Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender

studies, African studies, psychology, and global health.

Programming and Problem Solving with C++ Nell B. Dale, Chip Weems, Mark R. Headington, 1997 In the tradition of Pascal and Turbo Pascal, authors Nell Dale and Chip Weems have teamed up with Mark Headington to offer *Programming and Problem Solving with C++* for students in the CS1/C101 course. Written in the same style as the successful Pascal books, this text provides an accessible introduction to programming using C++ for beginning students. Business Communication at Work Marilyn L.

Satterwhite, Judith Olson-Sutton, 2007 *Business Communications at Work*, 3e is a very practical, hands-on text-workbook to help students learn to use the types of communication that they are most apt to experience on the job. The book is full of examples of letters, memos, and correspondence designed to demonstrate the application of the principles covered in the book. A Web site for this book provides supplemental learning exercises. Although the main focus of the book is written communication, a chapter on listening and making a presentation is now included. Each chapter of the book is an independent unit that allows the teacher the flexibility of covering most chapters in any order. This flexibility allows the teacher to customize the course to meet the needs of individual classes. Many chapters are easily broken into units so teachers can cover just the units they want.

Introduction to WordStar Arthur Naiman, 1983
Describes WordStar Word Processing Uses & Applications with Illustrations & Diagrams

Law for Business A. James Barnes, Terry Morehead Dworkin, Eric L. Richards, 2003 For over 20 years, Law for Business has gone well beyond merely identifying the current legal rules and regulations affecting business by offering insights into new developments and trends that will affect the future of business. It has provided students with a comprehensive, yet concise treatment of the legal issues of

fundamental importance to business students and the business profession. The cases, which have always been a strong feature, are edited and re-written by the authors, who divide the material into three categories: facts, issues, decisions. The authors, Barnes, Dworkin, and Richards, choose cases that are appropriate to explain precedent and history as well as include hot topic cases that relate to current events. In addition to case applications, the authors use such techniques as content summaries to apply concepts to practice. Effective managers and employees must develop knowledge of both law and business because people involved in business also are involved in, and greatly affected by, the laws concerning business.
