Youth Gambling Jeffrey L. Derevensky, Daniel T. L. Shek, Joav Merrick, 2011-10-27 Youth gambling represents a potentially serious public policy and health issue. Nevertheless, the rise in youth gambling issues and problems in the global context is not matched with a parallel increase in research on adolescent gambling. As such, there is an urgent need to conduct more studies on adolescent gambling behaviour. Recently significant advances in the knowledge of the risk factors associated with adolescent problems has emerged. This book addresses issues related to prevalence, assessment, prevention and treatment of youth gambling problems as well as concerns related to technological changes associated with youth problem gambling.

Pre-legislative scrutiny of the draft Gambling (Licensing and Advertising) Bill Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2013-05-01 Around 80% of online gambling in the UK is conducted with operators which are not licensed here. In December 2012 the Government published a very short draft Gambling (Licensing and Advertising) Bill to require overseas gambling operators to obtain a Gambling Commission licence. The overseas-based remote gambling operators generally opposed the Bill, on the grounds it was unnecessary for consumer protection, might drive consumers to cheaper unlicensed operators and was principally intended to bring overseas operators within the UK's tax regime. Much of the UK-based gambling industry, sports bodies and organisations working to combat problem gambling supported the principle of the Bill. Almost all those who gave oral or written evidence to the Committee raised the issue that the enforcement regime would have to be rigorous in order to provide any of the benefits to consumers. The Committee supports the principle that gambling should be regulated on a 'point of consumption' basis. The Committee also notes the concerns raised about taxation of the online industry. The Government stated that the ability to bring all operators serving UK consumers within the tax net is a consequence, but not the prime motivation, of the draft legislation. The Committee notes in this regard that, in setting a tax rate for remote gambling, the Treasury should bear in mind that too high a rate would be liable to drive customers and companies into the unregulated, black market.

Empirical Views on European Gambling Law and Addiction Simon Planzer, 2014-02-19 This book analyses the voluminous and meandering case law on gambling of the Court of Justice from an empirical perspective. It offers a comprehensive overview of the legal situation of gambling services in the EU Single Market. Additionally, the book presents the current state of research on gambling addiction. It then seeks to answer the central research

question as to what extent the views of the Court of Justice on gambling find support in empirical evidence. The Court of Justice granted exceptionally wide discretion to the Member States due to a so-called 'peculiar nature' of games of chance. With the margin of appreciation having played a key role, the book inquires whether the Court of Justice followed the principles and criteria that normally steer the use of this doctrine. Noting the Court's special approach, the book elaborates on its causes and consequences. Throughout the book, the approach of the Court of Justice is contrasted with that of its sister court, the EFTA Court. Finally, the potential role of the precautionary principle and of EU fundamental rights in the area of gambling law is examined. Situated at the intersection of law and science, this book seeks to bridge the legal and scientific perspectives and the unique vocabularies common to each. It illustrates the direct relevance of science and empirical research for court cases and policy making. And it contrasts science-informed policy making with the on-going morality discourse on gambling.

The Gambling Act 2005 Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee,2012-07-24 High street betting shops and casinos alike are currently allowed a maximum of four B2 (FOBT) gaming machines, which allow stakes up to £100 and a £500 prize. Casinos, should instead be permitted to operate up to twenty B2-type gaming machines. Limiting the number of B2 machines in betting shops has encouraged them to cluster in some high streets in order to satisfy customer demand. Local Authorities should have the power to permit more than the four B2 machines per shop if they believe it will help with clustering. The Committee also recommends that any local authority be able to make the decision as to whether or not they want a casino. As a step towards this, existing 1968 Act Casino licences should be made portable, allowing operators to relocate to any local authority provided that they continue to be constrained by the need to obtain local authority approval, a premises licence and planning permission. The failure to set remote gambling taxation at a level at which online operators could remain within the UK has led to almost every online gambling operator moving offshore whilst most are still able to advertise and operate into the UK. The Committee further recommends the Gambling Commission should introduce a new licence fee structure which reduces the current anomaly where small, independent bookmakers pay much higher fees per shop than large chains. Particularly given the absence of a significant UK-regulated online sector or any Regional Casinos, the Gambling Commission remains an overly expensive, bureaucratic regulator.

Gambling Regulation and Vulnerability Malgorzata Anna Carran, 2018-03-30 Since the UK Gambling Act of 2005 was introduced, gambling has stopped being seen, politically and legally as an inherent vice and is now viewed as a legitimate form of entertainment. *Gambling Regulation and Vulnerability* explores the laws around gambling that aim to protect society and individuals, examining the differences between regulatory rhetoric and the impact of legislative and regulatory measures. Malgorzata Carran finds that although the Gambling Act introduced many positive changes to gambling regulation, it has created an environment in which protection of vulnerable individuals becomes difficult. Carran challenges the existing legislative premise that regulation alone is able to balance the effect of liberalisation for those who are vulnerable.

