**Potentia** Sandra Leonie Field,2020 This book offers a detailed study of the political philosophies of Thomas Hobbes and Benedict de Spinoza, focussing on their concept of power as potentia, concrete power, rather than power as potestas, authorised power. The focus on power as potentia generates a new conception of popular power. Radical democrats-whether drawing on Hobbes's 'sleeping sovereign' or on Spinoza's 'multitude'-understand popular power as something that transcends ordinary institutional politics, as for instance popular plebites or mass movements. However, the book argues that these understandings reflect a residual scholasticism which Hobbes and Spinoza ultimately repudiate. Instead, on the book's revisionist conception, a political phenomenon should be said to express popular power when it is both popular (it eliminates oligarchy and encompasses the whole polity), and also powerful (it robustly determines political and social outcomes). Two possible institutional forms that this popular power might take are distinguished: Hobbesian repressive egalitarianism, or Spinozist civic strengthening. But despite divergent institutional proposals, the book argues that both Hobbes and Spinoza share the conviction that there is nothing spontaneously egalitarian or good about human collective existence. From this point of view, the book accuses radical democrats of pernicious romanticism; the slow, meticulous work of organizational design and maintenance is the true centre of popular power--

*Biological Control: Measures of Success* G. Gurr,S.D. Wratten,2012-12-06 As well as examining successful biological control programmes this book analyses why the majority of attempts fail. Off-target and other negative effects of biological control are also dealt with. Chapters contributed by leading international researchers and practitioners in all areas of biological control afford the book a breadth of coverage and depth of analysis not possible with a single author volume. Combined with the use of other experts to review chapters and editorial oversight to ensure thematic integrity of the volume, this book provides the most authoritative analysis of biological control published. Key aspects addressed include how success may be measured, how successful biological control has been to date and how may it be made more successful in the future. With extensive use of contemporary examples, photographs, figures and tables this book will be invaluable to advanced undergraduate and postgraduate students as well as being a `must' for all involved in making biological control successful.

Hoping to Help Judith N. Lasker,2016-02-19 Overseas volunteering has exploded in numbers and interest in the last couple of decades. Every year, hundreds of thousands of people travel from wealthier to poorer countries to participate in short-term volunteer programs focused on health services. Churches, universities, nonprofit service organizations, profit-making voluntourism companies, hospitals, and large corporations all sponsor brief missions. Hoping to Help is the first book to offer a comprehensive assessment of global health volunteering, based on research into how it currently operates, its benefits and drawbacks, and how it might be organized to contribute most effectively. Given the enormous human and economic investment in these activities, it is essential to know more about them and to understand the advantages and disadvantages for host communities. Most people assume that poor communities benefit from the goodwill and skills of the volunteers. Volunteer trips are widely advertised as a means to give back and make a difference. In contrast, some claim that health volunteering is a new form of colonialism, designed to benefit the volunteers more than the host communities. Others focus on unethical practices and potential harm to the presumed beneficiaries. Judith N. Lasker evaluates these opposing positions and relies on extensive research—interviews with host country staff members, sponsor organization leaders, and volunteers, a national survey of sponsors, and participant observation—to identify best and worst practices. She adds to the debate a focus on the benefits to the sponsoring organizations, benefits that can contribute to practices that are inconsistent with what host country staff identify as most likely to be useful for them and even with what may enhance the experience for volunteers. Hoping to Help illuminates the activities and goals of sponsoring

organizations and compares dominant practices to the preferences of host country staff and to nine principles for most effective volunteer trips.

**Innovation in Information Systems and Technologies to Support Learning Research** Mohammed Serrhini,Carla Silva,Sultan Aljahdali,2019-11-30 This book provides glimpses into contemporary research in information systems & technology, learning, artificial intelligence (AI), machine learning, and security and how it applies to the real world, but the ideas presented also span the domains of telehealth, computer vision, the role and use of mobile devices, brain-computer interfaces, virtual reality, language and image processing and big data analytics and applications. Great research arises from asking pertinent research questions. This book reveals some of the authors' "beautiful questions" and how they develop the subsequent "what if" and "how" questions, offering readers food for thought and whetting their appetite for further research by the same authors.

**Names, Natures and Things** Syed Nomanul Haq,2012-12-06 Jabir ibn Hayyan, for a long time the reigning alchemical authority both in Islam and the Latin West, has exercised numerous generations of scholars. To be sure, it is not only the vexed question of the historical authorship and dating of the grand corpus Jabirianum which poses a serious scholarly challenge; equally challenging is the task of unraveling all those obscure and tantalizing discourses which it contains. This book, which marks the first full-scale study of Jabir ever to be published in the English language, takes up both challenges. The author begins by critically reexamining the historical foundations of the prevalent view that the Jabirian corpus is the work not of an 8th-century individual, but that of several generations of Shi'i authors belonging to the following century and later. Tentatively concluding that this view is problematic, the author, therefore, infers that its methodological implications are also problematic. Thus, developing its own methodological matrix, the book takes up the second challenge, namely that of a substantive analysis and explication of a Jabirian discourse, the Book of Stones. Here

explicating Jabir's notions of substance and qualities, analyzing his ontological theory of language and unraveling the metaphysics of his Science of Balance, the author reconstructs the doctrinal context of the Stones and expounds its central theme. He then presents an authoritative critical edition of a substantial selection of the text of the Stones, based on all available manuscripts. This critical edition has been translated in its entirety and is provided with exhaustive commentaries and textual notes -- another pioneering feature of this book: for this is the first English translation of a Jabirian text to emerge in print after a whole century. An outstanding contribution is that it announces and presents an exciting textual discovery: the author has found in the Stones a hitherto unknown Arabic translation of part of Aristotle's Categories. Given that we have so far known of only one other, and possibly later, classical Arabic translation of the Greek text, Haq's discovery gives this book an historical importance.

**Public Management Reform : A Comparative Analysis** Christopher Pollitt,Geert Bouckaert,1999-12-09 In this major new contribution to a rapidly expanding field, the authors offer an integrated analysis of the wave of management reforms which have swept through so many countries in the last twenty years. The reform trajectories of ten countries are compared, and key differences of approach discussed. Unlike some previous works, this volume affords balanced coverage to the 'New Public Management' (NPM) and the 'non-NPM' or 'reluctant NPM' countries, since it covers Australia, Canada, Finland, France, Germany, the Netherlands, New Zealand, Sweden, the UK and the USA. Unusually, it also includes a preliminary analysis of attempts to improve management within the European Commission.

*Network and Netplay* Fay Sudweeks,Margaret L. McLaughlin,Sheizaf Rafaeli,1998 This text addresses the mutual influences between information technology and group formation and development, in order to assess the impact of computer-mediated communications on both work and play. Areas discussed include the growth of the Internet and the nature of network communication.
