. Daphne and Velma may be the only ones who can solve the mystery and save Marcy-if they can trust each other enough to try. Especially since the truth might be stranger-and scarier-than either girl can imagine . . .