Gambling Advertising Barrie Gunter, 2019-04-15 This book critically examines research evidence from around the world concerning the nature and effects of gambling advertising. It draws upon political and regulatory debates about this type of advertising, which provides regulators with evidence to control factors that encourage problem gambling.

Online Gambling and Crime James Banks, 2016-05-13 Offering the first empirically driven assessment of the development, marketisation, regulation and use of online gambling organisations and their products, this book explores the relationship between online gambling and crime. It draws upon quantitative and qualitative data, including textual and visual analyses of e-gambling advertising and the records of player-protection and standards organisations, together with a virtual ethnography of online gambling subcultures, to examine the ways in which gambling and crime have been approached in practice by gamers, regulatory agencies and online gambling organisations. Building upon contemporary criminological theory, it develops an understanding of online gambling as an arena in which risks and rewards are carefully constructed and through which players navigate, employing their own agency to engage with the very real possibility of victimisation. With attention to the manner in which online gambling can be a source of criminal activity, not only on the part of players, but also criminal entrepreneurs and legitimate gambling businesses, *Online Gambling and Crime* discusses developments in criminal law and regulatory frameworks, evaluating past and present policy on online gambling. A rich examination of the prevalence, incidence and experience of a range of criminal activities linked to gambling on the Internet, this book will appeal to scholars and policy makers in the fields of sociology and criminology, law, the study of culture and subculture, risk, health studies and social policy.

Law, Mind and Brain Michael Freeman, Oliver R. Goodenough, 2017-05-15 Over the past 20 years, cognitive neuroscience has revolutionized our ability to understand the nature of human thought. Working with the understandings of traditional psychology, the new brain science is transforming many disciplines, from economics to literary theory. These developments are now affecting the law and there is an upsurge of interest in the potential of neuroscience to contribute to our understanding of criminal and civil law and our system of justice in general. The international and interdisciplinary chapters in this volume are written by experts in criminal behaviour, civil law and jurisprudence. They concentrate on the potential of neuroscience to increase our understanding of blame and responsibility in such areas as juveniles and the death penalty, evidence and procedure, neurological enhancement and treatment, property, end-of-life choices, contracting and the effects of words and pictures in law. This collection suggests that legal scholarship and practice will be increasingly enriched by an interdisciplinary study of law, mind and brain and is a valuable addition to the emerging field of neurolaw.

Member States versus the European Union Alan Littler, 2011-04-11 National attempts to regulate gambling often run into conflict with the EU's internal market. This book analyses the approaches taken at the national level against the requirements of EU law in addition to contextualizing a highly polarised debate.

Gambling in Everyday Life Fiona Jean Nicoll, 2019-05-15 The book adopts a critical cultural studies lens to explore the entanglement of government and gambling in everyday life. Its qualitative approach to gambling creates a new theoretical framework for understanding the most urgent questions raised by research and policy on gambling. In the past two decades, gambling industries have experienced exponential growth with annual global expenditure worth approximately 300 billion dollars. Yet most academic research on gambling is concentrated on problem gambling and conducted within the psychological sciences. Nicoll considers gambling at a moment when its integration within everyday cultural spaces, moments, and products is unprecedented. This is the first interdisciplinary cultural study of gambling in everyday life and develops critical and empirical methods that capture the ubiquitous presence of gambling in work, investment and play. This book also contributes to the growing cultural studies literature on video and mobile gaming. In addition to original case studies of gambling moments and spaces, in-depth interviews and participant observations provide readers with an

insider's view of gambling. Advanced students of sociology, cultural theory, and political science, academic researchers in the field of gambling studies will find this an original and useful text for understanding the cultural and political work of gambling industries in liberal societies.

Crime, Addiction and the Regulation of Gambling A. Spapens, Cyrille J.C.F. Fijnaut, Alan Littler, 2008-11-27 This is the third book to be produced by members of the Gambling Research Group – associated with Tilburg University's Faculty of Law concerning issues closely connected with the debate on the gambling policies that the European Union and its Member States are pursuing. The first book – Alan Littler and Cyrille Fijnaut (eds), *The Regulation of Gambling: European and National Perspectives* (Leiden, Martinus Nijhoff Publishers, 2007) – mainly considers the legal aspects of gambling regulation, at both European Union and Member State level. The second book – Tom Coryn, Cyrille Fijnaut and Alan Littler (eds), *Economic Aspects of Gambling Regulation: EU and US Perspectives* (Leiden, Martinus Nijhoff Publishers, 2008) – looks at research conducted in the United States and the European Union into the costs and benefits involved in the regulation of gambling. The contributions to this third book turn the spotlight on two social problems: crime and addiction, both of which play a significant part in the institutional debate in the European Union concerning whether gambling should be treated as a service that – like other services – should be subject to the laws universally applicable to the internal market. This volume is primarily devoted to the research that has been conducted in several Member States into the problems of gambling-related crime and addiction. It also examines developments at EU level: What policy is the European Commission currently pursuing? And what stance does the European Court of Justice take these days? Crime and addiction problems that can arise in the context of online gambling and at possible ways of keeping them under control. are also examined.

Routledge International Handbook of Internet Gambling Robert J. Williams, Robert T. Wood, Jonathan Parke, 2012-11-27 Internet gambling is a rapidly growing phenomenon, which has profound social, psychological, economic, political, and policy implications. Until recently, Internet gambling has been understudied by the research community, but now a growing body of literature is emerging, on all aspects of Internet gambling and its attendant implications. As jurisdictions around the world grapple to understand the best way to respond to Internet gambling from a commercial, regulatory, and social perspective, scholarly studies of Internet gambling are becoming an ever more crucial resource. The Handbook of Internet Gambling consolidates this emerging body of literature into a single reference volume. Its twenty chapters comprise groundbreaking contributions from the world's leading

authorities in the commercial, clinical, political and social aspects of Internet gambling. It is sure to be a foundational resource for academics, students, regulators, politicians, policy makers, commercial providers, and health care professionals who have an interest in understanding the history, dynamics, and impacts of Internet gambling in a global context.

The Casino and Society in Britain Seamus Murphy, 2020-11-23 This book is a study of the British casino industry and how it has been shaped by criminality, prohibition, regulation and liberalization since the beginning of the First World War. The reader will gain a detailed knowledge of the history, culture, identity and participants within the British casino industry, which has, to date, escaped the attention of a dedicated historical and criminological

investigation. This monograph fills this gap in inquiry while drawing on primary source material that has not been used previously, including, but not confined to, records in the National Archives relating to the Gaming Board of Great Britain and the Metropolitan Police. In addition to archive material, oral histories, newspapers, published journals and books have been utilised and referenced where appropriate. Envisaged to close a gap in historical research, this book will be of interest to historians, criminologists, regulators, students and individuals interested in gambling, society and cultural history.

Cocktails Simon Difford, 2008-02 The 7th edition of a book that is widely regarded by members of the drinks industry as the most complete and authoritative cocktail publication available. It contains 2,250 easy to follow cocktail recipes, each accompanied by a colour photograph. It also includes detailed instructions for beginners, tips for bar professionals, reviews of the top 100 international bars and a history of the cocktail.

Internet Gambling Sally Gainsbury, 2012-03-02 Internet gambling is one of the fastest growing forms of gambling. Global Internet gambling expenditure is predicted to reach US\$33.6 billion in 2011. This is higher than worldwide movie box office revenues and represents 9% of the international gambling market. The rapid increase in expenditure of 354% since 2003 has occurred despite Internet gambling being prohibited in several key markets, including the US and China. It also suggests that current regulation may be somewhat outdated and ineffective as more and more people turn to this mode of gambling. Internet gambling is highly accessible with over 2,400 sites available 24/7 through computers, mobile phones, wireless devices and even interactive televisions. Gamblers can now play casino games, bingo, cards and poker, bet on races, sports and even celebrity weddings using over 199 means of electronic payments without leaving the house. Increasing international jurisdictions are legalizing Internet gambling and the constant accessibility of online gambling has critical social implications. Gambling operators are using aggressive advertising campaigns to move into new markets. Internet gambling appears to be particularly appealing to youth, who are gambling online at substantially higher rates than adults. Furthermore, Internet gambling appears to be related to problem gambling, with rates of problem gambling three to four times higher among Internet than non-Internet gamblers, indicating that it may have a substantial social cost. The anonymity of online sports betting poses a significant threat to the integrity of sport at all levels with increasing allegations of match-fixing and cheating. Estimates suggested that 50% of all bets on the 2010 FIFA World Cup were placed online, worth an estimated £500 million. These figures represent a 700% rise in online betting since the 2006 tournament and included many new players that opened online accounts. It is essential that appropriate responses are made by governments, industry professionals and the

public in response to Internet gambling. This book will provide a comprehensive and up-to-date overview of Internet gambling, including the social impact and regulatory options. A global outline will include the characteristics and features of the many forms of Internet gambling, including the current market, and participation, and differences between Internet and non-Internet gambling. Specific regional considerations will be explored including regulatory responses and options. Importantly, the social consequences and costs of Internet gambling will be examined, including the impact of online gambling on sports, youth and problem gambling. Strategies for prevention and responsible gambling will be considered as well as expected trends.
